Pass Guaranteed Quiz Palo Alto Networks - High Pass-Rate PCNSE - Exam Palo Alto Networks Certified Network Security Engineer Exam Tutorial

As a matter of fact, since the establishment, we have won wonderful feedback and ceaseless business, continuously working on developing our PCNSE test prep. We have been specializing PCNSE exam dumps many years and have a great deal of long-term old clients, and we would like to be a reliable cooperater on your learning path and in your further development. While you are learning with our PCNSE Quiz guide, we hope to help you make out what obstacles you have actually encountered during your approach for PCNSE exam torrent through our PDF version, only in this way can we help you win the PCNSE certification in your first attempt.

Palo Alto Networks Certified Network Security Engineer Exam Sample Questions (Q122-Q127):

NEW QUESTION # 122

Refer to the diagram.

An administrator needs to create an address object that will be useable by the NYC, MA, CA and WA device groups Where will the object need to be created within the device-group hierarchy?

- A. US
- **B. Americas**
- C. East
- D. West

Answer: B

NEW QUESTION # 123

What happens when the log forwarding built-in action with tagging is used?

- A. Destination zones of selected unwanted traffic are blocked.
- **B. Destination IP addresses of selected unwanted traffic are blocked. ***
- C. Selected unwanted traffic source zones are blocked.
- D. Selected logs are forwarded to the Azure Security Center.

Answer: B

Explanation:

When using the log forwarding built-in action with tagging in Palo Alto Networks firewalls, the primary purpose is to dynamically respond to threats or unwanted traffic identified by the firewall's threat detection mechanisms. The action involves tagging the IP address associated with the unwanted traffic and then using that tag in dynamic security policies to block or manage the traffic.

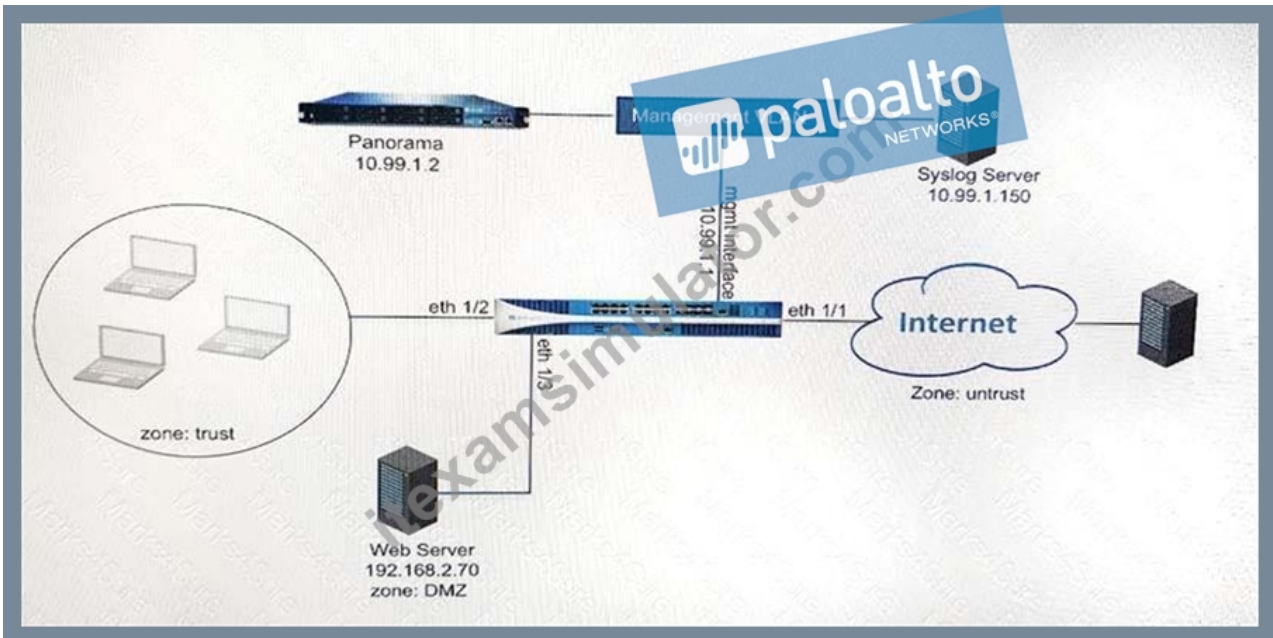

A: Destination IP addresses of selected unwanted traffic are blocked:

* When the tagging action is used, the firewall tags the IP addresses involved in the unwanted traffic (which could be the source or

destination IP addresses, but in many configurations, the focus is on the source of the attack). These tags can then be referenced in Dynamic Address Groups (DAGs) within security policies. Consequently, any traffic coming from or going to these tagged IP addresses can be blocked or subjected to specific security rules, effectively mitigating the threat or unwanted behavior. This approach allows for automated, real-time responses to identified threats, enhancing the security posture by quickly adapting to emerging threats without manual intervention.

