## Palo Alto Networks NGFW-Engineer Exam Guide - Vce NGFW-Engineer Torrent

We offer you free update for 365 days for NGFW-Engineer study guide materials, so that you can have a better understanding of what you are going to buy. And update version for NGFW-Engineer exam materials will be sent to your email automatically. In

addition, NGFW-Engineer exam materials are compiled by experienced experts, and they are quite familiar with the exam center, therefore if you choose us, you can get the latest information for the exam We also have online and offline chat service, if you have any questions about NGFW-Engineer Study Guide, you can contact with us online or by email, and we will give you reply as quickly as we can.

## Palo Alto Networks Next-Generation Firewall Engineer Sample Questions (Q118-Q123):

### NEW QUESTION # 118

What is a result of enabling split tunneling in the GlobalProtect portal configuration with the "Both Network Traffic and DNS" option?

- A. It allows users to access internal resources when connected locally and external resources when connected remotely using the same FQDN.
- B. It allows devices on a local network to access blocked websites by changing which DNS server resolves certain domain names.
- **C. It specifies which domains are resolved by the VPN-assigned DNS servers and which domains are resolved by the local DNS servers.**
- D. It specifies when the secondary DNS server is used for resolution to allow access to specific domains that are not managed by the VPN.

**Answer: C**

Explanation:

When split tunneling is enabled with the "Both Network Traffic and DNS" option in the GlobalProtect portal configuration, it allows the firewall to control which traffic is sent over the VPN tunnel and which is not.

Specifically, it determines which domains are resolved by the VPN-assigned DNS servers (for domains requiring VPN access) and which are resolved by local DNS servers (for domains that can be accessed without the VPN tunnel).

### NEW QUESTION # 119

Before upgrading a Palo Alto Networks firewall to a new PAN-OS version, which preliminary step is crucial to ensure a smooth upgrade process?

- A. Disable High Availability (HA) if configured.
- **B. Back up the current configuration.**
- C. Disable all security policies.
- D. Reset the firewall to factory settings.

**Answer: B**

### NEW QUESTION # 120

An administrator is configuring a GlobalProtect pre-logout VPN. The administrator has already imported the necessary internal certificate authority (CA) certificates for issuing machine certificates onto the firewall.

Which configuration is required on the GlobalProtect Gateway to enable pre-logout using these machine certificates?

- A. Create a device-based Security policy that allows traffic from the pre-logout user to an internal management zone.
- B. Create an authentication profile that points to the machine certificate's CA and assign it by using the client authentication settings of the GlobalProtect Portal.
- C. Configure the Gateway Agent --> Tunnel Settings to use IPSec with machine certificate authentication for the pre-logout tunnel.
- **D. Create a certificate profile that trusts the machine certificate's CA and assign it within the Gateway Agent --> Client Authentication settings.**

**Answer: D**

Explanation:

Pre-logout using machine certificates requires the GlobalProtect Gateway to authenticate endpoints based on certificate trust, which is achieved by creating a certificate profile that trusts the issuing CA and assigning it in the Gateway Agent → Client Authentication settings so the gateway can validate machine certificates during pre-logout authentication.

### NEW QUESTION # 121

A security engineer creates a policy allowing only members of the Finance?Active Directory group to access a cloud-based accounting application.

Which NGFW capability makes this policy possible?

- A. User-ID / identity integration
- B. NAT policy
- C. High availability clustering
- D. Dynamic routing protocols

**Answer: A**

Explanation:

User-ID integration maps IP addresses to authenticated users or groups, allowing identity-based security policies.

### NEW QUESTION # 122

When integrating Kubernetes with Palo Alto Networks NGFWs, what is used to secure traffic between microservices?

- A. Ansible automation modules
- B. CN-Series firewalls
- C. Service graph
- D. Panorama role-based access control

**Answer: B**

Explanation:

When integrating Kubernetes with Palo Alto Networks NGFWs, the CN-Series firewalls are specifically designed to secure traffic between microservices in containerized environments. These firewalls provide advanced security features like Application Identification (App-ID), URL filtering, and Threat Prevention to secure communication between containers and microservices within a Kubernetes environment.

### NEW QUESTION # 123

.....

We have special online worker to solve all your problems. Once you have questions about our NGFW-Engineer latest exam guide, you can directly contact with them through email. We are 7\*24\*365 online service. We are welcome you to contact us any time via email or online service. We have issued numerous products, so you might feel confused about which NGFW-Engineer study dumps suit you best. You will get satisfied answers after consultation. Our online workers are going through professional training. Your demands and thought can be clearly understood by them. Even if you have bought our high-pass-rate NGFW-Engineer training practice but you do not know how to install it, we can offer remote guidance to assist you finish installation. In the process of using, you still have access to our after sales service. All in all, we will keep helping you until you have passed the NGFW-Engineer exam and got the certificate.
