The Open Group TOGAF Business Architecture Foundation Exam 認定 OGBA-101 試験問題 (Q34-Q39):

質問 # 34

Consider the following statement.

Projects may cycle between ADM phases, in planned cycles covering multiple phases.

What does it illustrate?

- A. Implementation governance
- B. Enterprise Architecture
- C. Requirements management
- **D. Iteration**

正解: D

質問 # 35

What can architects present to stakeholders to extract hidden agendas, principles, and requirements that could impact the final Target Architecture?

- **A. Business Scenarios and Business Models**
- B. Alternatives and Trade-offs
- C. Solutions and Applications
- D. Architecture Views and Architecture Viewpoints

正解: A

解説:

Business Scenarios and Business Models are tools that architects can present to stakeholders to facilitate discussions that reveal underlying assumptions, agendas, principles, and requirements. They help in understanding the context, extracting and validating requirements, and identifying potential impacts on the target architecture. By discussing scenarios and models, stakeholders can express their vision and concerns, which may include unspoken or implicit needs that are crucial for the architecture's success.

質問 # 36

Which of the following describes how the Enterprise Continuum is used when developing an enterprise architecture?

- A. To coordinate with the other management frameworks in use
- B. To identify and understand business requirements
- **C. To classify architecture and solution assets**
- D. To describe how an architecture addresses stakeholder concerns

正解: C

解説:

The Enterprise Continuum is a tool within the TOGAF framework that provides methods for classifying architecture and solution assets. The continuum is a view of the Architecture Repository that provides methods for classifying, storing, and managing the various architecture assets. These assets include architectures, architectural patterns, architecture descriptions, and other related artifacts. The Enterprise Continuum enables architects to organize the repository in a way that is consistent and understandable, facilitating the reuse of these assets across various architecture development initiatives.

質問 # 37

Consider the following statements:

A whole corporation or a division of a corporation

A government agency or a single government department

Partnerships and alliances of businesses working together, such as a consortium or supply chain
What are those examples of according to the TOGAF Standard?

- A. Organizations
- **B. Enterprises**
- C. Architectures Scopes
- D. Business Units

正解: B

解説:

The examples given (a whole corporation, a division of a corporation, a government agency, a single government department, partnerships, and alliances) are considered "Enterprises" according to the TOGAF Standard. Here's a detailed explanation:

* Definition of an Enterprise:

* Enterprise: According to TOGAF, an enterprise is any collection of organizations that share a common set of goals. It can be a whole corporation, a division of a corporation, a government agency, or a consortium of businesses.

* Examples of Enterprises:

* Corporation or Division: An enterprise can be a whole corporation or just a division within a larger organization.

* Government Entities: It includes government agencies or individual departments within the government.

* Partnerships and Alliances: Enterprises can also be partnerships and alliances of businesses, such as consortia or supply chains.

* TOGAF References:

* Scope of Enterprise Architecture: TOGAF defines enterprise architecture as encompassing the entire scope of the enterprise, including all its sub-units and external partnerships.

* Enterprise Continuum: TOGAF's Enterprise Continuum provides a framework for understanding and organizing the artifacts that make up the enterprise architecture.

In summary, the examples provided are considered "Enterprises" according to the TOGAF Standard, as they represent collections of organizations with shared goals.

質問 # 38

What are the following activities part of?

* Initial risk assessment

* Risk mitigation and residual risk assessment

* Risk monitoring

- A. Security Architecture
- B. Phase A
- C. Risk Management
- D. Phase C

正解: C

質問 # 39
