One of features of us is that we are pass guaranteed and money back guaranteed if you fail to pass the exam after buying AD0-E117 training materials of us. Or if you have other exam to attend, we can replace other 2 valid exam dumps to you, at the same time, you

can get the update version for AD0-E117 Training Materials. Besides, we offer you free update for 365 days after purchasing, and the update version will be sent to your email address automatically. The AD0-E117 exam dumps include both the questions and answers, and it will help you to practice.

## Adobe Experience Manager Architect Master Sample Questions (Q16-Q21):

### NEW QUESTION # 16

A client is using AEM and wants to make sure they are managing their configurations correctly. Refer to the following requirements: The client has multiple brands that they will be hosting on a single AEM implementation. The client wants to reuse as much between brands as possible. Each brand needs to be able to override the default values for items like contact us information. The client plans to support multiple languages in multiple regions for each brand. Each brand/language/region combination will have its own set of content approvers used as part of a custom workflow. Which approach should an Architect recommend to manage the client's configurations for AEM?

- A. Use OSGi Configuration to handle configuration overrides by brand. Create a new workflow for each brand/language/region combination for content approval.
- B. Use the OOTB Configuration Browser to set configuration defaults and approval group by brand/language/region combination.
- C. Use Context-aware configurations to manage configuration overrides and approval group by brand/language/region combination.
- D. Use OSGi to manage approval group and provide default contact us information by runmode.

**Answer: D**

### NEW QUESTION # 17

A customer is about to go live with a new website on AEM on prem. The DNS (www.domam.com) already points to the load balancer of the AEM environment and final sanity checks are being performed. The website was tested in lower environments without SSL. On production, the website is served over https. During sanity testing, all requests result in a 404.

While investigating this issue, an Architect determines the following:

- \* The requests land on port 443 on the load balancer where SSL is terminated and an HTTP header X-Forwarded-Proto is set
- \* The website Sling Mapping is created beneath /etc/map/http/www.domain.com.80
- \* The URLs on the website are externalized with http in the absolute links. Which two actions should the Architect take to resolve this problem? (Choose two.)

- A. Ensure the Sling Mapping exist at /etc/map/https/www.domain.com.80
- B. Ensure the Sling Mapping exist at /etc/map/http)mwp<.domain.com.443. Configure the Adobe Granite SSL Connector Factory with the correct SSL port
- C. Ensure the Sling Mapping exist at /etc/map/https/www.domain.com.443
- D. Configure Apache Felix Http Service SSL Filter to use the correct SSL forward header

**Answer: B,D**

Explanation:

"the Sling Mapping should match the protocol and port of the incoming request, which in this case is https and 443. The Apache Felix Http Service SSL Filter should be configured to use the X-Forwarded-Proto header to detect if the request is secure or not".

### NEW QUESTION # 18

A retail customer with an international presence and both in-store and online sales needs a new assets platform. The customer decides to use AEM assets. The customer's sites will continue to run on their proprietary CMS for websites.

The customer wants to be able to scale the platform for spikes in user traffic such as on local sales or online marketing campaigns.

Under some circumstances, the customer also has a higher load of editors for a certain period of time.

Which architecture should an Architect use for this business case?

- A. An AEM as a Cloud Service Assets setup using the combined CDN for delivery
- B. An AEM Publish instance on Adobe Managed Services with auto scaling
- C. An AEM as a Cloud Service Sites with Dynamic Media
- D. An AEM Assets setup on Adobe Managed Services with Cloud Manager

**Answer: A**

Explanation:

"using AEM as a Cloud Service Assets setup using the combined CDN for delivery can provide scalability, performance, and security for asset delivery".

### NEW QUESTION # 19

An AEM client requests that an Architect to establish non-functional KPIs. The Architect needs to avoid impacting user experience, asset processing, and download speed while doing this.

How should the Architect measure the performance properly to establish target metrics?

- **A. Use the OOTB Explain Query Tool**
- B. Tail the Access Log and look for long-running queries
- C. Use the Free Request Log Analyzer Command Line Tool
- D. Use JMeter for end-to-end tests

**Answer: A**

### NEW QUESTION # 20

An AEMaaCS customer wants to have a sub section in site to accept data from an end user, which may be text as well as documents. The site is expected to have high data input which would need moderation and masking before making it live for public access. Due to a legal content policy, the data collected through the site cannot be shared outside the organization. What would an architect recommend?

- A. Utilize AEM communities with MSRP topology
- B. Utilize Reverse Replication through publish servers
- C. Utilize backward Sling Content Distribution from publish server
- **D. Utilize data storage/APIs outside of AEMaaCS**

**Answer: D**

### NEW QUESTION # 21

.....
