This PECB Certified EMS ISO 14001 Lead Auditor Exam (ISO-14001-Lead-Auditor) exam dumps have been inspiring beginners and experienced professionals since its beginning. There are several personal and professional benefits that you can gain after passing the PECB ISO-14001-Lead-Auditor Exam. The validation of expertise, more career opportunities, salary enhancement, instant promotion, and membership of PECB certified professional community.

PECB ISO-14001-Lead-Auditor Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Closing an ISO 14001 audit: This domain focuses on the responsibilities of audit consultants during the audit closure process. It includes evaluating findings, preparing audit conclusions, holding closing meetings, and ensuring proper reporting and communication of results.
Topic 2	<ul style="list-style-type: none">Managing an ISO 14001 audit program: This section of the exam evaluates the ability of EMS auditors to manage a complete audit program. It includes planning, implementing, monitoring, and continually improving the audit program to align with organizational and compliance goals.

Topic 3	<ul style="list-style-type: none"> • Fundamental audit concepts and principles: This section of the exam assesses the grasp EMS auditors have on core audit principles such as integrity, fair presentation, due professional care, and evidence-based evaluation. It ensures auditors can apply these principles consistently in the audit process.
Topic 4	<ul style="list-style-type: none"> • Fundamental principles and concepts of an environmental management system: This section of the exam measures the foundational knowledge of EMS auditors and covers key principles such as environmental sustainability, continual improvement, and the process approach. It assesses understanding of how environmental management systems contribute to overall business performance and regulatory compliance.

To know well your level of ISO-14001-Lead-Auditor Exam Preparation, we offer you the online test engine version which is an exam simulation to help you in knowing your weak point in ISO-14001-Lead-Auditor practice test and therefore provide an opportunity to fulfill your deficiencies prior to PECB real exam. Once there are latest versions released, we will send it to your email immediately.

PECB Certified EMS ISO 14001 Lead Auditor Exam Sample Questions (Q27-Q32):

NEW QUESTION # 27

Showitoff is an organisation specialising in the design and production of wall decorating materials for the domestic market. During an ISO 14001 certification audit of the site, the auditor comes across an open, walled area just outside the maintenance department. It contains various scraps of wood and metal as well as several rusty components. They are lying on an oily floor. When asked about it, the EMS Manager states that he presumes that the materials come from maintenance work.

The auditor interviews the Maintenance Manager in his department. He notes that shelves containing various spares are well labelled and neatly stacked. He asked about the "dump" outside and is told that it contains some excess materials that the Manager likes to keep in case they come in handy at some stage. The auditor points out that the "dump" might be classed under regulations as a landfill site, which requires an operating licence. The Maintenance Manager is not aware of such a licence.

The auditor decides to review the process for evaluation of compliance with environmental regulations in more depth. Select three options that provide a meaningful audit trail for this process.

- A. Are operators trained in the identification of legal requirements?
- B. How is the cost of unused or excess materials calculated?
- C. How is the handling of waste materials monitored?
- D. What are the qualifications of the EMS and Maintenance Managers?
- E. Is a regulatory expert employed on the internal audit programme?
- F. How is the material content of scrap items verified?
- G. How are maintenance staff made aware of regulatory requirements?
- H. What environmental aspects have been identified as being associated with regulations?

Answer: C,G,H

NEW QUESTION # 28

An oil organisation has a natural gas treatment plant on land crossed by several small rivers. On one particular day, after heavy rainfall for 48 hours, some of those rivers burst their banks and flooded the water treatment facilities of the plant. The oil-contaminated water reached some scarcely populated areas nearby.

Soon after, an internal audit was carried out to particularly analyse this event that was considered a nonconformity. There were no records of such heavy rainfall in the past 200 years.

Which three of the following actions are 'corrections'?

- A. Reinforce the riverbanks with cement
- B. Offer loans to the persons affected to build new houses far from the plant

- C. Relocate the water treatment plant to lower ground
- **D. Clean up the affected land**
- **E. Send the contaminated land for processing**
- **F. Clean up the houses of the persons affected**
- G. Revise the existing emergency plan
- H. Build up some additional protection to the water treatment plant

Answer: D,E,F

NEW QUESTION # 29

An organisation has ISO 14001 EMS certification from a third-party certification body. Which one of the following represents an advantage of having accredited certification?

