## HPE Compute Solutions brain dumps, HPE0-S59 dumps pdf

For candidates who are going to select the HPE0-S59 training materials for the exam, the pass rate for the HPE0-S59 training materials is important. With pass rate reaching 98.65%, the exam dumps have reached great popularity among the candidates, and we have received many good feedbacks from the buyers. In addition, HPE0-S59 Exam Materials are edited by professional experts, they possess the professional knowledge for the exam, therefore the quality can be guaranteed. We have free demo for you to have a try for HPE0-S59 training materials. You can have a try before buying.

## HPE Compute Solutions Sample Questions (Q18-Q23):

### NEW QUESTION # 18

Your customer has 6 logical enclosures spanning 18 HPE Synergy frames.

The customer needs to add one more logical enclosure based on 5 HPE Synergy frames.

How will this change impact the customer environment?

- A. The customer can add a new logical enclosure to an existing setup once all required licenses are added to HPE OneView and associated with the new frames.
- **B. The customer has to create a new management ring for new logical enclosure because the maximum number of frames in a single management ring is reached.**
- C. The customer can add a new logical enclosure to the existing setup because the maximum number of logical enclosures in a single management ring is not reached.
- D. The customer has to expand the management ring capacity either by adding HPE Composer 2 modules or adding memory to reach 128GB per module.

**Answer: B**

Explanation:

HPE Synergy management rings have a maximum capacity for the number of frames they can manage. With 18 frames already managed in 6 logical enclosures, adding 5 more frames would exceed this capacity. Therefore, the customer needs to create a new management ring for the new logical enclosure to ensure proper management and operation.

#### NEW QUESTION # 19

Put the steps of the HPE infoSight flow in the correct order.

□

**Answer:**

Explanation:

□ Explanation:

(observing, learning, predicting, recommending, acting)

\* Observing: The first step involves collecting and monitoring data from the infrastructure. HPE InfoSight continuously gathers telemetry data from various components, including storage, compute, and networking devices.

\* Learning: In this step, the collected data is analyzed to identify patterns and trends. Machine learning algorithms process the data to understand the normal behavior of the system and detect anomalies.

\* Predicting: Based on the learned patterns, HPE InfoSight can predict potential issues before they occur.

This predictive analysis helps in identifying areas that might cause problems in the future.

\* Recommending: After predicting potential issues, HPE InfoSight provides actionable recommendations to prevent or resolve these issues. These recommendations are based on best practices and the vast amount of data analyzed by InfoSight.

\* Acting: Finally, the recommendations are implemented to optimize the performance and reliability of the infrastructure. This step may involve configuring settings, applying updates, or other actions to maintain the health of the system.

#### NEW QUESTION # 20

You configured a vVol datastore using HPE Storage integration Pack for VMware vCenter.

Which storage object should you check using SSMC to verify whether vVol datastore is configured properly?

- A. App Volume Set
- B. virtual Volume
- C. Virtual Volume Set
- D. Storage Container

**Answer: D**

Explanation:

When you configure a vVol datastore using the HPE Storage Integration Pack for VMware vCenter, the storage object to check in SSMC (HPE StoreServ Management Console) is the Storage Container. The Storage Container is a logical storage entity that houses virtual volumes (vVols) and represents the vVol datastore in the storage system. Verifying the Storage Container ensures that the vVol datastore is properly configured and managed.

#### NEW QUESTION # 21

Your customer is implementing an HPE Synergy solution based on three frames.

Click each of the ports that can be used to connect satellite modules.

□

**Answer:**

Explanation:

□

#### NEW QUESTION # 22

After HPE Superdome Flex deployment and nPar setup, you need to verify health status of HPE Superdome Flex components.

Put the steps on the left into the coned order on the right to perform this task.

□

**Answer:**

Explanation:

- \* Open SSH client: Begin by opening an SSH client on your computer. This client will be used to establish a secure connection to the Rack Management Controller (RMC).
- \* Open session to RMC: Use the SSH client to open a session to the RMC. The RMC is the central management component for the HPE Superdome Flex system.
- \* Enter show health command: Once connected to the RMC, enter the show health command. This command will provide detailed information about the health status of various components within the Superdome Flex system.
- \* Confirm health status: Review the output of the show health command to confirm the health status of the Superdome Flex components. This step ensures that all components are functioning correctly and identifies any potential issues.

## NEW QUESTION # 23

.....

The BraindumpStudy HPE0-S59 exam questions are checked and verified by experienced and qualified HPE Compute Solutions exam trainers. So you can trust on the validity and top standard of BraindumpStudy HPE0-S59 exam practice test questions. With the BraindumpStudy HPE0-S59 exam questions you will get everything that you need to prepare and pass the challenging HP HPE0-S59 Exam with good scores. The BraindumpStudy HPE0-S59 exam questions will give you an idea about the final HPE0-S59 exam format and you will get experience about HPE0-S59 exam format before the final exam.
