

# Kostenlose ISTQB Certified Tester Usability Tester vce dumps & neueste CT-UT examcollection Dumps

2026 Die neuesten Pass4Test CT-UT PDF- Versionen Prüfungsfragen und CT-UT Fragen und Antworten sind kostenlos verfügbar:  
<https://drive.google.com/open?id=1nRUEPUsq4tGoikwqRD8xBrZuebXWSDFo>

Nach der Schulzeit haben wir mehr Verantwortungen und die Zeit fürs Lernen vermindert sich. Wenn Sie sich im IT-Bereich besser entwickeln möchten, dann ist die internationale Zertifizierungsprüfung wie ISTQB CT-UT Prüfung zu bestehen sehr notwendig. Wir Pass4Test bieten Sie mit alle Kräfte vieler IT-Profis die effektivste Hilfe bei der ISTQB CT-UT Prüfung. 3 Versionen (PDF, online sowie Software) von ISTQB CT-UT Prüfungsunterlagen haben Ihre besondere Überlegenheit. Dadurch, dass Sie die kostenlose Demos probieren, können Sie nach Ihre Gewohnheiten die geeignete Version wählen.

## ISTQB CT-UT Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> <li>Usability Testing: This section measures the practical knowledge of Usability Testers in planning, conducting, analyzing, and reporting formal usability test sessions with users. It outlines test preparation activities including writing test plans, test scripts, and tasks, as well as considerations for test locations and pilot sessions. It explains how to moderate sessions, analyze findings, classify problems by severity, and communicate results effectively to stakeholders.</li> </ul>
Thema 2	<ul style="list-style-type: none"> <li>Selecting Appropriate Methods: This domain helps Test Managers make decisions on which usability evaluation methods to apply depending on project context, resources, and maturity. It discusses criteria for selecting usability, user experience, and accessibility evaluation methods suited to different stages of development and organizational needs, including agile development scenarios.</li> </ul>
Thema 3	<ul style="list-style-type: none"> <li>Basic Concepts: This section measures the skills of Usability Analysts and covers fundamental definitions and ideas related to usability, user experience, and accessibility. It explains what usability means in terms of effectiveness, efficiency, and satisfaction within software products. User experience concepts related to emotions, perceptions, and responses before, during, and after use are included. It also addresses accessibility, focusing on usage by people with diverse abilities.</li> </ul>
Thema 4	<ul style="list-style-type: none"> <li>Usability Reviews: This domain evaluates the skills of Usability Testers in conducting reviews of software interfaces without user involvement. It differentiates informal reviews from expert reviews and introduces heuristic evaluation as a structured method. The section describes step-by-step approaches to preparing for and conducting reviews, emphasizing the importance of consensus and clear communication of findings.</li> </ul>
Thema 5	<ul style="list-style-type: none"> <li>Risks in Usability, User Experience and Accessibility: This domain assesses the ability of Risk Analysts to identify and analyze common risks that can affect usability, user experience, and accessibility. It differentiates between product risks—such as users being unable to use a product effectively—and project risks, including lack of expertise or insufficient usability evaluation processes. Understanding these risks helps in planning effective usability testing and evaluation.</li> </ul>

Thema 6	<ul style="list-style-type: none"> <li>• Usability and Accessibility Standards: This part addresses the knowledge required by Compliance Officers regarding standards and guidelines that govern usability and accessibility. It introduces ISO standards like ISO 9241-110 and ISO 9241-171, manufacturer guidelines from major platforms, and web accessibility guidelines such as WCAG. It also touches on legislation relevant to accessibility requirements, such as the UK Equality Act and the Americans with Disabilities Act.</li> </ul>

## CT-UT Zertifikatsfragen - CT-UT Echte Fragen

Prüfungsfragen und Antworten zur CT-UT Zertifizierung verändern sich immer wegen der Entwicklung der IT-Technik. Deshalb sind Dumps von Pass4Test immer aktualisiert. Und wenn sie die Prüfungsunterlagen zur ISTQB CT-UT Zertifizierung von Pass4Test kaufen, bietet Pass4Test Ihnen einjährigen kostenlosen Aktualisierungsservice. Solange die exam Fragen aktualisiert sind, werden wir Ihnen die neuesten CT-UT Prüfungsmaterialien senden. Damit können Sie jederzeit die neueste Version haben. Pass4Test kann sowohl Ihnen helfen, die Prüfung zu bestehen, als auch die neuesten Kenntnisse zu beherrschen. Verpassen Sie bitte nicht preiswerte Unterlagen.

