

# TOGAF Enterprise Architecture Part 1 Exam practice dumps & OGEA-101 exam dumps

BONUS!!! Download part of BraindumpsPass OGEA-101 dumps for free: <https://drive.google.com/open?id=1paPF1wzKKAj11efCMvcxXvfVVlbcWubI>

In order to serve you better, we have do what we can do for you. Before buying OGEA-101 exam torrent, we offer you free demo for you to have a try, so that you can have a deeper understanding of what you are going to buy. If you want the OGEA-101 exam materials after trying, you just need to add them to cart and pay for them, then you can get downloading link and password within ten minutes, if you don't receive the OGEA-101 Exam Torrent, just contact us, and we will solve the problem for you. We have after-service stuff, and you can ask any questions about OGEA-101 exam dumps after buying.

## The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Implementation Governance: This topic of The Open Group OGEA-101 exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Architecture Governance: This topic of The Open Group OGEA-101 exam covers the governance framework and responsibilities of architecture boards. It evaluates the skills of TOGAF practitioners in establishing governance structures.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Architecture Vision: Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 exam and implementing enterprise architecture.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Introduction to the Architecture Development Method (ADM): The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 Exam.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Fundamental Concepts of Enterprise Architecture: This topic covers the definition, purpose, and benefits of enterprise architecture, emphasizing its role in aligning business objectives with IT strategies. It measures the understanding of TOGAF practitioners about foundational principles essential for effective enterprise architecture practice, crucial for passing the OGEA-101 exam.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Information Systems Architecture: Focusing on data and application architectures, this topic of the OGEA-101 exam assesses ability of TOGAF practitioners to define and manage information systems. It measures their skills in identifying data entities and application components.</li> </ul>

## Exams OGEA-101 Torrent - Clearer OGEA-101 Explanation

Career competitive is similar with playing tennis, if you want to defeat your opponents every time, you will improve yourself continuously. You can choose The Open Group OGEA-101 valid test dumps materials to help you clear exams. You will get an outstanding advantage over others while applying a same position. You will get better benefits and salary. Our OGEA-101 Valid Test Dumps materials will be the best preparation tool for every candidate.

### The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q129-Q134):

#### NEW QUESTION # 129

Consider the image showing basic architectural concepts.  
What are items A and B?

- A. A-Architecture Viewpoint, B-Architecture View
- B. A-Requirement. B-Candidate Architecture
- C. A-Architecture Board, B-Architecture Capability
- D. A-Candidate Architecture, B-Trade-off

**Answer: A**

Explanation:

\* The image shows a diagram that illustrates the basic concepts of architecture description as defined by the ISO/IEC/IEEE 42010:2011 standard<sup>1</sup>, which is also adopted by the TOGAF standard<sup>2</sup>.

\* According to the ISO/IEC/IEEE 42010:2011 standard, an architecture description is a work product used to express an architecture, and it consists of one or more architecture views<sup>1</sup>.

\* An architecture view is a representation of a system from the perspective of a related set of concerns, and it conforms to an architecture viewpoint<sup>1</sup>.

\* An architecture viewpoint is a specification of the conventions for constructing and using an architecture view to address specific stakeholder concerns<sup>1</sup>.

\* Therefore, the correct answer is option A, which identifies the items labeled as "A" and "B" in the image as an architecture viewpoint and an architecture view, respectively. Reference:

\* 1: ISO/IEC/IEEE 42010:2011 - Systems and software engineering - Architecture description<sup>1</sup>

\* 2: TOGAF Standard, Version 9.2 - Part IV: Architecture Content Framework - 31. Architectural Artifacts<sup>2</sup>

#### NEW QUESTION # 130

What can architects present to stakeholders to extract hidden agendas, principles, and requirements that could impact the final Target Architecture?

- A. Business Scenarios and Business Models
- B. Solutions and Applications
- C. Architecture Views and Architecture Viewpoints
- D. Alternatives and Trade-offs

**Answer: C**

Explanation:

\* According to the TOGAF Standard, Version 9.2, an architecture view is a representation of a system from the perspective of a related set of concerns<sup>1</sup>. It consists of one or more architecture models that demonstrate how the system addresses the stakeholder concerns<sup>1</sup>.

\* An architecture viewpoint is a specification of the conventions for constructing and using an architecture view to address specific stakeholder concerns<sup>1</sup>. It defines the perspective, scope, notation, and techniques for creating an architecture view of a system<sup>1</sup>.

\* Architects can present architecture views and viewpoints to stakeholders to extract hidden agendas, principles, and requirements that could impact the final Target Architecture, because<sup>23</sup>:

\* Architecture views and viewpoints help to communicate and visualize the architecture in a way that is meaningful and relevant to different stakeholders, addressing their specific interests and needs.

- \* Architecture views and viewpoints help to elicit and validate the stakeholder concerns and requirements, ensuring that they are aligned with the business goals and objectives, and that they are consistent and feasible within the architecture context.
- \* Architecture views and viewpoints help to identify and resolve any conflicts, gaps, or trade-offs among the stakeholder concerns and requirements, ensuring that they are balanced and prioritized in the architecture design and decision-making.
- \* Architecture views and viewpoints help to demonstrate and verify the value and benefits of the architecture to the stakeholders, ensuring that they are satisfied and committed to the architecture outcome and governance.

### NEW QUESTION # 131

Complete the sentence. The architecture domains that are considered by the TOGAF standard as subsets of an overall enterprise architecture are Business, Technology,

- A. Application and Data
- B. Information and Data
- C. Logical and Physical
- D. Capability and Segment

**Answer: A**

Explanation:

These domains provide a consistent way to describe and understand the architecture from different perspectives, such as business, information, and technology<sup>1</sup>. Each domain has its own set of concepts, models, views, and artifacts that define the structure and behavior of the architecture within that domain<sup>2</sup>.

The other options are incorrect because:

\*Logical and Physical are not architecture domains, but rather levels of abstraction that can be applied to any domain. Logical architecture describes the functionality and behavior of the system, while physical architecture describes the implementation and deployment of the system<sup>3</sup>.

\*Information and Data are not distinct architecture domains, but rather aspects of the same domain.

Information architecture describes the meaning and context of the data, while data architecture describes the structure and format of the data<sup>4</sup>.

\*Capability and Segment are not architecture domains, but rather levels of granularity that can be applied to any domain. Capability architecture describes the current and desired states of a specific business capability, while segment architecture describes a subdivision of the enterprise that has a clear business focus<sup>5</sup>.

### NEW QUESTION # 132

Refer to the table below:

□ Which ADM Phase does this describe?

- A. Phase C
- B. Phase B
- C. Phase A
- D. Preliminary Phase

**Answer: B**

Explanation:

Phase B of the ADM cycle is the Business Architecture phase. It describes the development of a Business Architecture to support an agreed Architecture Vision. The objectives of this phase are to describe the baseline and target Business Architecture, identify candidate Architecture Roadmap components based on gaps between the baseline and target, and determine whether an incremental approach is required. Reference: The TOGAF Standard | The Open Group Website, Section 3.2.2 Phase B: Business Architecture.

### NEW QUESTION # 133

Which phase of the ADM has the purpose to develop an Enterprise Architecture Capability?

- A. Preliminary Phase
- B. Phase A
- C. Phase B
- D. Phase G
