Reliable Cisco 300-425 Exam Labs | Top 300-425 Exam Dumps

Confronting a tie-up during your review of the exam? Feeling anxious and confused to choose the perfect 300-425 latest dumps to pass it smoothly? We understand your situation of susceptibility about the exam, and our 300-425 test guide can offer timely help on your issues right here right now. Without tawdry points of knowledge to remember, our experts systematize all knowledge for your reference. You can download our free demos and get to know synoptic outline before buying. Just hold the supposition that you may

fail the exam even by the help of our 300-425 Study Tool, we can give full refund back or switch other versions for you to relieve you of any kind of losses. What is more, we offer supplementary content like updates for one year after your purchase.

Cisco 300-425 Exam is a 90-minute test that consists of 60-70 questions. 300-425 exam is available in English and Japanese and can be taken at any authorized Pearson VUE testing center. The test is computer-based and requires a passing score of 750 out of 1000 to obtain the certification.

Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q39-Q44):

NEW QUESTION # 39
A network engineer is configuring high availability on an access point. What is the maximum number of controllers that can be configured?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:
Explanation

So max 2 will be supported on an AP.

NEW QUESTION # 40
An engineer has deployed a group of APs in an auditorium and notices that the APs are showing high co- channel interference. Which profile can be used to adjust the parameters for these high-density APs?

- A. AVC profile
- B. ISE profile
- C. RF profile
- D. QoS profile

Answer: D

Explanation:
Section: Wired and Wireless Infrastructure

NEW QUESTION # 41
Refer to the exhibit.

A client roams between two APs that are registered to two different controllers, where each controller has an interface in the client subnet. Both controllers are running AireOS. Which scenario explains the client roaming behavior?

- A. Controllers exchange mobility control messages (over UDP port 16666) and a new client session is started with the new controller.
- B. Controllers exchange mobility control messages (over UDP port 16666) and the client database entry is moved from the original controller to the new controller.
- C. Controllers do not exchange mobility control messages (over UDP port 16666) and the client database, entry is not moved from the original controller to the new controller.
- D. Controllers exchange mobility control messages (over UDP port 16666) and the client database entry is tunneled from the original controller to the new controller.

Answer: B

Explanation:

NEW QUESTION # 42

An engineer is deploying new APs to serve IEEE 802.11g through 802.11ac clients and wants to use the Ekahau Site Survey tool to verify RF coverage. Management wants the engineer to verify and create coverage maps as quickly as possible. Which configuration accomplishes the goal?

- A. active mode with two wireless adapters
- B. passive mode with one wireless adapter
- C. passive mode with two wireless adapters
- D. active mode with one wireless adapter

Answer: C

NEW QUESTION # 43

A wireless engineer is designing a wireless network for a warehouse using access points with internal antennas. Which two elements have a negative effect on the wireless users? (Choose two.)

- A. client authentication
- B. absorption
- C. client authorization
- D. wireless channels
- E. access point height

Answer: B,E

Explanation:
In a warehouse setting, the height at which access points are installed can significantly impact the wireless signal. If the access points are placed too high, the signal may not adequately reach the users. Additionally, absorption by materials commonly found in warehouses, such as metal racks and goods, can weaken the wireless signal, negatively affecting the users.
