The Best ANS-C01 Latest Exam Book & Authoritative Latest ANS-C01 Exam Camp Ensure You a High Passing Rate

Although the ANS-C01 certificate is good, people who can successfully obtain each year are rare, and the difficulty of the ANS-C01 exam and the pressure of study usually make the students feel discouraged. However, for us, these will no longer be a problem. In the past few years, our team has ushered in hundreds of industry experts, experienced numerous challenges day and night, and finally formed complete learning products--ANS-C01 Exam Torrent, which is tailor-made for students who want to obtain the ANS-C01 certificate.

The ANS-C01 Certification Exam covers a wide range of topics, including AWS networking concepts, security, connectivity, and routing. It also includes advanced topics such as hybrid networking, Direct Connect, and VPNs. Candidates who pass the exam demonstrate their ability to design and deploy complex network solutions on AWS that meet the needs of their organizations.

Amazon AWS Certified Advanced Networking Specialty Exam Sample Questions (Q287-Q292):

NEW QUESTION # 287
A company deployed its production Amazon VPC using CIDR block 33.16.0.0/16. The company has nearly depleted its addresses and now needs to extend the VPC network.
What CIDR blocks meet the company's requirement to extend the VPC network with a secondary CIDR?
(Select TWO.)
Response:

- A. 192.168.1.0/24
- B. 100.70.0.0/17
- C. 33.17.0.0/16
- D. 10.0.0.0/8
- E. 172.16.0.0/16

Answer: B,C

NEW QUESTION # 288
A company's security guidelines state that all outbound traffic from a VPC to the company's on- premises data center must pass through a security appliance. The security appliance runs on an Amazon EC2 instance. A network engineer needs to improve the network performance between the on-premises data center and the security appliance.
Which actions should the network engineer take to meet these requirements? (Choose two.)

- A. Send outbound traffic through a transit gateway.
- B. Use an EC2 instance that supports enhanced networking.
- C. Attach multiple elastic network interfaces to the EC2 instance.
- D. Place the EC2 instance in a placement group within the VPC.
- E. Increase the EC2 instance size.

Answer: B,D

Explanation:
https://docs.aws.amazon.com/AWSEC2/latest/UserGuide/ec2-networking.html

NEW QUESTION # 289
Your AWS WorkSpaces users are unable to authenticate. What could be one reason for this?
Response:

- A. Your AD server is running Windows Server 2012 Core Edition.
- B. Your AD server is running Windows Server 2016
- C. Port 3389 is not open to your AD server.
- D. Port 389 is not open to your AD server.

Answer: D

NEW QUESTION # 290

Your company decides to use Amazon S3 to augment its on-premises data store. Instead of using the company's highly controlled, on-premises Internet gateway, a Direct Connect connection is ordered to provide high bandwidth, low latency access to S3.

Since the company does not own a publicly routable IPv4 address block, a request was made to AWS for an AWS-owned address for a Public Virtual Interface (VIF). The security team is calling this new connection a "backdoor", and you have been asked to clarify the risk to the company.

Which concern from the security team is valid and should be addressed?

Response:

- A. AWS advertises its aggregate routes to the Internet allowing anyone on the Internet to reach the router.
- B. EC2 instances in the same region with access to the Internet could directly reach the router.
- C. The S3 service could reach the router through a pre-configured VPC Endpoint.
- D. Direct Connect customers with a Public VIF in the same region could directly reach the router.

Answer: B

NEW QUESTION # 291

A company has configured an AWS Cloud WAN core network with edge locations in the us-east-1 Region and the us-west-1 Region. Each edge location has two segments: development and staging. The segments use the default core network policy.

The company has attached VPCs to the core network. A development VPC is attached to the development segment in us-east-1 and is configured to use the 10.0.0.0/16 CIDR block. A staging VPC is attached to the staging segment in us-west-1 and is configured to use the 10.5.0.0/16 CIDR block. The company has updated the route tables for both VPCs with a route that directs any traffic for 0.0.0.0/0 to the core network.

The company's network team needs to establish communication between the two VPCs by using the AWS Cloud WAN core network. The network team is not receiving a response during tests of communication between the VPCs. The network team has verified that security groups and network ACLs are not blocking the traffic.

What should the network team do to establish this communication?

- A. Set the isolate-attachments parameter to False for the development and staging segments.
- B. Update the segment filter to allow traffic on the development and staging segments.
- C. Update the core network policy to add a static route for each segment. Configure a route to direct the traffic for 10.0.0.0/16 to the development VPC attachment. Configure a route to direct the traffic for 10.5.0.0/16 to the staging VPC attachment.
- D. Update both VPC route tables to have a new static route. Configure a route on the development VPC to direct the traffic for 10.0.0.0/16 to the development VPC attachment. Configure a route on the staging VPC to direct the traffic for 10.5.0.0/16 to the staging VPC attachment.

Answer: C

NEW QUESTION # 292

......

It is acknowledged that there are numerous ANS-C01 learning questions for candidates for the exam, however, it is impossible for you to summarize all of the key points in so many materials by yourself. But since you have clicked into this website for ANS-C01 practice materials you need not to worry about that at all because our company is especially here for you to solve this problem. With our ANS-C01 Exam Questions, you will pass your exam just in one go for we are the most professional team in this career for over ten years.
