Salesforce Certified Field Service Consultant Sample Questions (Q25-Q30):

NEW QUESTION # 25

An analytics team wants to get real-time updates on transactional email metrics, specifically Sent and NotSent, to ensure they are fulfilling a legal obligation due to the nature of their messages.

What method should be suggested in this scenario?

- A. Data View Export with every send
- **B. Event Notification Service**
- C. Platform Events API
- D. Data Retrieves on the Send Object

Answer: B

NEW QUESTION # 26

An employee at universal container performs the role of a dispatcher and a technician How should a consultant configure the field service lightning to support this behavior?

- A. Create one service resource and assign the technician and dispatcher role
- **B. Create one service resource and assign the relevant permission set license**
- C. Create two skills records and assign them to service resources record
- D. Create two service resource and assign them to the employee

Answer: B

Explanation:

Service Resources are records that represent the people or equipment that perform field service tasks[53].

Permission Set Licenses are licenses that grant users access to specific features such as Field Service Dispatcher Console or Field Service Mobile App[54]. Creating one service resource and assigning the relevant permission set license would allow an employee at Universal Containers to perform both dispatcher and technician roles using one record and one license. Creating two skills records and assigning them to service resources record would not affect their roles or access to features. Skills are records that define specific abilities or qualifications that service resources have[55]. Creating two service resources and assigning them to the employee would create duplicate records and require two licenses for one employee. Creating one service resource and assigning the technician and dispatcher role would not work because roles are not fields on the service resource object. References:

NEW QUESTION # 27

A universal container customer is having issues with three containers at the customer's site. Each container is tracked as an asset on the customer's account Which two methods should Consultants recommend to ensure the service with each? container can be handled independently?

- A. Add each asset to a separate work order line item. Create a service appointment for the work orders.
- B. Add each asset to a separate child work order. Create a service appointment for the parent work order.
- C. work order.
- **D. Add each asset to a separate work order line item. Create a service appointment for each line items.**
- **E. Add each asset to a separate work order. Create a service appointment for each**

Answer: D,E

NEW QUESTION # 28

Universal Containers sells widgets with multiple components. Based on a problem reported by a customer, one or more of the components need to be replaced.

What should a Consultant recommend to accurately record the required work?

- A. Work Orders with Service Appointments
- B. Work Orders with Products Consumed
- **C. Work Orders with Work Order Line Items**
- D. Service Appointments and Service Appointment Line Items

Answer: C

Explanation:

Explanation

This option allows recording the required work for each component separately, and tracking the status and progress of each Work Order Line Item. References:

https://help.salesforce.com/s/articleView?id=sf.fs_work_order_line_items.htm&type=5

NEW QUESTION # 29

universal container technicians have 12 mandatory company holidays each calendar year. Technician need view all of their absence records at once Which two applications should a consultant recommend to meet this requirement?

Choose 2 answers

- **A. Salesforce browser-based applications**
- B. Salesforce mobile applications
- **C. Field service lightning mobile applications**
- D. Custom mobile applications

Answer: A,C
