

# NCP-AII Actual Test Answers, Mock NCP-AII Exams

What's more, part of that Exam4Tests NCP-AII dumps now are free: <https://drive.google.com/open?id=12otLx-3ZnT-eQn6rfN8z8qDlc6spmnnP>

Our NCP-AII practice questions are not famous for nothing. As long as you choose our NCP-AII study guide, you will find that the exam questions and answers are always the most accurate and up-to-date. It is all due to the hard work of our professionals who always keep a close eye on the updating. The NCP-AII learning braindumps are regularly updated in line with the changes introduced in the exam contents. You will always find our NCP-AII exam simulating highly relevant to your needs.

Are you finding it challenging to take the NVIDIA AI Infrastructure (NCP-AII) Certification Exam due to your busy schedule? Well, worry no more! Preparing for your NCP-AII exam has become convenient and hassle-free. You can now study from the comfort of your home, without needing to attend any classes or disrupt your existing schedule. With Exam4Tests, you have access to a reliable and comprehensive source of NCP-AII Exam Questions for your NVIDIA AI Infrastructure (NCP-AII) exam, ensuring your success in the test. Let's explore how Exam4Tests can assist you in acing your real NVIDIA AI Infrastructure (NCP-AII) quiz quickly and smoothly.

>> NCP-AII Actual Test Answers <<

## Mock NCP-AII Exams, NCP-AII Practice Test Online

The NVIDIA NCP-AII Practice Exam feature is the handiest format available for our customers. The customers can give unlimited tests and even track the mistakes and marks of their previous given tests from history so that they can overcome their mistakes. The NCP-AII Exam can be customized which means that the students can settle the time and NVIDIA AI Infrastructure according to their needs and solve the test on time.

## NVIDIA AI Infrastructure Sample Questions (Q105-Q110):

### NEW QUESTION # 105

You are deploying a multi-tenant AI infrastructure with strict isolation requirements. Which network technology would be most suitable for creating isolated virtual networks for each tenant?

- A. QinQ (802.1ad)
- B. VLANs (Virtual LANs)
- C. GRE (Generic Routing Encapsulation)
- D. VXLAN (Virtual Extensible LAN)
- E. IPsec

**Answer: D**

Explanation:

VXLAN is most suitable for multi-tenant environments because it provides a larger address space (24-bit VNI) compared to VLANs (12-bit VLAN ID), allowing for a greater number of isolated networks. VXLAN also supports Layer 2 connectivity across Layer 3 networks, facilitating VM mobility across different subnets. While QinQ can extend the VLAN ID space, it's not as scalable

as VXLAN. GRE provides tunneling but doesn't inherently provide isolation. IPsec is primarily for secure communication.

#### NEW QUESTION # 106

You have installed NVIDIA drivers using the `.run` installer on a system running Ubuntu. However, after each kernel update, the NVIDIA drivers stop working. What is the most effective way to address this issue permanently?

- A. Disable automatic kernel updates.
- **B. Use DKMS (Dynamic Kernel Module Support) to automatically rebuild the NVIDIA kernel modules after each kernel update.**
- C. Re-run the `.run` installer after each kernel update.
- D. Create a script that symlinks the old kernel modules to the new kernel directory.
- E. Manually compile the NVIDIA kernel modules after each kernel update.

**Answer: B**

Explanation:

DKMS (Dynamic Kernel Module Support) is the most effective solution. It automatically rebuilds kernel modules (like NVIDIA's) whenever a new kernel is installed. Re-running the `.run` installer is a manual and error-prone process. Disabling kernel updates is not recommended for security reasons. Manually compiling is complex and time-consuming. Symlinking old modules is unlikely to work due to kernel API changes.

#### NEW QUESTION # 107

A user reports that their CUDA application is running slower than expected after an NVIDIA driver update. You suspect a driver compatibility issue. How can you revert to a previous NVIDIA driver version on an Ubuntu system, assuming you have the older driver package `'nvidia-driver-470_470.82.00-0ubuntu1_amd64.deb'`?

