## CompTIA Network+ Certification Exam Sample Questions (Q421-Q426):

### NEW QUESTION # 421

Before using a guest network, an administrator requires users to accept the terms of use. Which of the following is the best way to accomplish this goal?

- A. Autonomous access point
- B. WPA2 encryption
- C. Pre-shared key
- **D. Captive portal**

**Answer: D**

Explanation:

A captive portal is a web page that users must view and interact with before being granted access to a network. It is commonly used in guest networks to enforce terms of use agreements. When a user connects to the network, they are redirected to this portal where they must accept the terms of use before proceeding. This method ensures that users are aware of and agree to the network's policies, making it the best choice for this scenario.

### NEW QUESTION # 422

A company is hosting a secure web server that requires all connections to the server to be encrypted. A junior administrator needs to harden the web server. The following ports on the web server are open:

Which of the following ports should be disabled?

- A. 0
- B. 1
- **C. 2**
- D. 3

**Answer: C**

Explanation:

For a web server that requires all connections to be encrypted, port 80 (HTTP) should be disabled. Port 80 is used for unencrypted web traffic, whereas port 443 is used for HTTPS, which provides encrypted communication.

\* Port 80 (HTTP): This port is used for unsecured web traffic. Disabling this port ensures that all web traffic must use HTTPS, which encrypts the data in transit.

\* Port 443 (HTTPS): This port is used for secure web traffic via SSL/TLS encryption. Keeping this port open ensures that secure connections can be made to the web server.

\* Other Ports:

\* Port 22: Used for SSH, providing secure remote access and file transfers.

\* Port 587: Used for secure email submission (SMTP) with encryption.

Network References:

\* CompTIA Network+ N10-007 Official Certification Guide: Discusses the roles and security implications of various ports and protocols.

\* Cisco Networking Academy: Provides training on secure web server configuration and port management.

\* Network+ Certification All-in-One Exam Guide: Covers port security and best practices for securing web servers.

### NEW QUESTION # 423

Which of the following kinds of targeted attacks uses multiple computers or bots to request the same resource repeatedly?

- A. On-path
- B. MAC flooding
- **C. DDoS**
- D. ARP spoofing

**Answer: C**

Explanation:

A Distributed Denial of Service (DDoS) attack leverages multiple computers or bots (botnet) to flood a target system with requests, overwhelming its resources and making it unavailable to legitimate users. This is a common tactic used by attackers to disrupt services. The document explains:

"A DDoS (Distributed Denial of Service) attack involves multiple computers (often called bots) simultaneously sending requests to a single resource, overwhelming the system and causing a denial of service to legitimate users."

#### NEW QUESTION # 424

A network administrator configured a router interface as 10.0.0.95 255.255.255.240. The administrator discovers that the router is not routing packets to a web server with IP 10.0.0.81/28. Which of the following is the best explanation?

- A. The router interface is a broadcast address.
- B. The IP address space is a class A network.
- C. The subnet is in a private address space.
- D. The web server is in a different subnet.

**Answer: A**

Explanation:

\* Understanding Subnetting:

\* The subnet mask 255.255.255.240 (or /28) indicates that each subnet has 16 IP addresses (14 usable addresses, 1 network address, and 1 broadcast address).

\* Calculating the Subnet Range:

\* Subnet Calculation: For the IP address 10.0.0.95 with a /28 subnet mask:

\* Network address: 10.0.0.80

\* Usable IP range: 10.0.0.81 to 10.0.0.94

\* Broadcast address: 10.0.0.95

\* Router Interface Configuration:

\* Broadcast Address Issue: The IP address 10.0.0.95 is the broadcast address for the subnet 10.0.0.80/28. Configuring a router interface with the broadcast address will cause routing issues as it is not a valid host address.

\* Comparison with Other Options:

\* The web server is in a different subnet: The web server (10.0.0.81) is within the same subnet range (10.0.0.80/28).

\* The IP address space is a class A network: While 10.0.0.0 is a Class A network, this does not explain the routing issue caused by the broadcast address.

\* The subnet is in a private address space: The private address space designation (RFC 1918) does not impact the routing issue related to the broadcast address configuration.

\* Resolution:

\* Reconfigure the router interface with a valid host IP address within the usable range, such as 10.0.0.94.

#### NEW QUESTION # 425

Which of the following attacks would most likely cause duplicate IP addresses in a network?

- A. Rogue DHCP server
- B. DNS poisoning
- C. Social engineering
- D. Denial-of-service

**Answer: A**

Explanation:

Definition of a Rogue DHCP Server:

A rogue DHCP server is an unauthorized DHCP server on a network, which can assign IP addresses to devices without proper control, leading to IP address conflicts.

Impact of a Rogue DHCP Server:

IP Address Conflicts: Multiple devices may receive the same IP address from different DHCP servers, causing network connectivity issues.

Network Disruption: Devices may be assigned incorrect network configuration settings, disrupting network services and connectivity.

## NEW QUESTION # 426

.....

Different from other similar education platforms, the N10-009 quiz guide will allocate materials for multi-plate distribution, rather than random accumulation without classification. How users improve their learning efficiency is greatly influenced by the scientific and rational design and layout of the learning platform. The CompTIA Network+ Certification Exam prepare torrent is absorbed in the advantages of the traditional learning platform and realize their shortcomings, so as to develop the N10-009 test material more suitable for users of various cultural levels. If just only one or two plates, the user will inevitably be tired in the process of learning on the memory and visual fatigue, and the N10-009 test material provided many study parts of the plates is good enough to arouse the enthusiasm of the user, allow the user to keep attention of highly concentrated.
