

# Exam F5CAB3 Prep | F5CAB3 Simulations Pdf

With over a decade's business experience, our F5CAB3 test torrent attached great importance to customers' purchasing rights all along. There is no need to worry about virus on buying electronic products. For we make endless efforts to assess and evaluate our F5CAB3 exam prep' reliability for a long time and put forward a guaranteed purchasing scheme, we have created an absolutely safe environment and our F5CAB3 Exam Question are free of virus attack. Given that there is any trouble with you, please do not hesitate to leave us a message or send us an email; we sincere hope that our F5CAB3 test torrent can live up to your expectation.

Real4exams F5 F5CAB3 exam training materials praised by the majority of candidates is not a recent thing. This shows Real4exams F5 F5CAB3 exam training materials can indeed help the candidates to pass the exam. Compared to other questions providers, Real4exams F5 F5CAB3 exam training materials have been far ahead. uestions broad consumer recognition and reputation, it has gained a public praise. If you want to participate in the F5 F5CAB3 Exam, quickly into Real4exams website, I believe you will get what you want. If you miss you will regret, if you want to become a professional IT expert, then quickly add it to cart.

## F5 F5CAB3 Simulations Pdf & F5CAB3 Exam Actual Questions

The PDF is also printable so you can conveniently have a hard copy of F5 F5CAB3 dumps with you on occasions when you have spare time for quick revision. The PDF is easily downloadable from our website and also has a free demo version available. Experts at Real4exams have also prepared F5 F5CAB3 Practice Exam software for your self-assessment.

## F5 BIG-IP Administration Data Plane Configuration Sample Questions (Q32-Q37):

### NEW QUESTION # 32

A BIG-IP Administrator adds new pool members into an existing, highly utilized pool. Soon after, there are reports that the application is failing to load for some users.

What pool-level setting should the BIG-IP Administrator check?

- A. Allow SNAT
- **B. Slow Ramp Time**
- C. Availability Requirement
- D. Action On Service Down

**Answer: B**

Explanation:

Slow Ramp Time prevents new pool members from receiving a full share of traffic immediately, allowing applications to warm up gradually.

### NEW QUESTION # 33

A Standard Virtual Server for a web application is configured with SNAT Automap. The original client IP must be known by backend servers.

What should the BIG-IP Administrator configure?

- A. HTTP Transparent profile
- **B. HTTP profile with X-Forwarded-For**
- C. SNAT pool using client IP
- D. Performance (HTTP) Virtual Server

**Answer: B**

Explanation:

X-Forwarded-For inserts the original client IP into HTTP headers while SNAT is enabled.

### NEW QUESTION # 34

All pool members are online and all other settings are default.

What might alter the load balancing behavior?

- **A. Adding a persistence profile**
- B. Enabling SNAT Automap
- C. Adding a OneConnect profile
- D. Enabling an HTTP fallback host

**Answer: A**

Explanation:

Persistence overrides load balancing decisions by maintaining client-to-server affinity.

### NEW QUESTION # 35

Refer to the exhibit.

Visit Us: Brave-Dumps.com

### General Properties

Name	VS-DNS
Partition / Path	Common
Description	
Type	Standard
Source Address	192.168.100.0/23
Destination Address/Mask	192.168.21.50
Service Port	53 Other:
Notify Status to Virtual Address	<input checked="" type="checkbox"/>
Link	None
Availability	<input checked="" type="checkbox"/> Unknown (Enabled) - The children pool member(s) eit
Synccookie Status	Off
State	Enabled

**Configuration:** Advanced

Protocol	TCP
Protocol Profile (Client)	tcp
Protocol Profile (Server)	(Use Client Profile)

DNS queries from two internal DNS servers are being load-balanced to external DNS servers via a virtual server on a BIG-IP device. The DNS queries originate from:

192.168.10.100

192.168.10.200

and target:

192.168.2.150

All DNS queries destined for the external DNS servers fail.

Which property change should the BIG-IP Administrator make in the Virtual Server to resolve this issue? (Choose one answer)

- A. Protocol to UDP
- B. Type to Performance (HTTP)
- C. Source Address to 192.168.10.0/24
- D. Protocol profile (Client) to DNS\_OPTIMIZED

**Answer: A**

**Explanation:**

DNS traffic is primarily transported using UDP port 53. In the exhibit, the Virtual Server is configured with the Protocol set to TCP, which prevents standard DNS queries from being processed correctly. BIG-IP Virtual Servers must be configured with the correct Layer 4 protocol to match the application traffic they are handling.

According to the BIG-IP Administration: Data Plane Configuration documentation:

The Protocol setting on a Virtual Server defines whether traffic is processed as TCP, UDP, or another supported transport protocol. Standard DNS queries and responses use UDP, while TCP is only required for DNS zone transfers (AXFR) or exceptionally large

responses.

When a DNS Virtual Server is incorrectly configured with TCP, UDP-based DNS queries are dropped, causing all requests to fail.

Why the other options are incorrect:

A . Protocol profile (Client) to DNS\_OPTIMIZED

A DNS profile enhances DNS functionality but does not correct an incorrect transport protocol configuration.

B . Type to Performance (HTTP)

Performance (HTTP) Virtual Servers are designed for HTTP traffic and are not suitable for DNS services.

C . Source Address to 192.168.10.0/24

The existing source IPs already fall within the allowed range, so this setting does not address the failure.

Correct Resolution:

Changing the Protocol to UDP aligns the Virtual Server with standard DNS transport requirements, allowing DNS queries to be successfully processed and load-balanced.

### NEW QUESTION # 36

A BIG-IP Administrator needs to configure health monitors for a pool containing HTTP, HTTPS, FTP, and SSH services. Which configuration ensures accurate member status?

- A. All monitors with Availability Requirement = all
- B. ICMP + TCP with all
- **C. All monitors with Availability Requirement = at least one**
- D. HTTP and HTTPS only

**Answer: C**

Explanation:

Using "at least one" ensures each member is marked up based on its relevant service monitor.

### NEW QUESTION # 37

.....

To help you learn with the newest content for the F5CAB3 preparation materials, our experts check the updates status every day, and their diligent work as well as professional attitude bring high quality for our F5CAB3 practice engine. You may doubtful if you are newbie for our F5CAB3training engine, free demos are provided for your reference. And every button is specially designed and once you click it, it will work fast. It is easy and confident to use our F5CAB3 study guide.
