질문 # 153

A company has locations in multiple regions. The company develops solutions based on Power Apps and Power Automate.

You need to recommend features to support the implementation.

Which Power Platform features should you recommend? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Features	Requirement	Feature
Environment	Ensure fastest response times for each company location.	Feature
Security group	Create test and production copies of the data and apps.	Feature
SharePoint library		

정답:

설명:

Features	Requirement	Feature
Environment	Ensure fastest response times for each company location.	Environment
Security group	Create test and production copies of the data and apps.	Security group
SharePoint library		

Explanation:

Requirement	Feature
Ensure fastest response times for each company location.	Environment
Create test and production copies of the data and apps.	Security group

질문 # 154

A user is creating their first canvas app in Power Apps.

The user does not know what types of controls they can include.

You need to recommend solutions for the user.

Which types of controls would you recommend using in Power Apps? To answer, select the appropriate control in the dialog box in the answer area.

NOTE: Each correct selection is worth one point.

Scenario	Control
View the date, time, and location of upcoming internal meetings.	Meeting-screen template Gallery List box
Create a meeting request from within the app.	Meeting-screen template Gallery List box
Drill down into customer contact records in Dynamics 365 Sales to view a photo of a customer you are meeting.	Image People-screen template Add picture

정답:

설명:

Scenario	Control
View the date, time, and location of upcoming internal meetings.	Meeting-screen template Gallery List box
Create a meeting request from within the app.	Meeting-screen template Gallery List box
Drill down into customer contact records in Dynamics 365 Sales to view a photo of a customer you are meeting.	Image People-screen template Add picture

Explanation:

Box 1: Gallery

A Gallery control can show multiple records from a data source, and each record can contain multiple types of data. For example, a Gallery control can show multiple contacts with each item showing contact information that includes a name, an address, and a phone number for each contact.

Box 2: Meeting-screen template

In a canvas app, add a meeting screen that lets users create and send meeting requests from their Office 365 Outlook accounts.

Users can search for attendees in their org and add external email addresses. If your tenant has meeting rooms built into Outlook, users can select a location as well.

Box 3: Image

If you add one or more Image controls to your app, you can show individual images that aren't part of a data set, or you can incorporate images from records in data sources.

Incorrect Answers:

List box: A list in which the user can select one or multiple items.

With the Add picture control in PowerApps users can take photos or upload image files from their device and update the data source with this content. On a mobile device the user is presented with the device's choice dialog to choose between taking a photo or selecting one already available.

질문 # 155

You are creating a model-driven Power Apps app. You want to ensure that the app can be used by individuals who have vision impairments.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
Power Apps apps can be built with hot key support and designed so they do not require a touch screen or mouse.	☐	☐
Only model-driven Power Apps have support for using a screen reader without the need for a connector.	☐	☐
The accessibility checker can be run for your Power Apps app to provide notifications of accessibility violations as well as tips for making it even more user friendly.	☐	☐

정답:

설명:

Statement	Yes	No
Power Apps apps can be built with hot key support and designed so they do not require a touch screen or mouse.	☒	☐
Only model-driven Power Apps have support for using a screen reader without the need for a connector.	☐	☒
The accessibility checker can be run for your Power Apps app to provide notifications of accessibility violations as well as tips for making it even more user friendly.	☒	☐
