## C_ACDET_2506 Reliable Dumps Sheet | C_ACDET_2506 Practice Test Online

We provide a wide range of learning and preparation methodologies to the customers for the SAP C_ACDET_2506 complete training. After using the SAP C_ACDET_2506 exam materials, success would surely be the fate of customer because, self-evaluation, highlight of the mistakes, time management and sample question answers in comprehensive manner, are all the tools which are combined to provide best possible results. C_ACDET_2506 Exam Materials are also offering 100% money back guarantee to the customers in case they don't achieve passing scores in the C_ACDET_2506 exam in the first attempt.

## SAP C_ACDET_2506 Exam Syllabus Topics:

| Topic | Details |
|-------|---------|

| Topic 1 | • Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction. |
|---|---|
| Topic 2 | • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation. |
| Topic 3 | • Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices. |

# SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q41-Q46):

**NEW QUESTION # 41**
While working on a customer project, the customer asks if specific details can be captured and made available in reporting for a sourcing project or contract that doesn't fit the standard fields. What is the recommended way to handle this scenario?

- A. Suggest the customer put a Word document on the template and capture all information in that document.
- B. Create a dynamic form (dform) where common data can be synced with the project header through customization.
- C. Configure as many custom fields as possible for data capture purposes.
- D. Create a Microsoft Form from the Actions menu for managing all the requirements.

**Answer: C**

Explanation:
The recommended approach is to configure custom fields for capturing non-standard data in sourcing projects or contracts. Custom fields allow structured data capture directly within SAP Ariba, which can then be fully included in reporting and analytics. Documents like Word files (A) are unstructured and not reportable. Dynamic forms synced with project headers (B) are not supported as standard functionality. External tools like Microsoft Forms (C) do not integrate with SAP Ariba's reporting capabilities. Custom fields can include picklists, validation rules, translations, and help tips, enabling flexible, maintainable data collection aligned with reporting and compliance needs.

**NEW QUESTION # 42**
What is the key role of the SAP Deployment Lead assigned to the project?

- A. To perform configuration changes required to the SAP Ariba Strategic Sourcing suite solutions
- B. To act as the liaison between the customer and SAP Support in resolving technical issues and manage customer escalations
- C. To advise the customer and partner in solution configurations
- D. To test and validate the solution prior to go-live

**Answer: B**

Explanation:
The SAP Deployment Lead acts as the primary liaison between the customer and SAP Support, managing technical issues, escalations, and coordination during the deployment lifecycle. They oversee environment readiness, migration activities, and issue resolution. Advising on configurations is typically the Functional Lead's role, configuration changes are done by consultants, and testing is led by the customer or testing teams. The Deployment Lead focuses on technical project management and communication.

**NEW QUESTION # 43**

How do you format the Help Tip for a field?

- A. Select Field Configuration, select the class, and edit the field. In the Help Tip, you can format the text by selecting the string and use regular keyboard controls such as Ctrl-l, Ctrl-b
- B. Select Field Configuration, select the class, and edit the field. In the Help Tip, you can add standard HTML tags for formatting
- C. Select Field Configuration and edit the field. In the Help Tip, you can only use plain text without any formatting options.
- D. Select Field Configuration and edit the field. In the Help Tip, you can format the text by using the mouse to highlight the text and then right-clicking to access formatting options.

**Answer: B**

**NEW QUESTION # 44**

Which scenarios are applicable when moving templates from the test site to the production site by ICM? Note: There are 2 correct answers to this question.

- A. Published templates with flex master data references in the test site are migrated to the production site during the first migration attempt.
- B. Draft templates on the source site are skipped.
- C. Batch imports are available for templates when migrating configuration bundles.
- D. New templates that successfully migrated to the production site are in Draft state.

**Answer: B,C**

**NEW QUESTION # 45**

What system is provided by SAP free of charge and provides an outline of how to deploy SAP Ariba solutions with a task list and project management format?

- A. SAP Cloud Project Studio
- B. SAP Cloud Application Lifecycle Management
- C. SAP Ariba Enablement Workbook
- D. SAP for Me

**Answer: C**

Explanation:
TheSAP Ariba Enablement Workbookis an Excel-based project management tool provided free by SAP to assist customers and implementation partners in deploying SAP Ariba solutions. It contains detailed task lists, timelines, and activities aligned to the SAP Activate methodology and is designed to guide project teams through deployment steps such as data collection, configuration, and testing. Other options like SAP for Me are customer portals, not deployment tools, and SAP Cloud Application Lifecycle Management is a broader lifecycle tool not focused specifically on Ariba deployments.