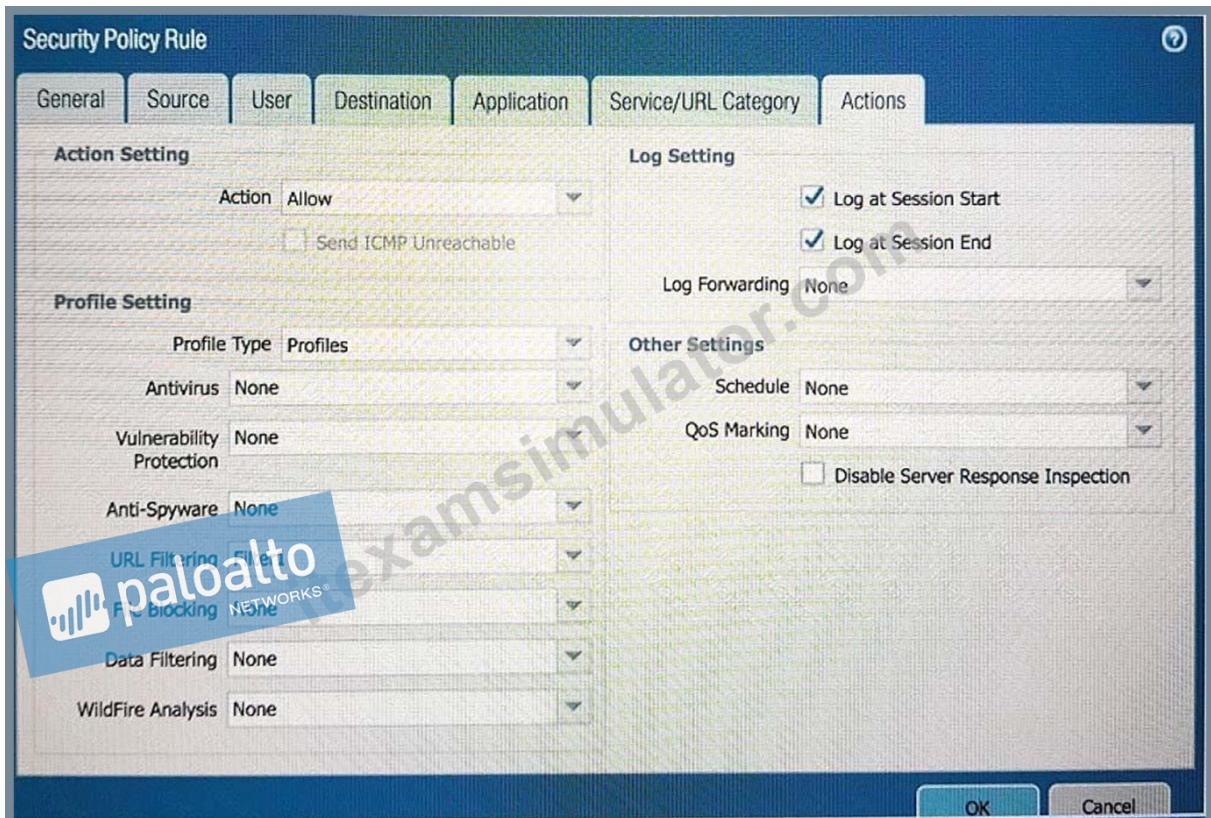

NEW QUESTION # 124

Refer to Exhibit:

