Free PDF Quiz Useful SC-401 - Administering Information Security in Microsoft 365 Passing Score Feedback

If you fail in the exam with our SC-401 quiz prep we will refund you in full at one time immediately. If only you provide the proof which include the exam proof and the scanning copy or the screenshot of the failure marks we will refund you immediately. If any problems or doubts about our SC-401 exam torrent exist, please contact our customer service personnel online or contact us by mails and we will reply you and solve your doubts immediately. Before you buy our product, you can download and try out it freely so you can have a good understanding of our SC-401 Quiz prep. Please feel safe to purchase our SC-401 exam torrent any time as you like. We provide the best service to the client and hope the client can be satisfied.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	• Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.

Topic 2	• Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 3	• Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.
Topic 4	• Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q126-Q131):

NEW QUESTION # 126
You have a Microsoft 365 E5 subscription.
You plan to use Microsoft Purview insider risk management.
You need to create an insider risk management policy that will detect data theft from Microsoft SharePoint Online by users that submitted their resignation or are near their employment termination date.
What should you do first?

- A. Onboard devices to Microsoft Defender for Endpoint.
- B. Configure Office indicators.
- C. Configure a Physical badging connector.
- D. Configure a HR data connector.

Answer: D

Explanation:
To detect data theft from SharePoint Online by departing employees, create an insider risk management policy in Microsoft Purview, select the "Data theft by departing users" template, and add indicators for high-volume downloads or suspicious file activity from SharePoint. Configure the policy to trigger alerts based on these activities and integrate with a HR data connector to identify users near their termination date.
To incorporate the HR Connector:
1. Set up the HR Connector:
Follow the steps to set up a connector in Purview, which involves creating an app registration in Entra ID, creating an app secret, and using a provided PowerShell script to import HR scenario data.
2. Import employee data:
This script imports data from your HR system into the insider risk management solution, including information about employees who have submitted their resignations or are nearing their termination date.

NEW QUESTION # 127
You have a Microsoft 365 subscription.
Users have devices that run Windows 11.
You plan to create a Microsoft Purview insider risk management policy that will detect when a user performs the following actions:
*Deletes files that contain a sensitive information type (SIT) from their device
*Copies files that contain a SIT to a USB drive
*Prints files that contain a SIT
You need to prepare the environment to support the policy.
What should you do?

- A. Configure the HR data connector.
- B. Create a Microsoft Purview communication compliance policy.
- C. Onboard the devices to Microsoft Purview.
- D. Configure the physical badging connector.

Answer: C

Explanation:
To ensure that Microsoft Purview Insider Risk Management can detect file deletions, USB copies, and print actions on sensitive information, you must onboard the Windows 11 devices to Microsoft Purview.
Device onboarding enables endpoint activity monitoring, allowing Purview to track and log user activities such as file deletions, USB transfers, and printing of sensitive files. Once onboarded, the Insider Risk Management policy can analyze these activities and generate risk alerts when sensitive information types (SITs) are involved.

NEW QUESTION # 128
You have a Microsoft 365 E5 subscription.
You plan to implement Microsoft Purview insider risk management.
You need to recommend policy templates that meet the following requirements:
* Contain risk indicators and scoring for when a user receives a poor performance review
* Contain risk indicators and scoring for when a user disables security features on a device.
Which template should you use for each requirement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation:

NEW QUESTION # 129
You have a Microsoft 365 tenant.
A new regulatory requirement states that all documents containing a patent ID be labeled, retained for 10 years, and then deleted.
The policy used to apply the retention settings must never be disabled or deleted by anyone.
You need to implement the regulatory requirement.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:
Explanation:

NEW QUESTION # 130
You need to provide a user with the ability to view data loss prevention (DlP) alerts in the Microsoft Purview portal. The solution must use the principle of least privilege.
Which role should you assign to the user?

- A. Security Reader
- B. Security Operator
- C. Compliance Data Administrator
- D. Compliance Administrator

Answer: D

NEW QUESTION # 131
......

Choosing our SC-401 real dumps as your study guide means you choose a smart and fast way to get succeed in the certification exam.
