

Databricks Databricks-Certified-Data-Engineer-Associate the latest exam questions and answers free download

BONUS!!! Download part of FreeCram Databricks-Certified-Data-Engineer-Associate dumps for free: <https://drive.google.com/open?id=1eE39Iu31UAzQJcm8I7HqnSH5qLlug6Ci>

The Databricks Databricks-Certified-Data-Engineer-Associate certification is one of the top-rated career advancement certifications in the market. This Databricks Certified Data Engineer Associate Exam (Databricks-Certified-Data-Engineer-Associate) certification exam has been inspiring candidates since its beginning. Over this long time period, thousands of Databricks-Certified-Data-Engineer-Associate exam candidates have passed their Databricks Certified Data Engineer Associate Exam (Databricks-Certified-Data-Engineer-Associate) certification exam and now they are doing jobs in the world's top brands. The FreeCram Databricks-Certified-Data-Engineer-Associate Dumps will provide you with everything that you need to learn, prepare and pass the challenging Network Security Specialist Databricks-Certified-Data-Engineer-Associate exam with flying colors. You must try FreeCram Databricks-Certified-Data-Engineer-Associate exam questions today.

Databricks Certified Data Engineer Associate certification demonstrates that you have the skills and knowledge required to build and manage big data processing systems using Databricks. Databricks Certified Data Engineer Associate Exam certification is ideal for data engineers, data architects, and developers who work with big data workloads. It validates your ability to design, build, and maintain scalable and reliable data processing pipelines using Databricks.

TOP FEATURES OF Databricks Databricks-Certified-Data-Engineer-Associate PDF QUESTIONS FILE AND PRACTICE TEST SOFTWARE

We have 24/7 Service Online Support services on our Databricks-Certified-Data-Engineer-Associate exam questions , and provide professional staff Remote Assistance. Besides, if you need an invoice of our Databricks-Certified-Data-Engineer-Associate practice materials please specify the invoice information and send us an email. Online customer service and mail Service is waiting for you all the time. And you can download the trial of our Databricks-Certified-Data-Engineer-Associate training engine for free before your purchase.

Databricks Certified Data Engineer Associate Exam Sample Questions (Q45-Q50):

NEW QUESTION # 45

A data engineer wants to create a relational object by pulling data from two tables. The relational object does not need to be used by other data engineers in other sessions. In order to save on storage costs, the data engineer wants to avoid copying and storing physical data.

Which of the following relational objects should the data engineer create?

- A. Delta Table
- B. Database
- C. Temporary view
- D. View
- E. Spark SQL Table

Answer: C

Explanation:

A temporary view is a relational object that is defined in the metastore and points to an existing DataFrame. It does not copy or store any physical data, but only saves the query that defines the view. The lifetime of a temporary view is tied to the SparkSession that was used to create it, so it does not persist across different sessions or applications. A temporary view is useful for accessing the same data multiple times within the same notebook or session, without incurring additional storage costs. The other options are either materialized (A, E), persistent (B, C), or not relational objects. References: Databricks Documentation - Temporary View, Databricks Community - How do temp views actually work?, Databricks Community - What's the difference between a Global view and a Temp view?, Big Data Programmers - Temporary View in Databricks.

NEW QUESTION # 46

A data engineer is writing a DataFrame to a Delta table and wants to physically divide the data into directories based on a specific column such as country. Which Spark DataFrame writer option should be used?

- A. partitionBy
- B. orderBy
- C. groupBy
- D. distributeBy

Answer: A

NEW QUESTION # 47

Which of the following statements regarding the relationship between Silver tables and Bronze tables is always true?

- A. Silver tables contain more data than Bronze tables.
- B. Silver tables contain aggregates while Bronze data is unaggregated.
- C. Silver tables contain a less refined, less clean view of data than Bronze data.
- D. Silver tables contain a more refined and cleaner view of data than Bronze tables.
- E. Silver tables contain less data than Bronze tables.

Answer: D

NEW QUESTION # 48

Which of the following is a benefit of the Databricks Lakehouse Platform embracing open source technologies?

- A. Ability to scale storage
- B. Simplified governance
- C. Avoiding vendor lock-in
- D. Ability to scale workloads
- E. Cloud-specific integrations

Answer: C

NEW QUESTION # 49

A Delta Live Table pipeline includes two datasets defined using STREAMING LIVE TABLE. Three datasets are defined against

Delta Lake table sources using LIVE TABLE.

The table is configured to run in Production mode using the Continuous Pipeline Mode.

Assuming previously unprocessed data exists and all definitions are valid, what is the expected outcome after clicking Start to update the pipeline?

- A. All datasets will be updated once and the pipeline will shut down. The compute resources will be terminated.
- B. All datasets will be updated once and the pipeline will persist without any processing. The compute resources will persist but go unused.
- **C. All datasets will be updated at set intervals until the pipeline is shut down. The compute resources will be deployed for the update and terminated when the pipeline is stopped.**
- D. All datasets will be updated once and the pipeline will shut down. The compute resources will persist to allow for additional testing.
- E. All datasets will be updated at set intervals until the pipeline is shut down. The compute resources will persist to allow for additional testing.

Answer: C

Explanation:

Explanation

In a Delta Live Table pipeline running in Continuous Pipeline Mode, when you click Start to update the pipeline, the following outcome is expected: All datasets defined using STREAMING LIVE TABLE and LIVE TABLE against Delta Lake table sources will be updated at set intervals. The compute resources will be deployed for the update process and will be active during the execution of the pipeline. The compute resources will be terminated when the pipeline is stopped or shut down. This mode allows for continuous and periodic updates to the datasets as new data arrives or changes in the underlying Delta Lake tables occur. The compute resources are provisioned and utilized during the update intervals to process the data and perform the necessary operations.

NEW QUESTION # 50

.....

The web-based Databricks-Certified-Data-Engineer-Associate practice test is accessible via any browser. This Databricks-Certified-Data-Engineer-Associate mock exam simulates the actual Databricks Databricks-Certified-Data-Engineer-Associate exam and does not require any software or plugins. Compatible with iOS, Mac, Android, and Windows operating systems, it provides all the features of the desktop-based Databricks-Certified-Data-Engineer-Associate Practice Exam software.
