Valid Salesforce Mule-Dev-202 Test Question, Mule-Dev-202 Valid Test Experience

We are here divide grieves with you to help you pass your Salesforce Mule-Dev-202 exam with ease. You can abandon the time-consuming thought from now on. You won't regret your decision of choosing our Salesforce Mule-Dev-202 study guide. In contrast, they will inspire your potential without obscure content to feel. After getting our Mule-Dev-202 Exam Prep, you will not live under great stress during the Mule-Dev-202 exam period.

Salesforce Certified MuleSoft Hyperautomation Developer Sample Questions (Q31-Q36):

NEW QUESTION # 31

Northern Trail Outfitters is building a hyperautomation solution using Salesforce and MuleSoft. They need to use Salesforce Flow to automate a multi-departmental process in an external system and capture the outcome in Salesforce.

How should the Salesforce Flow solution be structured to meet this requirement?

- A. An evaluation flow which evaluates when the process is completed and updates Salesforce records
- B. Parent and subflows invoked by REST API to capture user inputs and update Salesforce records
- C. An autolaunched flow invoked by REST API to update Salesforce after the process is completed
- **D. A Flow Orchestration to automate the multi-departmental process and update Salesforce records**

Answer: D

Explanation:

Salesforce Flow Orchestration is designed to manage complex, multi-step business processes that span multiple departments and systems. Here's how it can be structured to meet the requirement:

Automate Multi-Departmental Process:

Use Flow Orchestration to define and manage the steps involved in the multi-departmental process. It allows you to break down the process into stages and define the sequence of actions and approvals required.

Capture Outcome in Salesforce:

After completing the external process, Flow Orchestration can be configured to update Salesforce records with the outcome. This ensures that the results of the automated process are reflected within Salesforce.

Orchestration Capabilities:

Salesforce Flow Orchestration provides features such as task assignments, decision elements, and complex branching logic, which are ideal for managing multi-departmental workflows.

Salesforce Flow Orchestration Documentation

NEW QUESTION # 32

The MuleSoft team at Northern Trail Outfitters wants to create a project skeleton that developers can use as a starting point when creating API implementations with Anypoint Studio. This will help drive consistent use of best practices within the team. Which type of Anypoint Exchange artifact should be added to Exchange to publish the project skeleton?

- A. An example of an API implementation following best practices
- B. A custom asset with the default API implementation
- C. RAML trait definitions to be reused across API implementations
- **D. A MuleSoft application template with key components**

Answer: D

Explanation:

To create a project skeleton that developers can use as a starting point for API implementations with Anypoint Studio, the best approach is to use a MuleSoft application template:

MuleSoft Application Template:

A MuleSoft application template includes key components and configurations that follow best practices. It provides a consistent starting point for new projects, ensuring that all developers adhere to the same standards.

Benefits:

Using a template helps enforce best practices, reduces the setup time for new projects, and ensures consistency across different implementations.

Publishing to Anypoint Exchange:

Once the template is created, it can be published to Anypoint Exchange where it is accessible to the entire development team. Developers can then use this template to kickstart their API projects, ensuring a uniform approach across the organization.

NEW QUESTION # 33

AnyAirlines uses an Einstein bot for their customer support. They want it to display a message when a user provides an incorrect answer to a particular question.

Which dialog option should be selected?

- **A. Message**
- B. Action
- C. Rules

- D. Question

Answer: A

Explanation:

Message Dialog Option:When configuring an Einstein bot to respond to incorrect answers, the 'Message' dialog option should be selected. This allows the bot to display a predefined message to the user, guiding them appropriately or informing them of the incorrect input.

Reference:Salesforce Einstein Bot Setup Guide

Understanding Dialog Options:

Action:Used for initiating backend processes or external actions.

Question:Used for asking the user for information or inputs.

Rules:Used for defining conditional logic to control the flow of the conversation.

Message:Specifically used to provide information or feedback to the user, which is ideal for handling incorrect answers.

Reference:Einstein Bots Dialogue Management

NEW QUESTION # 34

A Salesforce admin for AnyAirlines constructs a MuleSoft Composer flow that retrieves a record based on a unique ID using the Get Records action from a Salesforce connector. They will use the result to send a Slack message.

How can they achieve this task?

- A. 1. Add a Slack action step after the Salesforce action step.2. Use the first record from the collection of Salesforce records to construct the message.
- B. 1. Add an If/Else Block after the Salesforce action step, which contains a branch checking if the Salesforce action step returned exactly one record.2. In the branch, add a Slack action step and use the record to construct the message.
- C. 1. Add a For Each loop after the Salesforce action step iterating over the collection of Salesforce records.2. Use a Slack action step to construct the messages from the record being processed.
- **D. 1. Add a Slack action step after the Salesforce action step.2. Use the record to construct the message.**

Answer: D

Explanation:

Salesforce Action Step:Start by adding a Salesforce action step that uses the Get Records action to retrieve the record based on a unique ID. This action retrieves the specific record needed.

Reference:MuleSoft Composer Salesforce Connector

Add Slack Action Step:After retrieving the record, add a Slack action step. This step will be used to send the message to Slack.

Reference:MuleSoft Composer Slack Connector

Use the Record:Use the retrieved record directly to construct the message in the Slack action step. This ensures the message contains the relevant information from the Salesforce record.

Reference:Building Messages in Composer

No Need for Collection Handling:Since the Get Records action retrieves a single record based on a unique ID, there is no need to handle collections or iterate through records.

Reference:Get Records Action

NEW QUESTION # 35

Northern Trail Outfitters wants to run a bidirectional sync of data between two Salesforce orgs. They want to perform real-time updates between both systems so that if either system is updated, the other one is automatically updated with the new data.

What is the minimum number of MuleSoft Composer flows needed to meet this requirement?

- A. 0
- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

To achieve a bidirectional sync between two Salesforce orgs using MuleSoft Composer, you would need a minimum of two flows.

Flow 1: Sync from Org A to Org B: This flow monitors changes in Org A and updates Org B with the new data whenever a change

occurs.

Flow 2: Sync from Org B to Org A: Similarly, this flow monitors changes in Org B and updates Org A with the new data whenever a change occurs.

This setup ensures that any change in either Salesforce org is reflected in the other, maintaining real-time synchronization between the two systems.

MuleSoft Composer for Salesforce

NEW QUESTION # 36

.....

PassTorrent's products can not only help customers 100% pass their first time to attend Salesforce Certification Mule-Dev-202 Exam, but also provide a one-year of free online update service for them, which will delivery the latest exam materials to customers at the first time to let them know the latest certification exam information. So PassTorrent is a very good website which not only provide good quality products, but also a good after-sales service.

Valid Mule-Dev-202 Test Question: <https://www.passtorrent.com/Mule-Dev-202-latest-torrent.html>

Mule-Dev-202 exam study material is exactly similar to actual exams, Our experts have contributed a lot of time to compile the Valid Mule-Dev-202 Test Question - Salesforce Certified MuleSoft Hyperautomation Developer exam dump, In comparison to others, Salesforce Certified MuleSoft Hyperautomation Developer (Mule-Dev-202) exam dumps are priced at a reasonable price, We have a Salesforce Mule-Dev-202 practice questions that provides multiple features including self-assessment features, The Mule-Dev-202 Royal Pack, would prove to be the most essential preparation source for your certification at the best price in town.

Finally, we assign the unit button to the text field's `rightView` property, Swift Mule-Dev-202 enables you to initialize instances of classes, structures, and enumerations, but it is the initializers in classes that prove the trickiest to work with.
