## PRINCE2-Agile-Foundation Valid Test Camp | Exam PRINCE2-Agile-Foundation Flashcards

Every PRINCE2 aspirant wants to pass the PRINCE2 PRINCE2-Agile-Foundation exam to achieve high-paying jobs and promotions. The biggest issue PRINCE2 Agile Foundation (PRINCE2-Agile-Foundation) exam applicants face is that they don't find credible platforms to buy Real PRINCE2-Agile-Foundation Exam Dumps. When candidates don't locate actual PRINCE2 Agile Foundation (PRINCE2-Agile-Foundation) exam questions they prepare from outdated material and ultimately lose resources.

The PRINCE2 PRINCE2-Agile-Foundation Exam is a multiple-choice test that consists of 50 questions. The duration of the exam is one hour. In order to pass, candidates are expected to score a minimum of 55%. PRINCE2-Agile-Foundation exam covers the following areas: Agile concepts, behaviors and culture, roles and responsibilities, agile planning, monitoring and control, and agile product delivery. Candidates can take the exam online or in person at an accredited center.

## PRINCE2 Agile Foundation Sample Questions (Q161-Q166):

NEW QUESTION # 161

What is used to address aspects of project and product development such as problem solving and release planning?

- A. Delegation matrix
- **B. Agile workshops**
- C. Agilometer
- D. Project log

**Answer: B**

Explanation:

Agile workshops are collaborative sessions used throughout the project to address various aspects such as problem-solving, release planning, team alignment, and continuous improvement. Workshops encourage open communication, collective decision-making, and foster a shared understanding of goals and challenges.

Unlike a delegation matrix, which defines roles and authorities, or the project log, which records issues and risks, workshops are interactive events that enable timely resolution of challenges. The Agilometer is a diagnostic tool assessing agility maturity but not a problem-solving forum.

Agile workshops embody the agile principle of collaboration and adaptability, enabling teams to respond quickly to issues and refine plans collectively.

Reference: PRINCE2 Agile Foundation Version 2, Section 6.2 "Agile Workshops," and PRINCE2 Agile Study Guide, Chapter 6.

### NEW QUESTION # 162

What is typically displayed on a board to show progress to people working on a project?

- A. User story
- B. Agilometer assessment
- C. Product backlog
- **D. Information radiator**

**Answer: D**

### NEW QUESTION # 163

What should be included when transitioning from a project to business as usual to ensure continual improvement?

- **A. Establishing regular feedback loops**
- B. Defining Key Performance Indicators (KPIs)
- C. Agreeing applicable Service Level Agreements (SLAs)
- D. Providing access to Kanban or team boards

**Answer: A**

Explanation:

When transitioning from project delivery into business as usual (BAU), establishing regular feedback loops is crucial to ensure continual improvement. Feedback loops enable ongoing monitoring, learning, and adaptation of both products and processes post-transition. They provide mechanisms for capturing user experiences, operational issues, and evolving requirements that inform future iterations and enhancements.

Feedback loops can take many forms, such as user surveys, retrospectives, operational reviews, or service desk reports. Their regularity and structure ensure that BAU teams remain aligned with customer needs and organizational goals while adapting to changes effectively. This approach fosters a culture of continuous learning and agility even after the formal project has closed.

Providing access to Kanban or team boards (A) supports transparency and workflow management but is more tactical and internal to teams rather than a strategic approach to continuous improvement across BAU.

Agreeing on SLAs (C) and KPIs (D) define performance and service targets but do not inherently drive feedback or improvement cycles without mechanisms for learning and response.

PRINCE2 Agile highlights the importance of feedback loops as part of the 'progress' and 'quality' practices extended into BAU to sustain value delivery.

Reference: PRINCE2 Agile Foundation Version 2, Section 9.3 "Transition to BAU," and PRINCE2 Agile Study Guide, Chapter 9.

### NEW QUESTION # 164

Which statement explains the target 'be on time and hit deadlines' for flexible delivery?

- A. It enables team dynamics to remain the same
- B. It improves the supplier's reputation with the customer
- C. It reduces testing in order to meet deadlines
- D. It sets the project baseline at the correct level

**Answer: C**

#### NEW QUESTION # 165

Which organizational level is responsible for day-to-day management and decision making within the constraints established by the project manager?

- A. Managing
- B. Delivering
- C. Commissioning
- D. Directing

**Answer: B**

Explanation:

The Delivering level is responsible for the day-to-day management and decision-making within the constraints set by the project manager. Delivering teams carry out the actual work to create the project products and manage their activities under the project's governance framework. The Project Manager manages the overall project, while directing sets the strategic direction and commissioning authorizes initiation.

This separation ensures clear responsibilities and empowers the delivery teams to self-manage within defined boundaries.
