

Mule-Arch-201 Reliable Test Cram | Latest Mule-Arch-201 Study Guide

Just like the old saying goes: "Practice is the only standard to testify truth", which means learning of theory ultimately serves practical application, in the same way, it is a matter of common sense that pass rate of a kind of Mule-Arch-201 exam torrent is the only standard to testify weather it is effective and useful. The team of the experts in our company has an in-depth understanding of the fundamental elements that combine to produce world class Mule-Arch-201 Guide Torrent for our customers. This expertise coupled with our comprehensive design criteria and development resources combine to create definitive Mule-Arch-201 exam torrent.

Thousands of people will crowd into our website to choose the Mule-Arch-201 study materials. So people are different from the past. Learning has become popular among different age groups. Our Mule-Arch-201 guide questions truly offer you the most useful knowledge. You can totally trust us. We are trying our best to meet your demands. Why not give our Mule-Arch-201 Practice Engine a chance? Our products will live up to your expectations.

Latest Mule-Arch-201 Study Guide, Practice Mule-Arch-201 Exams Free

Mule-Arch-201 practice materials can expedite your review process, inculcate your knowledge of the exam and last but not the least, speed up your pace of review dramatically. The finicky points can be solved effectively by using our Mule-Arch-201 practice materials. Some practice materials keep droning on the useless points of knowledge. In contrast, being venerated for high quality and accuracy rate, our Mule-Arch-201 practice materials received high reputation for their efficiency and accuracy rate originating from your interests, and the whole review process may cushier than you have imagined before.

Salesforce Certified MuleSoft Platform Architect Sample Questions (Q59-

Q64):

NEW QUESTION # 59

What should be ensured before sharing an API through a public Anypoint Exchange portal?

- A. The API should be secured using one of the supported authentication/authorization mechanisms to ensure that data is not compromised
- **B. The visibility level of the API instances of that API that need to be publicly accessible should be set to public visibility**
- C. The API should be functional with at least an initial implementation deployed and accessible for users to interact with
- D. The users needing access to the API should be added to the appropriate role in Anypoint Platform

Answer: B

Explanation:

Correct Answer: The visibility level of the API instances of that API that need to be publicly accessible should be set to public visibility.

Reference:

<https://docs.mulesoft.com/exchange/to-share-api-asset-to-portal>

NEW QUESTION # 60

How are an API implementation, API client, and API consumer combined to invoke and process an API?

- A. The API client creates an API consumer, which receives API invocations from an API such that they are processed for an API implementation
- B. The API consumer creates an API implementation, which receives API invocations from an API such that they are processed for an API client
- **C. The API consumer creates an API client, which sends API invocations to an API such that they are processed by an API implementation**
- D. The API client creates an API consumer, which sends API invocations to an API such that they are processed by an API implementation

Answer: C

Explanation:

Correct Answer: The API consumer creates an API client, which sends API invocations to an API such that they are processed by an API implementation

Terminology:

>> API Client - It is a piece of code or program that is written to invoke an API

>> API Consumer - An owner/entity who owns the API Client. API Consumers write API clients.

>> API - The provider of the API functionality. Typically an API Instance on API Manager where they are managed and operated.

>> API Implementation - The actual piece of code written by API provider where the functionality of the API is implemented.

Typically, these are Mule Applications running on Runtime Manager.

NEW QUESTION # 61

A Mule application exposes an HTTPS endpoint and is deployed to the CloudHub Shared Worker Cloud. All traffic to that Mule application must stay inside the AWS VPC.

To what TCP port do API invocations to that Mule application need to be sent?

- **A. 0**
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

Correct Answer: 8082

>> 8091 and 8092 ports are to be used when keeping your HTTP and HTTPS app private to the LOCAL VPC respectively.
>> Above TWO ports are not for Shared AWS VPC/ Shared Worker Cloud.
>> 8081 is to be used when exposing your HTTP endpoint app to the internet through Shared LB
>> 8082 is to be used when exposing your HTTPS endpoint app to the internet through Shared LB So, API invocations should be sent to port 8082 when calling this HTTPS based app.

<https://help.mulesoft.com/s/question/0D52T00004mXXULSA4/multiple-http-listeners-on-cloudhub-one-with-port-9090>

NEW QUESTION # 62

A developer from the Central IT team has created an initial version of the RAML definition in Design Center for an OAuth 2.0-protected System API and published it to Exchange. Another developer from LoB IT discovered the System API in Exchange and would like to leverage it in the Process API.

What is the MuleSoft-recommended approach for Process API to invoke the System API?

- A. The Process API manually updates the Process API POM file to include the System API as a dependency
- B. The Process API uses property YAML files to store the System API URLs and uses the HTTP Request Connector to invoke the System API
- **C. The Process API uses the REST Connect Connector autogenerated in Exchange for the System API**
- D. The Process API needs to import an OAuth 2.0 module from Exchange first and update it with OAuth 2.0 credentials before the System API can be invoked

Answer: C

Explanation:

In MuleSoft's ecosystem, when a Process API needs to consume a System API (published to Exchange and protected by OAuth 2.0), the recommended approach is to utilize the REST Connect Connector. Here's how it aligns with best practices:

Automated Connector Generation:

When a RAML or OAS specification is published in Exchange, MuleSoft automatically generates a REST Connect Connector for that API. This connector simplifies integration as it abstracts the complexity of making HTTP requests and handling OAuth authentication.

Streamlined Integration:

The Process API can import this generated connector from Exchange and configure OAuth credentials, streamlining secure access to the System API without manual HTTP setup.

Why Option C is Correct:

Using the REST Connect Connector directly leverages MuleSoft's automated tooling, minimizing manual configurations and ensuring a more maintainable integration.

of Incorrect Options:

Option A (importing an OAuth module) is unnecessary; OAuth is handled within the connector's configuration.

Option B (property YAML files with HTTP requests) involves manual setup, which is more error-prone and not recommended.

Option D (manually updating POM file) does not directly aid in invoking an API through Exchange.

Reference

For more information on using REST Connect Connectors and OAuth integration in MuleSoft, refer to the MuleSoft documentation on API Management and Connectors.

NEW QUESTION # 63

Once an API Implementation is ready and the API is registered on API Manager, who should request the access to the API on Anypoint Exchange?

- A. None
- B. API Client
- **C. API Consumer**
- D. Both

Answer: C

Explanation:

Correct Answer: API Consumer

>> API clients are piece of code or programs that use the client credentials of API consumer but does not directly interact with Anypoint Exchange to get the access

>> API consumer is the one who should get registered and request access to API and then API client needs to use those client credentials to hit the APIs So, API consumer is the one who needs to request access on the API from Anypoint Exchange

NEW QUESTION # 64

.....

Through the good reputation of word of mouth, more and more people choose to use Mule-Arch-201 study torrent to prepare for the Mule-Arch-201 exam, which makes us very gratified. One of the reason for this popularity is our study material are accompanied by high quality and efficient services so that they can solve all your problems. We guarantee that after purchasing our Mule-Arch-201 Test Prep, we will deliver the product to you as soon as possible about 5-10 minutes. So you don't need to wait for a long time or worry about the delivery time has any delay.