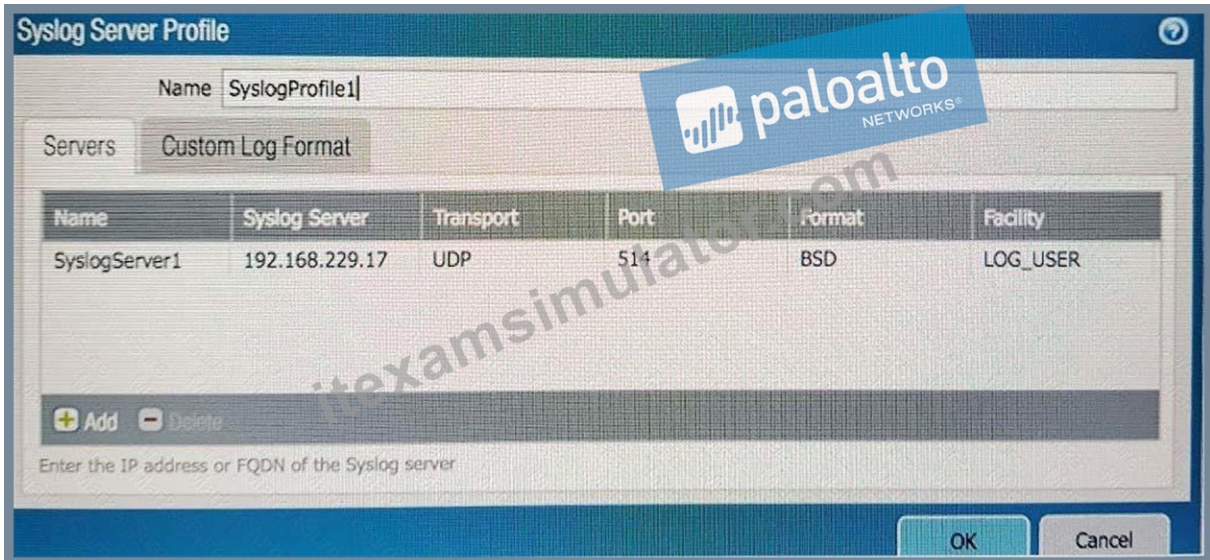

An administrator can not see any Traffic logs from the Palo Alto Networks NGFW in Panorama reports. The configuration problem seems to be on the firewall. Which settings, if configured incorrectly, most likely would stop only Traffic logs from being sent from the NGFW to Panorama?

- A.

- B.

Syslog Server Profile

Name: SyslogProfile1

Servers: Custom Log Format

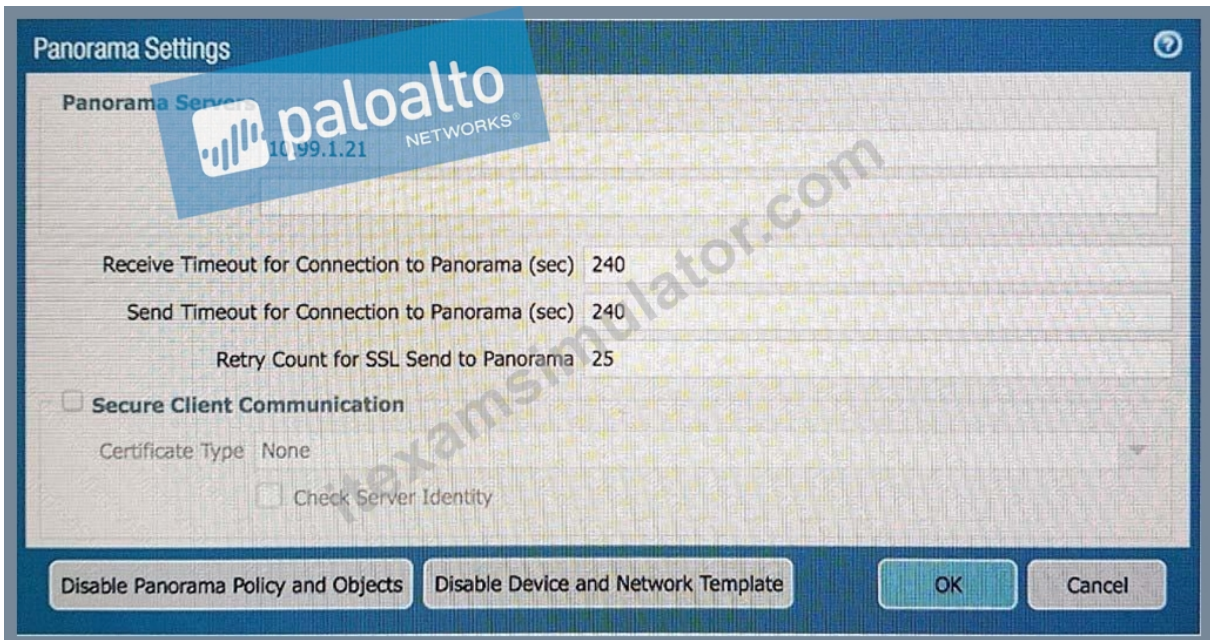

Name	Syslog Server	Transport	Port	Format	Facility
SyslogServer1	192.168.229.17	UDP	514	BSD	LOG_USER

+ Add - Delete

Enter the IP address or FQDN of the Syslog server

OK Cancel

- C.

