Salesforce Certified Slack Administrator Sample Questions (Q52-Q57):

NEW QUESTION # 52

Britt is a Workspace Admin who created a public channel called #bread-buds for co-workers who enjoy bread- making. The company has had new team members join, and the conversation has become more general about all types of carbohydrates. Britt decides it's time to expand the channel. Rather than rename it, Britt creates a new channel #carbohydrate-chats to be inclusive and start fresh with activity. At the same time, Britt wants to keep

#bread-buds so the team can reference baking instructions that have been gathered over the past few years, but she doesn't want anyone posting in it.
What should Britt do?

- A. Convert #bread-buds to private, archive it, and direct everyone to #carbohydrate-chats.
- B. Delete #bread-buds, reference its messages as needed, and direct everyone to #carbohydrate-chats.
- **C. Post a message in #bread-buds redirecting everyone to #carbohydrate-chats, and archive #bread-buds.**
- D. Remove all members from #bread-buds, and invite them to #carbohydrate-chats.

Answer: C

Explanation:

The best Slack practice for retiring an old channel but keeping its content accessible is:

"Post a message notifying members about the transition, then archive the channel. Archived channels are read- only but searchable."

Archiving preserves the channel's history while preventing new posts, matching Britt's goals exactly.

NEW QUESTION # 53

What is true when public file sharing is enabled?

- A. File upload permissions to Slack Connect channels can't be restricted.
- **B. Your organization's file sharing settings will apply to all files uploaded to a Slack Connect channel by any of the up to 250 organizations that have joined the channel.**
- C. In a public channel, only admins can create an external link for a file.
- D. Integrated data loss prevention (DLP) solutions can monitor files in private channels and direct messages (DMs).

Answer: B

Explanation:

Slack documentation states:

"When public file sharing is enabled, file sharing settings apply to files uploaded by any organization participating in a Slack Connect channel." DLP monitoring (A) is separate and applies differently. File upload permissions (C) can be restricted through Slack Connect settings. Any user, not just admins (D), can create external file links if allowed.

NEW QUESTION # 54

Your company wants to add outside consultants onto a project in Slack.

They are not allowed to set up their own Slack workspace, and your company is security-focused.

What is your best course of action?

- A. Add the consultants to the project channel as Multi-Channel Guests with a six-month expiration date.
- **B. Create a new channel for the project, and add the consultants to the project channel as Single-Channel Guests.**
- C. Create a new workspace for external collaboration, and add the consultants as members.
- D. Invite the consultants as Multi-Channel Guests, and create a private channel for the consultants and the project team.

Answer: B

Explanation:

Slack's recommendation for secure external collaboration is:

"Single-Channel Guests are ideal for providing external users with access to only one channel, maintaining strict control over permissions and access." Multi-Channel Guests (B, C) grant access to multiple channels, which is unnecessary and riskier. Creating a new workspace (A) adds administrative burden and is unnecessary for one project.

NEW QUESTION # 55

You're the Primary Owner of your company's Slack Business+ workspace. You need more assistance managing users and channels,

so you task the Head of IT with these duties.

In order to be able to perform these duties, what is the role with the fewest privileges that the Head of IT should be assigned? (Select the best answer.)

- **A. Workspace Admin**
- B. Workspace Owner
- C. Org Admin
- D. Member

Answer: A

Explanation:

According to Slack role definitions:

"Workspace Admins can manage members, channels, and settings for the workspace without the broader privileges of Workspace Owners or Org Admins." Org Admin (A) is too high-level for this task on Business+ (Org Admin is primarily an Enterprise Grid role).

Workspace Owner (C) has more extensive authority, including transferring workspace ownership. Member (D) cannot manage users or channels.

NEW QUESTION # 56

Your company is conducting an internal security assessment of Slack prior to implementation. Which of the following is true about security in Slack?

- **A. Slack data is encrypted at rest and in transit.**
- B. Slack data is stored on your company's servers.
- C. Workspace Admins can see all direct message content at any time through the Admin console.
- D. Slack members can only access Slack when on the corporate network.

Answer: A

Explanation:

Slack ensures that all customer data:

"Is encrypted at rest and in transit, using industry-standard encryption protocols." Workspace Admins cannot access direct messages unless data exports or eDiscovery tools are properly configured and approved. Slack data is stored on Slack-managed servers (AWS infrastructure) and not on customers' own servers by default. Access is not restricted solely to the corporate network unless additional security tools (like Slack Enterprise Mobility Management or VPNs) are enforced.
