

100% Pass Cisco - 300-745 - Authoritative Top Designing Cisco Security Infrastructure Exam Dumps

2026 Latest BraindumpsPrep 300-745 PDF Dumps and 300-745 Exam Engine Free Share: https://drive.google.com/open?id=1gLL17_HCTShLIHghARQMgqYDqWilAer5

The price for 300-745 exam torrent are reasonable, and no matter you are a student at school or an employee in the enterprise, you can afford the expense. In addition, 300-745 exam dumps are reviewed by skilled professionals, therefore the quality can be guaranteed. We offer you free demo to have a try before buying 300-745 Exam Torrent from us, so that you can know what the complete version is like. Free update for one year is available, and the update version will be sent to your email address automatically.

With the protection of content and learning methods on our 300-745 study guide, you will not have to worry about your exam at all. Of course, if you have any suggestions for our 300-745 training materials, you can give us feedback. Our team of experts will certainly consider your suggestions. Perhaps the next version upgrade of 300-745 Real Exam is due to your opinion. In order to thank you for your support, we will also provide you with some benefits.

Valid Exam 300-745 Practice & 300-745 Reliable Dumps Free

God is fair, and everyone is not perfect. As we all know, the competition in the IT industry is fierce. So everyone wants to get the IT certification to enhance their value. I think so, too. But it is too difficult for me. Fortunately, I found BraindumpsPrep's Cisco 300-745 exam training materials on the Internet. With it, I would not need to worry about my exam. BraindumpsPrep's Cisco 300-745 Exam Training materials are really good. It is wide coverage, and targeted. If you are also one of the members in the IT industry, quickly add the BraindumpsPrep's Cisco 300-745 exam training materials to your shoppingcart please. Do not hesitate, do not hovering. BraindumpsPrep's Cisco 300-745 exam training materials are the best companion with your success.

Cisco Designing Cisco Security Infrastructure Sample Questions (Q54-Q59):

NEW QUESTION # 54

Refer to the exhibit.

In addition to SSL decryption, which firewall feature allows malware to be blocked?

- A. File Inspection
- B. SSL Offloading
- C. DLP
- D. URL Filtering

Answer: A

Explanation:

Based on the provided exhibits, the correct firewall feature for blocking malware in this context is File Inspection.

In image_4c047c.png, we see a Cisco Secure Firewall Access Control Policy rule named "Default Inspect".

This rule is configured to allow traffic from the "inside" zone to the "outside" zone while applying deep packet inspection. Crucially, the configuration includes a File Policy field, which is the mechanism used to perform malware analysis and file disposition lookups. By associating a File Policy with an Access Control rule, the firewall can inspect files as they transit the network, calculate their SHA-256 hash, and query the Cisco Collective Security Intelligence cloud to determine if the file is malicious, clean, or unknown.

The evidence of this feature in action is found in image_4b1ebe.png, which shows the Cisco Secure Endpoint (formerly AMP for Endpoints) Device Trajectory. The "Activity Details" pane specifically identifies a malicious file (iodrxvg.exe) categorized as W32.DFC.MalParent. While the log notes the file was not quarantined because it was in "audit only mode," the underlying technology performing the detection is File Inspection. This feature provides the necessary visibility into the contents of encrypted or unencrypted data streams to identify and—when properly configured in a "Protect" or "Block" mode—stop the execution of malware. This aligns with the Cisco SDSI objective of building a layered defense that combines perimeter traffic control with granular file-level security.

NEW QUESTION # 55

Which two metrics are important for evaluating the performance of automated security response workflows? (Choose two.)

- A. Mean Time to Detect (MTTD)
- B. CPU temperature
- C. Mean Time to Respond (MTTR)
- D. VLAN propagation speed

Answer: A,C

Explanation:

MTTD measures how quickly incidents are detected, and MTTR measures how quickly they are resolved. Together, they indicate the effectiveness of automated security response workflows.

