## ISACA Certified Information Security Manager Sample Questions (Q325-Q330):

### NEW QUESTION # 325

What should be an information security manager's GREATEST concern when an HR department outsources data processing to a

cloud service provider?

- **A. Security posture of the provider**
- B. Data loss protection insurance
- C. Required provider service levels
- D. The scope of the data

**Answer: A**

#### **NEW QUESTION # 326**

Which of the following is the MOST important factor when designing information security architecture?

- A. Scalability of the network
- **B. Stakeholder requirements**
- C. Technical platform interfaces
- D. Development methodologies

**Answer: B**

Explanation:

Explanation

The most important factor for information security is that it advances the interests of the business, as defined by stakeholder requirements. Interoperability and scalability, as well as development methodologies, are all important but are without merit if a technologically-elegant solution is achieved that does not meet the needs of the business.

#### **NEW QUESTION # 327**

The MOST effective way to present information security risk to senior management is to highlight:

- **A. business impact.**
- B. countermeasures.
- C. threat intelligence.
- D. risk mitigation over time.

**Answer: A**

#### **NEW QUESTION # 328**

Which of the following is the MOST important reason for performing a cost-benefit analysis when implementing a security control?

- **A. To ensure that benefits are aligned with business strategies**
- B. To justify information security program activities
- C. To ensure that the mitigation effort does not exceed the asset value
- D. To present a realistic information security budget

**Answer: A**

#### **NEW QUESTION # 329**

Which of the following is MOST effective in preventing the introduction of a code modification that may reduce the security of a critical business application?

- A. Security metrics
