With proper preparation and training, candidates can successfully pass the exam and advance their careers in cybersecurity architecture.

Microsoft Cybersecurity Architect Sample Questions (Q231-Q236):

NEW QUESTION # 231

You have a Microsoft 365 subscription

You need to recommend a security solution to monitor the following activities:

- * User accounts that were potentially compromised
- * Users performing bulk file downloads from Microsoft SharePoint Online

What should you include in the recommendation for each activity? To answer, drag the appropriate components to the correct activities. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each Correct selection is worth one Point.

Answer:

Explanation:

NEW QUESTION # 232

You have a Microsoft 365 tenant that contains 5,000 users and 5,000 Windows 11 devices. All users are assigned Microsoft 365 £5 licenses and the Microsoft Defender Vulnerability Management add-on. The Windows 11 devices are managed by using Microsoft Intune and Microsoft Defender for Endpoint. The Windows 11 devices are configured during deployment to comply with Center for Internet Security (CIS) benchmarks for Windows 11.

You need to recommend a compliance solution for the Windows 11 devices. The solution must identify devices that were modified and no longer comply with the CIS benchmarks.

What should you include in the recommendation?

- A. security baselines assessments in Microsoft Defender Vulnerability Management
- B. attack surface reduction (ASR) rules in Defender for Endpoint
- C. Microsoft Secure Score for Devices in Defender for Endpoint
- D. Authenticated scan for Windows in Microsoft Defender Vulnerability Management

Answer: A

NEW QUESTION # 233

You have an Azure subscription.

You have a DNS domain named contoso.com that is hosted by a third-party DNS registrar.

Developers use Azure DevOps to deploy web apps to App Service Environments. When a new app is deployed, a CNAME record for the app is registered in contoso.com.

You need to recommend a solution to secure the DNS record for each web app. The solution must meet the following requirements:

- * Ensure that when an app is deleted, the CNAME record for the app is removed also
- * Minimize administrative effort.

What should you include in the recommendation?

- **A. Microsoft Defender for Cloud Apps**
- B. Microsoft Defender for DNS
- C. Microsoft Defender for App Service
- D. Microsoft Defender for DevOps

Answer: A

NEW QUESTION # 234

You have a customer that has a Microsoft 365 subscription and an Azure subscription.

The customer has devices that run either Windows, iOS, Android, or macOS. The Windows devices are deployed on-premises and in Azure.

You need to design a security solution to assess whether all the devices meet the customer's compliance rules.

What should you include in the solution?

- A. Microsoft Sentinel
- B. Microsoft Information Protection
- **C. Microsoft Endpoint Manager**
- D. Microsoft Defender for Endpoint

Answer: C

Explanation:

<https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-monitor#open-the-compliance-dashboard>

NEW QUESTION # 235

Your company has an on-premises network and an Azure subscription.

The company does NOT have a Site-to-Site VPN or an ExpressRoute connection to Azure.

You are designing the security standards for Azure App Service web apps. The web apps will access Microsoft SQL Server databases on the network.

You need to recommend security standards that will allow the web apps to access the databases. The solution must minimize the number of open internet-accessible endpoints to the on-premises network.

What should you include in the recommendation?

- **A. virtual network NAT gateway integration**
- B. hybrid connections
- C. a private endpoint
- D. virtual network integration

Answer: A