- A. Edit the `/etc/apt/sources.list` file to point to an older repository containing the desired driver version, then update and upgrade the system.
- **B. First, remove the current NVIDIA driver using `'sudo apt purge nvidia- s'`, then install the `.deb` package using `'sudo dpkg -i nvidia-driver-470_470.82.00-0ubuntu1_amd64.deb'` and resolve any dependency issues with `'sudo apt --fix-broken install'`.**
- C. Use the NVIDIA System Management Interface (`nvidia-smi`) to downgrade the driver.
- D. Simply install the `.deb` package using `'sudo dpkg -i'`
- E. Install the older `.run` installer version, if you previously installed it using `.run`, using the `-uninstall` option first.

**Answer: B**

Explanation:

The safest and most reliable approach is to first remove the current NVIDIA driver using `'sudo apt purge nvidia-'` to avoid conflicts. Then, install the `.deb` package using `'sudo dpkg -i'` and resolve any potential dependency issues with `'sudo apt -fix-broken install'`. `'nvidia-smi'` cannot downgrade drivers. Editing `/etc/apt/sources.list` can be risky and lead to system instability. Directly installing with `'dpkg -i'` without purging the old driver can cause conflicts. If you installed with `.run` before, then you must uninstall using that method first.

#### NEW QUESTION # 108

You are tasked with installing a DGX A100 server. After racking and connecting power and network cables, you power it on, but the BMC (Baseboard Management Controller) is not accessible via the network. You have verified the network cable is connected and the switch port is active. What are the MOST likely causes and initial troubleshooting steps you should take?

- A. The BMC is not powered on because the main power supply is faulty. Verify the power supply LEDs are lit and providing power to the system.
- B. The BMC firmware is corrupted and needs to be reflashed using a USB drive. Check the DGX support site for the latest BMC firmware.
- **C. The network switch port is not configured for the correct VLAN. Verify the switch port configuration to ensure it is on the same VLAN as the BMC.**
- **D. The BMC IP address is not configured or is on a different subnet. Check the BMC's network configuration using the DGX's front panel or via serial console. Verify DHCP is enabled and functioning or manually configure a static IP address.**
- E. The BMC is faulty and needs to be replaced. Contact NVIDIA support for RMA.

**Answer: C,D**

Explanation:

The most likely causes are network configuration issues (incorrect IP, subnet, or VLAN). The BMC requires a valid IP configuration and network connectivity to be accessible. While other options are possible, they are less common as initial causes.

#### NEW QUESTION # 109

You are attempting to install NGC CLI on a CentOS 7 system, but the 'pip install nvidia-cli' command fails with a 'Could not find a version that satisfies the requirement nvidia-cli' error. You have confirmed that 'pip' is installed and working. What could be the cause of this issue?

- A. The system's firewall is blocking access to the Python Package Index (PyPI). CentOS 7 is not supported by NGC CLI.
- **B. The 'pip' version is outdated and incompatible with the NGC CLI package. Upgrade 'pip' using 'pip install -upgrade pip'.**
- **C. The CentOS 7 system does not have the required Python version installed. NGC CLI requires Python 3.6 or later.**
- D. The system's package manager (YUM) is not configured correctly, preventing 'pip' from finding the NGC CLI package.

**Answer: B,C**

Explanation:

A likely reason is an outdated Python version (A), as NGC CLI requires Python 3.6 or later. Another potential issue is an outdated pip version (C) which could be incompatible with the NGC CLI package. Confirming the correct python version and up to date pip usually resolves this issue. Option E is incorrect, CentOS 7 is supported with correct configuration.

#### NEW QUESTION # 110

.....

This is a good way to purchase valid exam preparation materials for your coming NCP-AII test. Good choice will make you get double results with half efforts. Good exam preparation will point you a clear direction and help you prepare efficiently. Our NCP-AII exam preparation can not only give a right direction but also cover most of the real test questions so that you can know the content of exam in advance. You can master the questions and answers of NVIDIA NCP-AII Exam Preparation, even adjust your exam mood actively.