## ISTQB Certified Tester Usability Tester CT-UT Prüfungsfragen mit Lösungen (Q30-Q35):

### 30. Frage

In a short conversation, a potential customer mentions that accessibility is of great importance to them. What does this mean?

- A. They also seek to address users with limitations
- B. They focus on quantitative usability evaluations
- C. They use prototyping in their development process
- D. They focus on agile development

**Antwort: A**

Begründung:

When a customer emphasizes the importance of accessibility, it means they are concerned with ensuring that users with disabilities or limitations are not excluded from using their products or services. Accessibility is about inclusiveness-providing equal access and opportunity to all users regardless of physical or cognitive ability. Option C directly reflects this understanding. The other options (A, B, and D) are aspects of usability or development methodologies but do not relate to addressing the needs of users with disabilities, which is the core focus of accessibility.

ADA (Americans with Disabilities Act) in Digital Accessibility Contexts

### 31. Frage

You're redesigning the web shop of a customer and found out that they are using legacy web design techniques like HTML tables for design matters, making the website hard to be operated using alternative input and output devices (e.g. screen readers).

Which kind of risk is most likely to occur?

- A. Accessibility risk
- B. User experience risk
- C. Usability risk
- D. There's no risk predictable

**Antwort: A**

Begründung:

The use of HTML tables for layout instead of proper semantic HTML and responsive design violates accessibility guidelines, particularly those defined in the Web Content Accessibility Guidelines (WCAG).

Such a design makes it difficult or impossible for users relying on screen readers, keyboard navigation, or other assistive technologies to interact effectively with the site. Therefore, this creates a significant accessibility risk, which is distinct from general usability or user experience risks. Accessibility ensures inclusion of users with physical or cognitive impairments, making option B the correct choice.

#####

### 32. Frage

Which of these basic approaches to a software development project follows all key elements of human-centered evaluation?

- A. Define requirements, develop the software, and perform acceptance test
- **B. Interview users, iteratively develop prototypes, and evaluate the software**
- C. Interview users, develop the software, and perform acceptance test
- D. Iteratively develop prototypes, perform expert reviews, and integrate found issues

**Antwort: B**

Begründung:

Human-centered design, as defined by ISO 9241-210, emphasizes early user involvement, iterative design, and continuous usability evaluation. Option D aligns with this model as it begins with understanding user needs (interview users), proceeds through iterative prototyping (which allows for continuous improvement), and involves user evaluation. This ensures that the final product is shaped by real user input and feedback.

Options A and B lack iteration and continuous evaluation, while option C, although partially aligned, lacks explicit user involvement in the evaluation process, focusing only on expert reviews.

#####

### 33. Frage

Which of the following is the best description for a usability test session?

- A. A test activity specified by the moderator that needs to be accomplished by a usability test participant within a given period of time.
- **B. A period of time in which a usability test participant is executing tests, moderated by a moderator and observed by a number of observers.**
- C. A document specifying a sequence of actions for the execution of a usability test.
- D. A black-box test technique in which test cases are designed to execute usability scenarios.

**Antwort: B**

Begründung:

A usability test session is a controlled period during which a test participant performs tasks using the system under test while being observed by a moderator and sometimes additional stakeholders or observers. The goal is to understand how users interact with the interface and identify usability problems. Option A describes an individual task, not the whole session. Option C refers to a test plan or test script, and Option D describes a test technique rather than a usability session. Thus, option B provides the most accurate and comprehensive definition.

Usability.gov: Usability Test Sessions

#####

### 34. Frage

What is a usability test task?

- A. A usability test execution activity specified by the moderator that needs to be accomplished by a usability test participant within a given period of time
- B. A document specifying a sequence of actions for the execution of a usability test. It is used by the moderator to keep track of briefing and pre-session interview questions, usability test tasks, and post-session interview questions
- C. A process through which information about the usability of a system is gathered in order to improve the system (known as formative evaluation) or to assess the merit or worth of a system (known as summative evaluation)
- D. A test session in usability testing in which a usability test participant is executing tests, moderated by a moderator and observed by a number of observers

**Antwort: A**

Begründung:

A usability test task is a clearly defined activity that a participant is asked to perform during a usability test session. These tasks are typically created by the test designer or moderator and are designed to reflect realistic user goals (e.g., "Find and buy a product"). The purpose is to observe the participant's interaction with the system and identify usability issues. Option A describes a usability test script, not a task. Option C defines usability evaluation in general, and D refers to a session, not a specific task. Therefore, B is correct.