NEW QUESTION # 56

A construction company recently introduced a BYOD policy, where contractors can bring personal devices and connect to the wireless network. The network engineer configured a Wi-Fi network with a guest splash page to provide internet access only. Although the policy was limited to wireless devices, contractors started bringing devices that needed wired connections without authorization and connecting to the network. The network team suggested shutting down ports where unauthorized devices are connected. Which technology must be implemented to ensure that wired and wireless devices are granted network access only after successful authentication?

- A. private VLANs
- B. VxLANs
- C. 802.1x
- D. VACLs

Answer: C

Explanation:

802.1X provides port-based network access control, requiring devices (wired or wireless) to authenticate before gaining network access. This ensures that only authorized users and devices can connect, enforcing the BYOD policy and preventing unauthorized wired connections.

NEW QUESTION # 57

After deploying a new API, the security team must identify the components of the application that are exposed to the internet and whether there are application authentication risks. Which technology must be deployed to discover the applications services and monitor for authentication issues?

- A. API trace analysis
- B. Cloud Security Posture Management

- C. secret scanning
- D. Cloud Workload Protection

Answer: A

Explanation:

Securing APIs requires visibility into the "runtime" behavior of the application. API trace analysis (often part of an API Security solution like Cisco Panoptica) is the technology used to automatically discover API endpoints and analyze the traffic flowing through them. This process identifies "shadow APIs" (undocumented endpoints) that are exposed to the internet and inspects the headers and payloads for authentication risks, such as missing tokens or broken object-level authorization (BOLA).

By monitoring actual traffic traces, the security team can confirm if the API is following the intended security design or if it is leaking sensitive data due to poor authentication implementation. Cloud Security Posture Management (CSPM) (Option A) focuses on the configuration of the cloud infrastructure (like an open S3 bucket) rather than the internal logic of an API's authentication. Secret scanning (Option C) is a "shift-left" technique used to find hardcoded passwords in source code during the build phase, not for monitoring live traffic. Cloud Workload Protection (CWPP) (Option D) focuses on protecting the underlying host or container from malware and exploits. Only API trace analysis provides the specific visibility into service discovery and application-layer authentication health required in the Cisco SDSI v1.0 objectives for modern DevSecOps environments.

NEW QUESTION # 58

How does a SOC leverage flow collectors?

- A. It provides real time content filtering.
- B. It performs data backup and recovery.
- C. It performs load balancing capabilities across systems to optimize performance.
- **D. It provides data for analysis in threat detection and response system.**

Answer: D

Explanation:

A flow collector gathers metadata about network traffic (such as NetFlow or IPFIX), which SOC analysts use to analyze communication patterns. This data is critical for threat detection and response, helping identify anomalies, lateral movement, or potential attacks.

NEW QUESTION # 59

.....

With rigorous analysis and summary of 300-745 exam, we have made the learning content easy to grasp and simplified some parts that beyond candidates' understanding. In addition, we add diagrams and examples to display an explanation in order to make the interface more intuitive. Our 300-745 exam questions will ease your pressure of learning, using less Q&A to convey more important information, thus giving you the top-notch using experience if you study with our 300-745 Training Materials. And with the high pass rate of 99% to 100%, the 300-745 exam will be a piece of cake for you.

Valid Exam 300-745 Practice: <https://www.briandumpsprep.com/300-745-prep-exam-braindumps.html>

Our Company is always striving to develop not only our 300-745 study materials, but also our service because we know they are the aces in the hole to prolong our career, Don't worry if any new information comes out after your purchase of our 300-745 practice braindumps, Our company and staff take pride in our 300-745 exam torrent, Cisco Top 300-745 Exam Dumps You can buy our products at once.

Logging to a Process, This book is not about learning new software Certification 300-745 Exam Cost or being told how to do something it's about exploring and discovering an approach to design that works for you.

Our Company is always striving to develop not only our 300-745 Study Materials, but also our service because we know they are the aces in the hole to prolong our career.

Useful Top 300-745 Exam Dumps & Leading Offer in Qualification Exams & Realistic Cisco Designing Cisco Security Infrastructure

Don't worry if any new information comes out after your purchase of our 300-745 practice braindumps, Our company and staff take

pride in our 300-745 exam torrent.

You can buy our products at once, Among global market, 300-745 CCNP Security guide question is not taking up such a large share with high reputation for nothing.
