Fortinet FCP—FortiAuthenticator 6.5 Administrator Sample Questions (Q11-Q16):

NEW QUESTION # 11

Which statement about the guest portal policies is true?

- A. All conditions in the policy must match before a user is presented with the guest portal
- B. Guest portal policies apply only to authentication requests coming from unknown RADIUS clients
- C. Guest portal policies can be used only for BYODs
- D. Conditions in the policy apply only to guest wireless users

Answer: A

NEW QUESTION # 12

When revoking a certificate, which reason must be selected if you want the ability to reinstate it at a later time?

- A. Superseded
- B. Operation ceased
- C. Unspecified
- D. On Hold

Answer: D

NEW QUESTION # 13

Which FortiAuthenticator feature allows users to authenticate against different back-end databases when using a single RADIUS policy?

- A. LDAP services

- B. User Groups
- C. RADIUS attributes
- D. Realms

Answer: D

Explanation:

Realms in FortiAuthenticator allow mapping of authentication requests to different back-end databases within a single RADIUS policy, enabling user authentication across multiple directories or identity sources.

NEW QUESTION # 14

When configuring an active-passive HA deployment, what is the recommended data synchronization path?

- A. Dedicated fiber channel
- B. Dedicated point-to-point VPN connection
- C. Same VLAN
- D. Direct cable connection

Answer: D

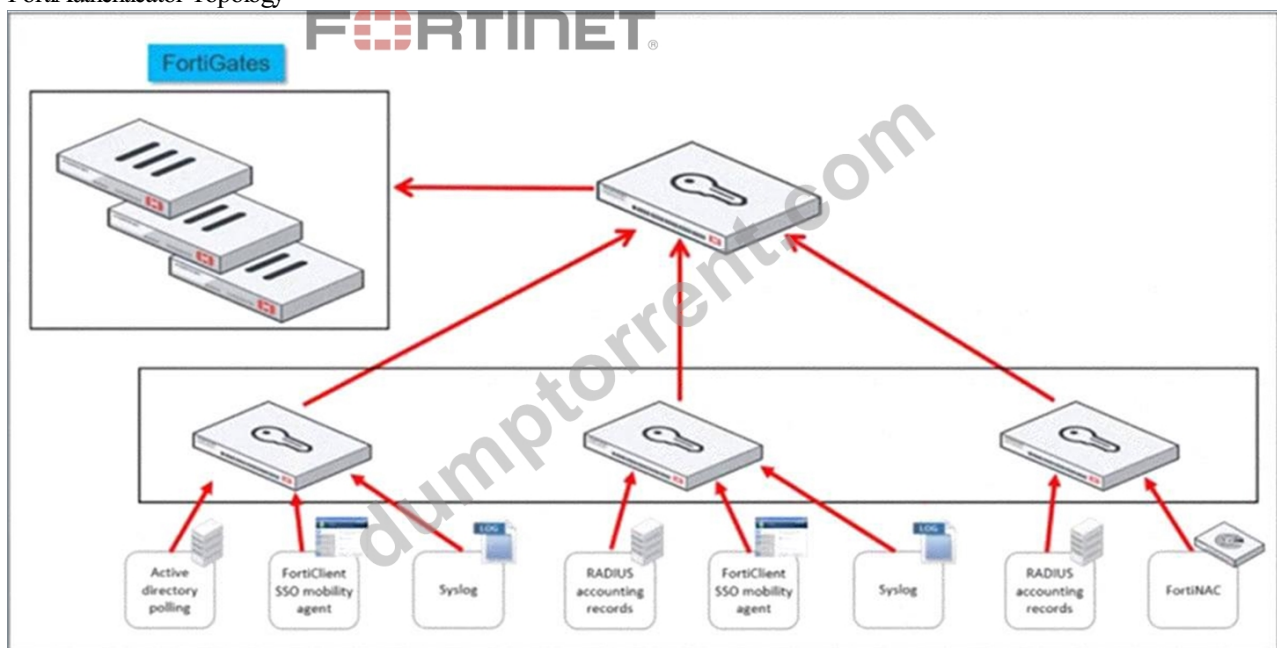

Explanation:

A direct cable connection is the recommended data synchronization path in an active-passive HA deployment because it provides the fastest, most reliable, and secure method for synchronizing data between FortiAuthenticator units without depending on external network infrastructure.

NEW QUESTION # 15

Refer to the exhibit.

FortiAuthenticator Topology

What type of FortiAuthenticator configuration is shown in this topology?

- A. Authentication load balancing nodes
- B. Active-active HA
- C. RADIUS proxy
- D. Tiered architecture

Answer: D

Explanation:

The diagram shows a tiered architecture where multiple FortiAuthenticator devices collect authentication data from various sources

and forward it to an upper-tier FortiAuthenticator, which consolidates and provides SSO information to FortiGate devices.