- A. An increase in the number of clients.
- **B. Recognition of the credibility of the certification process.**
- C. An increase in the marketing price of the organisation's products.
- D. Clarity of the audit report.

Answer: B

Explanation:

Accredited certification under ISO 14001 refers to certification that has been issued by a certification body that is itself accredited by a national accreditation body. This provides formal recognition that the certification body is competent to perform audits and issue certifications in accordance with ISO/IEC 17021 standards.

According to guidance in ISO 14001 Lead Auditor training materials and ISO/IEC 17021, one of the key benefits of accredited certification is:

"Recognition of the credibility, impartiality, and technical competence of the certification process and the certification body issuing the certificate." This recognition:

Increases stakeholder confidence (e.g., regulators, clients, the public), Supports market access and tender qualifications, Confirms that audits are performed in accordance with international best practices.

Option D correctly reflects the most strategic and system-level benefit of accredited certification.

The other options (A, B, and C) may result indirectly or are not directly linked to the purpose of accreditation.

ISO/IEC 17021:2015 - Requirements for bodies providing audit and certification of management systems ISO 14001 Lead Auditor Course Guide - Module on Certification and Accreditation ISO 14001:2015 - Clause 3.1.1 & 3.1.2 (definition of EMS and system credibility)

NEW QUESTION # 30

A multi-level shopping centre is open every day to the public from 09:00-21:00 hours. During an external audit of the centre to ISO 14001, you establish that there are 40 vending machines that are permanently switched on. Thirty of them do not sell perishable foodstuffs. You also note that there are eight escalators in the complex that run constantly during public access. When asked about environmental performance improvement objectives, the Centre Manager says that there are plans to increase the natural daylight by installing more skylights thus saving on lighting costs, but the estimated budget for this has not yet been approved by the board.

You: I note that energy consumption is a significant environmental aspect in the centre. How do you mitigate the impacts of this?

EMS Manager: We try to reduce our energy costs by negotiating a better deal from the energy company. We are considering changing to one that only supplies electricity from renewable sources.

You: What steps have you taken to reduce overall consumption?

EMS Manager: We conducted awareness training for staff. For example, turning off lights in staff areas not being used.

You: I see that the escalators account for the highest usage of energy. Are there any objectives to try and reduce this?

EMS Manager: No, it would be too costly to change them.

You: How do you measure electricity consumption?

EMS Manager: We have meters installed in each floor of the centre. We take readings every hour and we plot the consumption graph for every staff shift.

You continue the interview and find that energy consumption has increased steadily over the past five years.

Select the two statements that are true.

- A. The escalators are switched on permanently.
- B. The Centre Manager is trained in energy awareness.
- **C. The organisation should take action to address its energy consumption.**

- D. The organisation's energy supplier sources renewable energy.
- E. The vending machines are switched on permanently.
- F. The centre staff are responsible for energy consumption in the staff areas.

Answer: C,E

NEW QUESTION # 31

An audit team leader arrives at a steel fabrication organisation that manufactures fire escape stairs to carry out a Stage 2 certification audit. At a meeting with the EMS Manager, she is told that they have won their biggest contract from a construction organisation to manufacture and install fire escape stairs. They appointed a subcontractor to perform the installation work. The EMS Manager wants the ISO 14001 audit extended to cover the installation site.

Select which one of the options is the correct response by the auditor.

- A. We have used all our allocated time in preparation for this audit so how can we extend the audit scope?
- B. Do you realise that this involves an extension to the scope of the audit and will require an application process?
- C. Can you arrange to bring the installation team here so that we can include this in the audit?
- D. Would you write to my audit programme manager with this request?

Answer: B

Explanation:

According to ISO/IEC 17021-1:2015 Clause 9.3.1 and ISO 19011:2018 Clause 5.4.1:

Any change in scope requires formal review and approval through certification body's application process.

The auditor cannot unilaterally extend the scope during the audit.

The correct course of action is to inform the auditee that scope changes require an application process.

Reference: ISO/IEC 17021-1:2015 Clause 9.3.1; ISO 19011:2018 Clause 5.4.1.

NEW QUESTION # 32