Panorama Settings

Panorama Server: 10.99.1.21

Receive Timeout for Connection to Panorama (sec): 240

Send Timeout for Connection to Panorama (sec): 240

Retry Count for SSL Send to Panorama: 25

Secure Client Communication

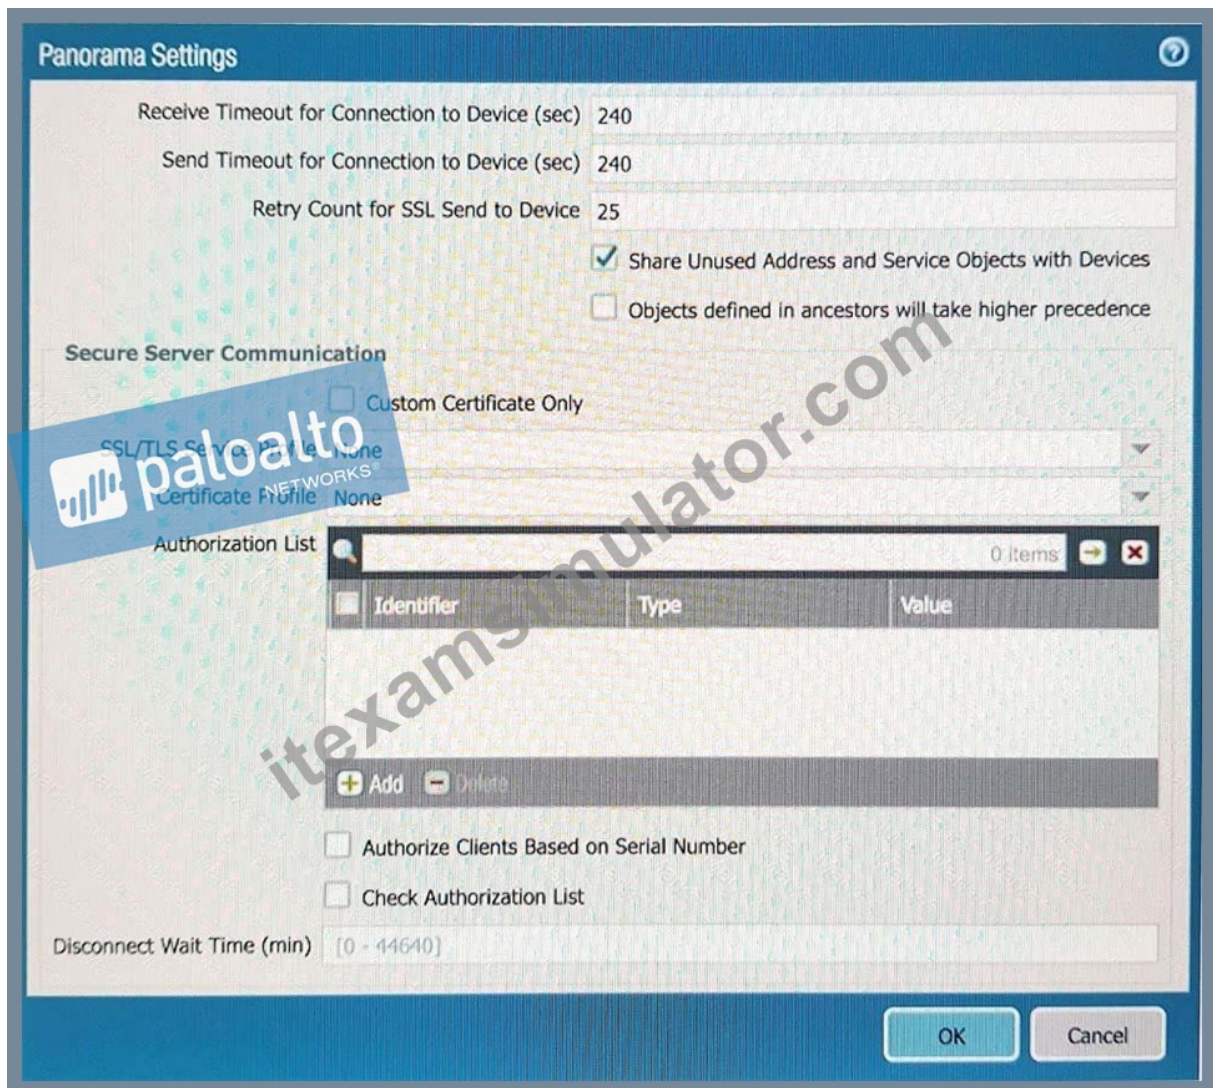

Certificate Type: None

Check Server Identity

Disable Panorama Policy and Objects | Disable Device and Network Template

OK Cancel

- D.

Answer: B

NEW QUESTION # 125

A customer would like to support Apple Bonjour in their environment for ease of configuration.

Which type of interface is needed on their PA-3200 Series firewall to enable Bonjour Reflector in a segmented network?

- A. Loopback interface
- B. Layer 2 interface
- C. Virtual Wire interface
- D. Layer 3 interface

Answer: B

NEW QUESTION # 126

A speed/duplex negotiation mismatch is between the Palo Alto Networks management port and the switch port which it connects.

How would an administrator configure the interface to 1Gbps?

- A. set deviceconfig system speed-duplex 1Gbps-full-duplex
- B. set deviceconfig interface speed-duplex 1Gbps-full-duplex
- C. set deviceconfig Interface speed-duplex 1Gbps-half-duplex
- D. set deviceconfig system speed-duplex 1Gbps-duplex

Answer: A
