Wenn die Fragenkataloge zur Salesforce Salesforce-MuleSoft-Developer-I Zertifizierungsprüfung irgend ein Qualitätsproblem haben oder Sie die Zertifizierungsprüfung nicht bestehen, erstatten wir alle Ihren bezahlten Summe zurück.

Salesforce Salesforce-MuleSoft-Developer-I Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Transforming Data with DataWeave: It involves writing DataWeave scripts and using DataWeave functions. This topic also includes defining and using DataWeave variables, functions, and modules, and applying correct syntax.
Thema 2	• Routing Events: It focuses on using the Choice router for conditional logic and the Scatter-Gather router to multicast events. This topic also involves validating data by using the Validation module.

Thema 3	• Building API Implementation Interfaces: This topic involves manually creating a RESTful interface for a Mule application and generating a REST Connector from a RAML specification. It also includes describing the features and benefits of APIKit.
Thema 4	• Handling Errors: Handling errors includes describing default error handling in Mule applications and defining custom global default error handlers. It involves comparing On Error Continue and On Error Propagate scopes, creating error handlers for a flow, using the Try scope, and mapping errors to custom application errors.
Thema 5	• Debugging and Troubleshooting Mule Applications: Using breakpoints to inspect a Mule event during runtime, installing missing Maven dependencies, and reading and deciphering Mule log error messages are sub-topics of this topic.
Thema 6	• Creating Application Networks: The topic of creating Application Networks encompasses understanding MuleSoft's proposal for closing the IT delivery gap and describing the role and characteristics of the modern API. It also includes the purpose and roles of a Center for Enablement (C4E), and the benefits of API-led.

Seit Neuem aktualisierte Salesforce-MuleSoft-Developer-I Examfragen für Salesforce Salesforce-MuleSoft-Developer-I Prüfung

Die Salesforce Salesforce-MuleSoft-Developer-I Zertifizierung ist eine der hochwertigsten Zertifizierungen zwischen vielfältigen Prüfungen. Dieses Jahrhundert ist die hohe Entwicklungszeit der IT-Industrie. Deshalb können Sie die knappe Kandidaten in der Arbeitswelt. Und wie können wir Salesforce Salesforce-MuleSoft-Developer-I Prüfungen bestehen? Sie sollen die Lernhilfe zur Salesforce Salesforce-MuleSoft-Developer-I Zertifizierung von ZertPruefung benötigen. Und es ist auch nötig, einen kürzen und leichten Weg zu finden. Und wir ZertPruefung sind für Sie vorhanden. Und Wenn Sie ZertPruefung auswählen, wählen Sie nämlich den Erfolg. Die Salesforce-MuleSoft-Developer-I Prüfungsfragen und Testantworten sind von ZertPruefung IT-Eliten gesammelt. Und unsere Produkte sind die neuesten und hochqualitativsten.

Salesforce Certified MuleSoft Developer (Mule-Dev-201) Salesforce-MuleSoft-Developer-I Prüfungsfragen mit Lösungen (Q94-Q99):

94. Frage

Refer to the exhibit.

What data is expected by the POST /accounts endpoint?

- A. ☐
- B. ☒
- C. ☐
- D. ☐

Antwort: B

95. Frage

What is the correct Syntax to add a customer ID as a URI parameter in the HTTP listener's path attribute?

- A. {customerID}
- B. #[customerID]
- C. \${customerID}
- D. (customerID)

Antwort: A

Begründung:

URL parameters are always accessed using { } like => {customerID}

96. Frage

ARAML specification is defined to manage customers with a unique identifier for each customer record.

What URI does MuleSoft recommend to uniquely access the customer identified with the unique ID 1234?

- A. /customers/custid=1234
- B. /customers?custid=true&custid=1234
- C. /customers?operation=get&custid=1234
- D. /customers/1234

Antwort: D

Begründung:

URI parameter (Path Param) is basically used to identify a specific resource or resources . For eg : the URL to get employee details on the basis of employeeID will be GET/employees/{employeeID} where employees is resource and {employeeID} is URI parameter. Hence option 1 is the correct answer

97. Frage

Refer to the exhibits.

□

A web client sends a POST request to the HTTP Listener with the payload "Hello-". What response is returned to the web client?
What response is returned to the web client?

- A. Helb-JMS1-HTTP-JMS2 -Three
- B. Hello- HTTP-] MS2-Three
- C. Hello-HTTP-Three
- D. HTTP-JMS2-Three

Antwort: B

98. Frage

Refer to the exhibits.

□

The two Mule configuration files belong to the same Mule project. Each HTTP Listener is configured with the same host string and the port number, path, and operation values are shown in the display names.

What is the minimum number of global elements that must be defined to support all these HTTP Listeners?

- A. 0
- B. 1
- C. 2
- D. 3

Antwort: A

Begründung:

In this case three configurations will be required each for port 8000, 6000 and 7000.

There would be three global elements defined for HTTP connections.

Each HTTP connection will have host and port. One example shown below with host as localhost and port 6000

□

To use an HTTP listener, you need to declare a configuration with a corresponding connection. This declaration establishes the HTTP server that will listen to requests.

Additionally, you can configure a base path that applies to all listeners using the configuration.

```
<http:listener-config name="HTTP_Listener_config" basePath="/api/v1">
```

```
<http:listener-connection host="0.0.0.0" port="8081" />
```

```
</http:listener-config>
```
