## ISTQB (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) Sample Questions (Q84-Q89):

### NEW QUESTION # 84

How many cases are required to test the tax system specification as described below, using a decision table which is not collapsed?  
Tax system

A tax system needs to be updated due to new legislation. For a person with a salary of less than € 20.000 and who is married, the tax needs to be recalculated. If the person also has more than two and less than five children, an additional 10% reduction is applicable.

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: B**

Explanation:

Eight cases are required to test the tax system specification using a decision table that is not collapsed. A decision table is a technique that shows the combinations of conditions and actions for a given scenario. A decision table that is not collapsed contains all possible combinations of conditions and actions, regardless of whether they are valid or not. The conditions for this scenario are:

- \* Salary less than €20 000
- \* Married
- \* Number of children more than two and less than five

The number of cases is equal to the number of possible combinations of these conditions, which is 2
