We are quite confident that all these HP HPE0-J68 exam dumps feature you will not find anywhere. Just download the HP HPE0-J68 and start this journey right now. For the well and HP HPE0-J68 Exam Dumps preparation, you can get help from HP HPE0-J68 which will provide you with everything that you need to learn, prepare and pass the HPE Storage Solutions (HPE0-J68)

certification exam

HP HPE0-J68 exam is intended for storage architects, system engineers, and technical consultants who have experience in designing and developing storage solutions. HPE0-J68 exam covers a range of topics, including storage architecture, data protection, networking, and multi-site storage solutions. HPE0-J68 Exam also tests the candidate's knowledge of HPE storage products and solutions, including HPE StoreOnce, HPE 3PAR, and HPE Nimble.

HPE Storage Solutions Sample Questions (Q176-Q181):

NEW QUESTION # 176

A customer uses Veeam to backup their entire datacenter.

Which Veeam feature allows them to recover a single email from their Exchange server?

- **A. Explorer for Storage Snapshots**
- B. Changed block tracking
- C. Data Mover Service
- D. SureBackup

Answer: A

Explanation:

Veeam's integration with HPE storage solutions, particularly in backup and recovery scenarios, includes features that allow granular recovery of data, such as individual emails.

Explorer for Storage Snapshots is a feature within Veeam that enables customers to perform granular recovery from storage snapshots, including individual items such as emails from an Exchange server. This feature is crucial for minimizing downtime and ensuring quick recovery of specific data without the need to restore entire databases or systems.

This capability provides an efficient and user-friendly way to handle data recovery tasks, which is particularly valuable in environments where data availability and quick recovery are critical.

NEW QUESTION # 177

Which file protocols are commonly used in HPE StoreOnce environments? (Choose two.)

- **A. NFS**
- B. VFS
- **C. CIFS**
- D. NTFS
- E. ZFS

Answer: A,C

Explanation:

In HPE StoreOnce environments, the two most commonly used file protocols are CIFS (Common Internet File System) and NFS (Network File System).

CIFS: This protocol is widely used in Windows environments for file sharing. It enables users and applications to access files on remote servers as if they were local, making it ideal for integration with Windows-based systems.

NFS: This protocol is commonly used in Unix and Linux environments for file sharing. It allows a user on a client computer to access files over a network much like local storage is accessed.

These protocols are integral to HPE StoreOnce's capability to provide flexible and efficient file-based backup and recovery solutions across different operating environments.

NEW QUESTION # 178

Which storage sizing tool, designed for HPE 3PAR StoreServ, can be used to determine whether customers qualify for the Get Thin Guarantee Program?

- A. StoreVista
- B. NinjaStars
- C. NinjaCrawler
- D. NinjaProtected

Answer: C

Explanation:

NinjaCrawler is the storage sizing tool designed for HPE 3PAR StoreServ that can be used to determine whether customers qualify for the Get Thin Guarantee Program. This tool analyzes the customer's existing storage environment, including data usage patterns and deduplication opportunities, to provide insights into potential savings and help qualify for the Get Thin Guarantee.

NEW QUESTION # 179

A customer need to implement a new SAN fabric for their growing environment .The new SAN should provide a high performance and port-efficient network with many-to-many connectivity .Because of changing requirement and the possible acquisition of another company in the near future. The customer cannot predict the I/O traffic pattern within the SAN .The customer also concerned about availability. Which type of SAN topology should you recommend?

- A. Cascaded fabric
- B. Single switch fabric
- C. Core-edge fabric
- D. Meshed fabric

Answer: D

Explanation:

A Meshed fabric SAN topology is recommended when the customer requires a high-performance, port-efficient network with many-to-many connectivity and cannot predict I/O traffic patterns. This topology provides multiple paths between devices, ensuring high availability and redundancy. It is flexible and can easily accommodate changes in the network, such as the acquisition of another company, making it ideal for environments with dynamic requirements.

NEW QUESTION # 180

Which technology allows for non-intrusive gathering of 10 statistics from any device port, applies these statistics to an intuitive, policy-based monitoring system, and includes an alerting suite to configure thresholds and alarms?

- A. Nexus Dashboard Fabric Controller
- B. MDSCU
- C. Fabric Vision
- D. Web Tools

Answer: C

NEW QUESTION # 181
