To avail of all these benefits you need to pass the OGBA-101 exam which is a difficult exam that demands firm commitment and complete OGBA-101 exam questions preparation. For the well and quick OGBA-101 exam dumps preparation, you can get help from ExamcollectionPass OGBA-101 Questions which will provide you with everything that you need to learn, prepare and pass the TOGAF Business Architecture Foundation Exam certification exam.

The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q107-Q112):

NEW QUESTION # 107
Which of the following best describes the purpose of a Compliance Assessment?

- A. To provide a high-level view of the end architecture product.
- B. To show progression of change from the Baseline Architecture to the Target Architecture.
- C. To govern the architecture throughout its implementation process.
- D. To ensure that architecture information is communicated to the right stakeholders at the right time.

Answer: C

NEW QUESTION # 108
Which approach to model, measure, and analyze business value is primarily concerned with identifying the participants involved in creating and delivering value?

- A. Value chains
- B. Value streams
- C. Value networks
- D. Lean value streams

Answer: C

Explanation:
Value networks are an approach to model, measure, and analyze business value that is primarily concerned with identifying the participants involved in creating and delivering value3. Value networks focus on the relationships and interactions among the participants, such as customers, suppliers, partners, employees, and other stakeholders3. Value networks can help to understand how value flows through the network and how it can be improved or optimized.
Value networks emphasize the interconnectedness of various entities involved in creating and delivering value. This approach goes beyond the linear view of a value chain and recognizes the complex relationships and interactions between:
* Internal participants:Different departments, teams, and individuals within the organization.
* External participants:Suppliers, partners, customers, and other stakeholders outside the organization.
By identifying and analyzing these participants, value networks help to:

* Understand the ecosystem:Gain a holistic view of how value is created and delivered within a broader network of relationships.
* Identify key dependencies:Recognize how different participants rely on each other and how their actions affect the overall value creation process.
* Optimize collaboration:Improve coordination and collaboration between participants to enhance efficiency and value delivery.
* Identify potential risks and opportunities:Assess the impact of changes or disruptions within the network on value creation

NEW QUESTION # 109
Complete the sentence. A business model is a description of the rationale for how an organization creates, delivers, and captures

- A. value
- B. business function
- C. strategy
- D. best practices

Answer: A

Explanation:
A business model is a description of the rationale for how an organization creates, delivers, and captures value4. Value is defined as the worth or importance of something to someone6. A business model explains what value proposition the organization offers to its customers, what revenue streams it generates from delivering the value proposition, what cost structure it incurs to create and deliver the value proposition, what key resources and activities are needed to create and deliver the value proposition, and what key partnerships are leveraged to support the value creation and delivery process4.

NEW QUESTION # 110
What are the four architecture domains that the TOGAF standard deals with?

- A. Business, Data, Application, Technology
- B. Baseline, Candidate, Transition, Target
- C. Capability, Segment, Enterprise, Federated
- D. Application, Data, Information, Knowledge

Answer: A

Explanation:
TOGAF defines four core architecture domains: Business, Data, Application, and Technology. These domains collectively represent the key areas covered in enterprise architecture, where the Business Architecture defines business strategy and organizational goals; Data Architecture addresses data management and structure; Application Architecture focuses on system and software applications; and Technology Architecture outlines the IT infrastructure.
Reference:
TOGAF, as a comprehensive Enterprise Architecture framework, divides the architecture landscape into four interrelated domains:
Business Architecture: This domain focuses on the organization's strategic goals, business processes, and organizational structure. It defines how the business operates and creates value.
Data Architecture: This domain deals with the structure, organization, and management of data assets within the enterprise. It includes logical and physical data models, data storage, and data security.
Application Architecture: This domain describes the applications used to support the business, their interactions, and their alignment with business processes. It provides a blueprint for the application portfolio.
Technology Architecture: This domain covers the technology infrastructure that supports the applications and data. It includes hardware, software, networks, and IT services.
These four domains provide a holistic view of the enterprise and how its different components work together.

NEW QUESTION # 111
Complete the sentence. The architecture domains that are considered by the TOGAF standard as subsets of an overall enterprise architecture are Business, Technology,

- A. Capability and Segment
- B. Application and Data
- C. Information and Data

- D. Logical and Physical

Answer: B

Explanation:
In the TOGAF framework, the architecture domains considered as subsets of an overall enterprise architecture are Business, Technology, Application, and Data. Here's a detailed explanation:
TOGAF Architecture Domains:
Business Architecture: Describes the business strategy, governance, organization, and key business processes.
Data Architecture: Defines the structure of an organization's logical and physical data assets and data management resources.
Application Architecture: Provides a blueprint for the individual applications to be deployed, their interactions, and their relationships to the core business processes of the organization.
Technology Architecture: Describes the logical software and hardware capabilities that are required to support the deployment of business, data, and application services.
Importance of Each Domain:
Business Architecture: Aligns the architecture with the business strategy and goals.
Data Architecture: Ensures that data is structured and managed to support business processes and decisions.
Application Architecture: Ensures that applications are designed and integrated to support business processes.
Technology Architecture: Provides the technology infrastructure needed to support applications and data management.
TOGAF Reference:
Phase B: Business Architecture: Focuses on developing the Business Architecture.
Phase C: Information Systems Architectures: This phase includes both Data Architecture and Application Architecture.
Phase D: Technology Architecture: Focuses on developing the Technology Architecture.
In summary, the TOGAF standard considers Business, Technology, Application, and Data as the architecture domains that are subsets of an overall enterprise architecture.

NEW QUESTION # 112

......
