

# NS0-528 Pdf Exam Dump - NS0-528 Latest Dumps Ebook

DOWNLOAD the newest TestPDF NS0-528 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1YD9EjbqJ7yYulCEh89Mzt8mIpjcTnfAl>

All praise and high values lead us to higher standard of NS0-528 practice engine. So our work ethic is strongly emphasized on your interests which profess high regard for interests of exam candidates. Our NS0-528 study materials capture the essence of professional knowledge and lead you to desirable results effortlessly. So let us continue with our reference to advantages of our NS0-528 learning questions.

## Network Appliance NS0-528 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>NetApp ONTAP Business Continuity Solutions: This section of the exam measures the skills of Disaster Recovery Specialists and covers advanced business continuity technologies. This includes the configuration and operation of SnapMirror active sync for continuous data replication and the execution of SVM-DR (Storage Virtual Machine Disaster Recovery) operations to ensure high availability.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>NetApp ONTAP Core Data Protection Features: This section of the exam measures the skills of Systems Administrators and validates core knowledge of data protection and redundancy within the ONTAP environment. It encompasses understanding how data efficiencies impact protection strategies and the practical knowledge required to deploy these data protection solutions effectively in a hybrid cloud infrastructure.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Data Protection Solutions: This section of the exam measures the skills of Storage Architects and covers the foundational principles of designing data protection solutions. It focuses on creating comprehensive design documentation, understanding the various components involved, and identifying all critical solution dependencies to ensure a robust and reliable data protection strategy.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>NetApp Data Protection Software: This section of the exam measures the skills of DevOps Engineers and focuses on the deployment and administration of NetApp's proprietary data protection software. A key part of this domain involves applying these solutions to protect modern containerized applications running in Kubernetes environments.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Troubleshooting and Testing: This section of the exam measures the skills of Support Engineers and focuses on the practical skills needed to maintain data integrity. It involves troubleshooting common data protection configuration issues, executing well-defined Disaster Recovery (DR) procedures, and performing data restore operations to recover from data loss.</li></ul>

# Network Appliance NS0-528 Latest Dumps Ebook - Latest Test NS0-528 Experience

As we all know, the preparation process for an exam is very laborious and time-consuming. We had to spare time to do other things to prepare for NS0-528 exam, which delayed a lot of important things. If you happen to be facing this problem, you should choose our NS0-528 real exam. With our study materials, only should you take about 20 - 30 hours to preparation can you attend the exam. The rest of the time you can do anything you want to do to, which can fully reduce your review pressure. Saving time and improving efficiency is the consistent purpose of our NS0-528 Learning Materials. With the help of it, your review process will no longer be full of pressure and anxiety.

## Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q236-Q241):

### NEW QUESTION # 236

Using ONTAP System Manager, you are asked to replicate all the volumes contained in a Storage VM to a remote ONTAP 9.7 system for quick disaster recovery.

Which two steps need to be completed to accomplish this task? (Choose two.)

- A. Create a cluster peering relationship.
- B. Create a SnapMirror relationship for each volume.
- C. Create an SVM peering relationship.
- D. Create an SVM-DR relationship.

**Answer: A,C**

### NEW QUESTION # 237

You have a network outage that affects client access to site A. You need to temporarily reverse the SnapMirror relationship of a volume to serve data from site B.

Which two steps must you perform first? (Choose two.)

- A. Delete the SnapMirror relationship.
- B. Break the SnapMirror relationship.
- C. Take the source volume offline.
- D. Abort the SnapMirror relationship.

**Answer: B,C**

### NEW QUESTION # 238

A user has a NAS volume backed up with NetApp Snapshot copies. They have a large important database file that has been locked by a ransomware attack. The rest of the files on the volume seem completely fine so they only need to be able to restore this specific database. They are currently unable to restore this file, because of a lack of free space in the volume.

In this scenario, which action would allow the client to restore the file to a known good condition?

- A. Expand the Aggregate, then perform a single file SnapRestore.
- B. Enable Autogrow on the volume, and perform a full SnapRestore.
- C. Create a FlexClone from a Snapshot copy, and manually copy the file back over the original.
- D. Expand the FlexVol, then perform a single file SnapRestore.

**Answer: D**

### NEW QUESTION # 239

An administrator is setting up SnapMirror SVM replication. One of the source data volumes uses cloud tiering with the snapshot-only tiering policy.

Which cloud tiering policy is supported on the destination volume?

- A. snapshot-only

- B. none
- C. all
- D. auto

**Answer: A**

### Explanation:

When using SnapMirror SVM replication, the cloud tiering policy on the destination volume must match the source if tiering is to be preserved. The only supported tiering policy in this context is snapshot-only, which moves cold Snapshot blocks to cloud tier. This ensures compatibility during replication.

## NEW QUESTION # 240

Which NetApp technology would you use to physically separate non-routable SnapMirror network traffic?

- A. IPspaces
- B. cluster peer encryption
- C. lfgroups
- D. broadcast domains

Answer: A

## NEW QUESTION # 241
