

Salesforce Plat-Con-201 Valid Test Question - Test Plat-Con-201 Answers

The web-based Salesforce Certified Omnistudio Consultant (Plat-Con-201) practice test software can be used through browsers like Firefox, Safari, and Google Chrome. The customers don't need to download or install any excessive plugins or software in order to use the web-based Salesforce Certified Omnistudio Consultant (Plat-Con-201) practice exam format. The web-based Salesforce Certified Omnistudio Consultant (Plat-Con-201) practice test software format is supported by different operating systems like Mac, iOS, Linux, Windows, and Android.

One of the most effective strategies to prepare for the Salesforce Certified Omnistudio Consultant (Plat-Con-201) exam successfully is to prepare with actual Salesforce Plat-Con-201 exam questions. It would be difficult for the candidates to pass the Salesforce exam on the first try if the Plat-Con-201 study materials they use are not updated. Studying with invalid Plat-Con-201 practice material results in a waste of time and money. Therefore, updated Salesforce Plat-Con-201 practice questions are essential for the preparation of the Plat-Con-201 exam.

Test Plat-Con-201 Answers & Valid Plat-Con-201 Exam Bootcamp

The TrainingQuiz is committed from the day first to ace the Salesforce Certified Omnistudio Consultant (Plat-Con-201) exam questions preparation at any cost. To achieve this objective TrainingQuiz has hired a team of experienced and qualified Salesforce Plat-Con-201 certification exam experts. They utilize all their expertise to offer top-notch Salesforce Certified Omnistudio Consultant (Plat-Con-201) exam dumps. These Plat-Con-201 exam questions are being offered in three different but easy-to-use formats.

Salesforce Certified Omnistudio Consultant Sample Questions (Q87-Q92):

NEW QUESTION # 87

A business has an existing Contact FlexCard that currently displays 5 actions. The business needs to add 3 more actions to the existing FlexCard. All 8 actions are equally important and used with the same frequency. The business wants to display the name and icon for each action. However, when reviewing the existing design, the consultant notices that the FlexCard is overloaded with actions. What FlexCard design solution should the consultant recommend?

- A. Add a menu element and include all the actions
- B. Create a new contact FlexCard for the new actions
- C. Use a block element to add these new actions
- D. Add a flyout to the existing FlexCard

Answer: A

Explanation:

The FlexCard design solution that the consultant should recommend is to add a menu element and include all the actions. A menu element can display a list of actions in a dropdown menu, with icons and labels for each action. The consultant can use a menu element to show all the 8 actions in the FlexCard, without overloading it with buttons or links. This will improve the user experience and the design of the FlexCard

NEW QUESTION # 88

A consultant is designing a solution for a client using OmniStudio. The client wants to display data and launch actions from their Salesforce org.

Which OmniStudio tool should the consultant use to meet this requirement?

- A. DataRaptors
- B. Integration Procedures
- C. OmniScripts
- D. FlexCards

Answer: D

Explanation:

* FlexCards (B) - FlexCards are designed to display data from Salesforce and launch actions such as OmniScripts, Integration Procedures, or external API calls.

* FlexCards allow users to interact with data dynamically while keeping the UI simple and intuitive.

* A. DataRaptors - These are used for extracting, transforming, and loading data, but they do not have a UI component to display data.

* C. OmniScripts - OmniScripts are used for step-by-step guided interactions but are not meant for displaying data at a glance like FlexCards.

* D. Integration Procedures - These are used for server-side processing but do not display data or provide UI elements.

Comprehensive and Detailed In-Depth Explanation: Why not the other options?? Salesforce OmniStudio Reference:

* FlexCards Overview

* Launching Actions from FlexCards

NEW QUESTION # 89

A company has a legacy application to display customer information. The application currently uses custom CS / HTML to display information in the company's color scheme and fonts. The application also provides users with access to more than 25 processes.

Recently, a new project was started to build a 360° view using FlexCards to replace the legacy application.

In this scenario, which three FlexCard features should the consultant recommend?

Choose 3 answers

- A. Actions
- B. Data tables
- C. Newport Design System
- D. Menu elements
- E. Custom Styles

Answer: A,B,E

Explanation:

FlexCards are used to display contextual customer information in a compact and customizable way. They can also provide access to related processes or actions. In this scenario, the features that the consultant should recommend are:

* Actions: These are buttons or links that can launch OmniScripts, DataRaptors, or other processes from the FlexCard. They can help the users to perform tasks related to the customer information displayed on the FlexCard.

* Custom Styles: These are CSS classes that can be applied to the FlexCard elements to match the company's color scheme and

fonts. They can help the users to have a consistent and branded user interface.

* Data Tables: These are elements that can display tabular data from one or more data sources on the FlexCard. They can help the users to see relevant data in a structured and sortable way.

The features that the consultant should not recommend are:

* Menu Elements: These are elements that can display a list of options or submenus on the FlexCard.

They are not suitable for this scenario because they do not provide access to processes or actions, but only to other FlexCards or pages.

* Newport Design System: This is a design system that provides a set of predefined styles and components for OmniStudio applications. It is not suitable for this scenario because it does not match the company's color scheme and fonts, and it may require additional customization.

NEW QUESTION # 90

A business needs a 360° view of their accounts, including a FlexCard to display all of the products sold to the account. The business identified 20 different data elements and 10 actions that users would need when view the product information. Once all of the elements are collected together on the FlexCard, it looks cluttered.

Which two FlexCard features should the consultant recommend to address this issue?

Choose 2 answers

- A. Put specific fields in a collapsible block
- B. Use a flyout action to display additional information
- C. Use a condition to hide data unless specific criteria are met
- D. Use a table or chart to display data

Answer: A,B

Explanation:

The two FlexCard features that the consultant should recommend to address this issue are Flyout and Block elements. A Flyout is a pop-up window that can display additional information or actions for a FlexCard. The consultant can use a Flyout to show more details or options for each product without cluttering the main FlexCard. A Block element is a container that can group related fields and elements in a FlexCard. The consultant can use a Block element with the Collapse property enabled to allow the user to expand or collapse a section of the FlexCard, such as specific fields or actions

NEW QUESTION # 91

A Consultant is working on a project that involves using OmniStudio tools to design solutions that meet customer business requirements. The solutions need to be maintainable, scalable, and contribute to long-term customer success. Which OmniStudio tool should the Consultant use to display data and launch actions?

- A. DataRaptors
- B. Integration Procedures
- C. OmniScripts
- D. FlexCards

Answer: D

Explanation:

* FlexCards (B) - FlexCards are designed to display data from Salesforce or external sources and launch actions such as OmniScripts, Integration Procedures, or other system interactions.

* FlexCards provide a reusable, scalable UI component that aligns with the requirements of maintainability and long-term success.

* A. OmniScripts - OmniScripts are used for guided interactions but are not meant for displaying static or dynamic data as FlexCards do.

* C. Integration Procedures - These are used for server-side processing and data transformation, not for directly displaying UI elements.

* D. DataRaptors - DataRaptors are data extraction and transformation tools but do not display data or launch actions on their own.

Comprehensive and Detailed In-Depth Explanation: Why not the other options?? Salesforce OmniStudio Reference:

* FlexCards Overview

* Launching OmniScripts and Actions from FlexCards

NEW QUESTION # 92

.....

We want to specify all details of various versions of our Plat-Con-201 study materials. We have three versions of our Plat-Con-201 exam braindumps: the PDF, Software and APP online. You can decide which one you prefer, when you made your decision and we believe your flaws will be amended and bring you favorable results even create chances with exact and accurate content of our Plat-Con-201 learning guide.
