At QuestionsTube, you can read FCP\_FAZ\_AN-7.4 free demo questions in pdf file, so you can check the questions and answers before deciding to download the Fortinet FCP\_FAZ\_AN-7.4 practice questions. These free demo questions are parts of the FCP\_FAZ\_AN-7.4 exam questions. Download and read them carefully, you will find that the FCP\_FAZ\_AN-7.4 test questions of QuestionsTube will be your great learning materials online. Share some FCP\_FAZ\_AN-7.4 exam online questions below.

Most of the materials on the market do not have a free trial function. Even some of the physical books are sealed up and cannot be read before purchase. As a result, many students have bought materials that are not suitable for them and have wasted a lot of money. Especially for those students who are headaches when reading a book, FCP\_FAZ\_AN-7.4 study tool is their gospel. Because doing exercises will make it easier for one person to concentrate, and at the same time, in the process of conducting a mock examination to test yourself, seeing the improvement of yourself will makes you feel very fulfilled and have a stronger interest in learning. FCP\_FAZ\_AN-7.4 Guide Torrent makes your learning process not boring at all.

## Fortinet FCP\_FAZ\_AN-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Playbooks: This domain measures the skills of Fortinet Network Analysts in creating and managing playbooks. Candidates will explain playbook components and develop workflows that automate responses to security incidents, improving operational efficiency in SOC environments.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Logging: Candidates will learn about logging mechanisms, log analysis, and gathering log statistics to effectively monitor security events and incidents.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• SOC Events and Incident Management: This domain targets Fortinet Network Analysts and focuses on managing security operations center (SOC) events. Candidates will explain SOC features on FortiAnalyzer, manage events and incidents, and understand the incident lifecycle to enhance incident response capabilities.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Features and Concepts: This section of the exam measures the skills of Fortinet Security Analysts and covers the fundamental concepts of FortiAnalyzer.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Reports: This section evaluates the skills of Fortinet Security Analysts in managing reports within FortiAnalyzer. Candidates will learn to create, troubleshoot, and optimize reports to ensure accurate data presentation and insights for security analysis.</li> </ul>

## Original FCP\_FAZ\_AN-7.4 Questions - Valid FCP\_FAZ\_AN-7.4 Exam Forum

We can assist you with learning by simplified information by our FCP\_FAZ\_AN-7.4 learning guide. At the same time, our specialists will update FCP\_FAZ\_AN-7.4 learning materials daily and continue to improve the materials. Therefore, you can use our FCP\_FAZ\_AN-7.4 exam questions faster and more efficiently, which means that you can save a lot of time to do more meaningful and valuable things. When you are learning our FCP\_FAZ\_AN-7.4 Learning Materials, you can find confidence in the process of learning materials and feel happy in learning. After about 20-30 hours, you can get your Fortinet certificate.

### Fortinet FCP - FortiAnalyzer 7.4 Analyst Sample Questions (Q55-Q60):

#### NEW QUESTION # 55

When managing incidents on FortiAnalyzer, what must an analyst be aware of?

- A. The status of the incident is always linked to the status of the attach event.
- **B. You can manually attach generated reports to incidents.**
- C. Incidents must be acknowledged before they can be analyzed.
- D. Severity incidents rated with the level High have an initial service-level agreement (SLA) response time of 1 hour.

**Answer: B**

Explanation:

In FortiAnalyzer's incident management system, analysts have the option to manually manage incidents, which includes attaching relevant reports to an incident for further investigation and documentation. This feature allows analysts to consolidate information, such as detailed reports on suspicious activity, into an incident record, providing a comprehensive view for incident response.

Let's review the other options to clarify why they are incorrect:

Option A: You can manually attach generated reports to incidents

This is correct. FortiAnalyzer allows analysts to manually attach reports to incidents, which is beneficial for providing additional context, evidence, or analysis related to the incident. This functionality is part of the incident management process and helps streamline information for tracking and resolution.

Option B: The status of the incident is always linked to the status of the attached event This is incorrect. The status of an incident on FortiAnalyzer is managed independently of the status of any attached events. An incident can contain multiple events, each with different statuses, but the incident itself is tracked separately.

Option C: Severity incidents rated with the level High have an initial service-level agreement (SLA) response time of 1 hour This is incorrect. While incidents have severity levels, specific SLA response times are typically set according to the organization's incident response policy, and FortiAnalyzer does not impose a default SLA response time of 1 hour for high-severity incidents.

