

Valid GH-900 Exam Experience | GH-900 Exam Material

BONUS!!! Download part of VCEngine GH-900 dumps for free: https://drive.google.com/open?id=1eoAjxNx5072vbCTJJ0V3B_DWiRqhuCoJ

Buy Microsoft GH-900 preparation material from a trusted company such as VCEngine. This will ensure you get updated Microsoft GH-900 study material to cover everything before the big day. Practicing for an GitHub Foundations (GH-900) exam is one of the best ways to ensure success. It helps students become familiar with the format of the actual GH-900 Practice Test. It also helps to identify areas where more focus and attention are needed. Furthermore, it can help reduce the anxiety and stress associated with taking an GitHub Foundations (GH-900) exam as it allows students to gain confidence in their knowledge and skills.

Microsoft GH-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Introduction to Git and GitHub: This section of the exam measures skills of Junior Developers and Platform Support Specialists and covers the basic understanding of Git and GitHub. It explains what Git is and why it is used, the fundamental Git workflow, and concepts related to repositories including their local and remote distinctions. Candidates learn essential Git commands such as initializing and cloning repositories, adding and committing changes, pushing and pulling updates, and branching and merging. It also covers navigating GitHub by creating accounts, managing repositories, understanding its interface, and working with issues and pull requests.
Topic 2	<ul style="list-style-type: none">• Modern Development: This domain assesses abilities of DevOps Engineers and Continuous Integration Specialists in implementing modern development practices. It emphasizes understanding DevOps principles and leveraging GitHub Actions for automation and CI• CD pipeline implementation. Candidates also learn GitHub's tools and best practices for conducting and managing code reviews.
Topic 3	<ul style="list-style-type: none">• Project Management: This section is designed for Project Coordinators and Product Managers and focuses on using GitHub Projects for project management. Candidates learn to create and manage GitHub Projects, utilize project boards for organizing tasks, and integrate project workflows with issues and pull requests to maintain project visibility and progress.
Topic 4	<ul style="list-style-type: none">• Benefits of the GitHub Community: This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects.
Topic 5	<ul style="list-style-type: none">• Privacy, Security, and Administration: This domain measures skills of Security Administrators and Organization Managers in securing and administering GitHub environments. It covers ensuring repository security through branch protection rules, using security tools like Dependabot, managing access and permissions at repository and organization levels, creating and managing organizations, setting up organization-level security, and overseeing teams and members.

GH-900 Exam Material & New GH-900 Test Pass4sure

Maybe you will meet some difficult problems when you prepare for your GH-900 exam, you even want to give it up. That is why I suggest that you must try our study materials. Because GH-900 guide torrent can help you to solve all the problems encountered in the learning process, GH-900 Study Tool will provide you with very flexible learning time so that you can easily pass the exam. I believe that after you try our products, you will love it soon.

Microsoft GitHub Foundations Sample Questions (Q58-Q63):

NEW QUESTION # 58

Which of the following statements is true regarding the mergeability of draft pull requests?

- A. They cannot be merged, but code owners are automatically requested to review.
- B. They can be merged, but code owners are not automatically requested to review.
- C. They cannot be merged, and code owners are not automatically requested to review.
- D. They can be merged, and code owners are automatically requested to review.

Answer: C

NEW QUESTION # 59

Which of the following GitHub syntax formats is consistent with the associated text?

- A. This is bolded text
- B. 1. This is an ordered list
- C. * This is a heading
- D. This is a link
- E. <!-- This is a comment -->

Answer: E

Explanation:

GitHub supports various syntax formats that align with Markdown and HTML conventions. Here 's a breakdown of the provided options:

* Comment Syntax:

* Option C is correct. The syntax <!-- This is a comment --> is used in Markdown files to insert comments. These comments will not be rendered in the final output, making them useful for adding notes or instructions within the code or documentation.

* Incorrect Options:

* Option A (* This is a heading) is incorrect because an asterisk (*) denotes an unordered list item, not a heading. A heading in Markdown is typically created with one or more hash symbols (#).

* Option B (This is a link) is incorrect because this is plain text and not the syntax for creating a link. The correct syntax would be [This is a link](URL) .

* Option D (This is bolded text) is incorrect because this is plain text, not the correct Markdown syntax for bold text, which should be ****This is bolded text**** or __This is bolded text__ .

* Option E (1. This is an ordered list) is incorrect as it does represent an ordered list item, but it was not the syntax format asked about in the question. The question specifically focuses on matching associated text with syntax, where only the comment option is correct.

NEW QUESTION # 60

What folder is the definition files stored in when creating custom issue forms?

- A. .issues/ISSUE_TEMPLATE

- B. .GitHub
- C. .issues
- D. .github/ISSUE_TEMPLATE

Answer: D

Explanation:

When creating custom issue forms on GitHub, the definition files are stored in the .github/ISSUE_TEMPLATE folder. This directory is used to define issue templates and forms that help standardize the information collected when users open new issues in the repository. The .github folder is a special directory used for various repository configurations and workflows.

NEW QUESTION # 61

Which of the following describes a branch in Git?

- A. A new repository that shares code with the original "upstream" repository
- B. A physical copy of the entire project stored on disk
- C. A separate, isolated copy of the project's codebase
- D. A pointer to an identical snapshot of the project at a specific point in time

Answer: C

Explanation:

In Git, a branch is a fundamental concept that represents an independent line of development within a project.

Here 's a more detailed explanation:

* Branch in Git:

* Option C is correct because a branch in Git is essentially a separate, isolated copy of the project 's codebase where you can make changes without affecting the main codebase. Branches allow developers to work on features, fixes, or experiments in parallel to the main project.

* Other Options:

* Option A is incorrect because while a branch does point to a specific commit (which represents a snapshot of the project), the description lacks the emphasis on the isolated and parallel development aspect that is critical to the understanding of branches.

* Option B is incorrect because a branch is not a physical copy stored on disk; it is a logical reference within the repository.

* Option D is incorrect because that description better fits the concept of a fork, not a branch. A fork is a new repository that is a copy of another repository, usually used to contribute back to the original ("upstream") repository.
