NEW QUESTION # 176

Cloud Kicks has a Process Builder which should trigger upon a status change from on approval process. The Process Builder triggers if the status is updated manually, but not as a result of the approval process update.

What could the administrator do to troubleshoot the issue?

- A. Turn Recursion the Process Builder under the Advanced Settings so the Process Builder fires again.
- B. Check the Reevaluate Workflow Rules After Field Change box on the Approval Process Field Update Action.
- C. Change the value with a Specific New Field Value so the Process Builder knows what value to look for.
- D. Check the Approval Process to make sure it is on the correct version.

Answer: B

Explanation:

Check the Reevaluate Workflow Rules After Field Change box on the Approval Process Field Update Action is what the administrator should do to troubleshoot the issue. This option allows the approval process field update to trigger any workflow rules or processes that are based on the updated field value. If this option is not checked, the approval process field update will not trigger any workflow rules or processes, and the Process Builder will not fire