Option D: Incidents must be acknowledged before they can be analyzed

This is incorrect. Incidents on FortiAnalyzer can be analyzed even if they are not yet acknowledged. Acknowledging an incident is often part of the workflow to mark it as being actively addressed, but it is not a prerequisite for analysis.

#### NEW QUESTION # 56

What statements are true regarding disk log quota? (Choose two)

- A. The FortiAnalyzer stops logging once the disk log quota is met.
- B. The FortiAnalyzer disk log quota is configurable, but has a minimum 100mb a maximum based on the reserved system space.
- C. The FortiAnalyzer can overwrite the oldest logs or stop logging once the disk log quota is met.
- D. The FortiAnalyzer automatically sets the disk log quota based on the device.

**Answer: B,C**

#### NEW QUESTION # 57

You are tasked with finding logs corresponding to a suspected attack on your network.

You need to use an interface where all identified threats within timeframe are listed and organized. You also need to be able to quickly export the information to a PDF file.

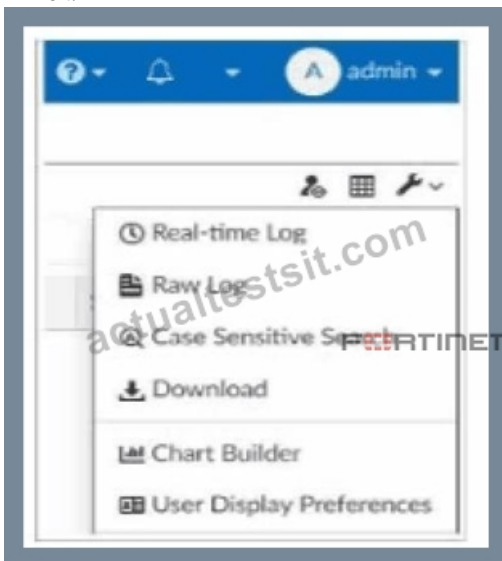

Where can you go to accomplish this task?

- A. FortiView
- B. Log Browse
- C. Log View
- D. Fabric View

**Answer: A**

#### NEW QUESTION # 58

Exhibit.

What is the purpose of using the Chart Builder feature On FortiAnalyzer?

- A. To build a chart automatically based on the top 100 log entries
- B. To build a dataset and chart based on the filtered search results
- C. To add charts directly to generate reports in the current ADOM.
- D. To add a new chart under FortiView to be used in new reports

**Answer: B**

#### NEW QUESTION # 59

Which statement about the FortiSOAR management extension is correct?

- A. It runs as a docker container on FortiAnalyzer.
- B. It requires a FortiManager configured to manage FortiGate.
- C. It does not include a limited trial by default.
- D. It requires a dedicated FortiSOAR device or VM.

**Answer: D**

Explanation:

The FortiSOAR management extension is designed as an independent security orchestration, automation, and response (SOAR) solution that integrates with other Fortinet products but requires its own dedicated device or virtual machine (VM) environment. FortiSOAR is not natively integrated as a container or service within FortiAnalyzer or FortiManager, and it operates separately to manage complex security workflows and incident responses across various platforms.

Let's examine each option to determine the correct answer:

Option A: It requires a FortiManager configured to manage FortiGate

This is incorrect. FortiSOAR operates independently of FortiManager. While FortiSOAR can receive input or data from FortiGate (often managed by FortiManager), it does not require FortiManager to be part of its setup.

Option B: It runs as a docker container on FortiAnalyzer

This is incorrect. FortiSOAR does not run as a container within FortiAnalyzer. It requires its own dedicated environment, either as a physical device or a virtual machine, due to the resource requirements and specialized functions it performs.

Option C: It requires a dedicated FortiSOAR device or VM

This is correct. FortiSOAR is deployed as a standalone device or VM, which enables it to handle the intensive processing needed for orchestrating security operations, integrating with third-party tools, and automating responses across an organization's security infrastructure.

Option D: It does not include a limited trial by default

This is incorrect. FortiSOAR installations may come with trial options or demos in specific scenarios, especially for evaluation purposes. This depends on licensing and deployment policies.

## NEW QUESTION # 60

.....

There are a number of distinctions of our FCP\_FAZ\_AN-7.4 Exam Questions that make it superior to those offered in the market. Firstly, you will find that there are three different versions of our FCP\_FAZ\_AN-7.4 learning guide: the PDF, Software and APP online. Though the content is the same, but the displays are all different. And you can study in all kind of conditions if you have three of them. Secondly, the prices of every version are favourable. And you can buy the Value Pack with discounted price.
