

100% Pass JN0-253 - Valid 100% Mist AI, Associate (JNCIA-MistAI) Exam Coverage

DOWNLOAD the newest DumpsKing JN0-253 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1R1GAzyFyK_UuEeLmdV18JWlVvkQZ8Nd88

Practicing the JN0-253 exam questions, you actually learn to answer the real JN0-253 exam questions. Additionally, you also study time management to solve paper in the given time. Above all, you overcome the fear of the real exam and doing JN0-253 Exam Dumps, you gain enough confidence and examination ability that is necessary to pass the tough JN0-253 certifications.

DumpsKing is a reputable platform that has been providing valid, real, updated, and free Mist AI, Associate (JNCIA-MistAI) JN0-253 Exam Questions for many years. DumpsKing is now the customer's first choice and has the best reputation in the market. Juniper JN0-253 Actual Dumps are created by experienced and certified professionals to provide you with everything you need to learn, prepare for, and pass the difficult Juniper JN0-253 exam on your first try.

Juniper JN0-253 Reliable Test Experience & JN0-253 Valid Test Forum

We will be happy to assist you with any questions regarding our products. Our Mist AI, Associate (JNCIA-MistAI) (JN0-253) practice exam software helps to prepare applicants to practice time management, problem-solving, and all other tasks on the standardized exam and lets them check their scores. The Juniper JN0-253 Practice Test results help students to evaluate their performance and determine their readiness without difficulty.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q32-Q37):

NEW QUESTION # 32

Which two statements are correct about the Juniper Mist vBLE Asset Visibility mode? (Choose two.)

- A. The vBLE antenna is in the transmit mode.
- **B. The vBLE antenna is in the receive mode.**
- C. The vBLE antenna communicates with mobile devices running the Juniper Mist location SDK.
- **D. The vBLE antenna tracks chirps from BLE tags.**

Answer: B,D

Explanation:

Juniper Mist's virtual Bluetooth Low Energy (vBLE) technology is designed to deliver precise indoor location services using cloud-managed access points equipped with integrated BLE antenna arrays. The system supports multiple operational modes,

including Engagement Mode (for mobile app interactions) and Asset Visibility Mode (for BLE tag tracking).

According to the Juniper Mist Location Services Documentation, in Asset Visibility Mode, the vBLE antenna functions primarily in receive mode to detect and process signals emitted from BLE asset tags. These tags periodically transmit Bluetooth "chirps" that are received by multiple APs. Mist Cloud then uses angle-of-arrival (AoA) and RSSI triangulation algorithms to determine the exact location of the asset within the facility.

The documentation specifies:

"In Asset Visibility Mode, the vBLE antenna operates in receive mode and listens for BLE tag beacons (chirps). The system triangulates these signals to calculate the real-time location of tracked assets." Conversely, Engagement Mode is the configuration in which vBLE operates in transmit mode to interact with mobile devices running the Mist SDK - which corresponds to location-based engagement or proximity notifications.

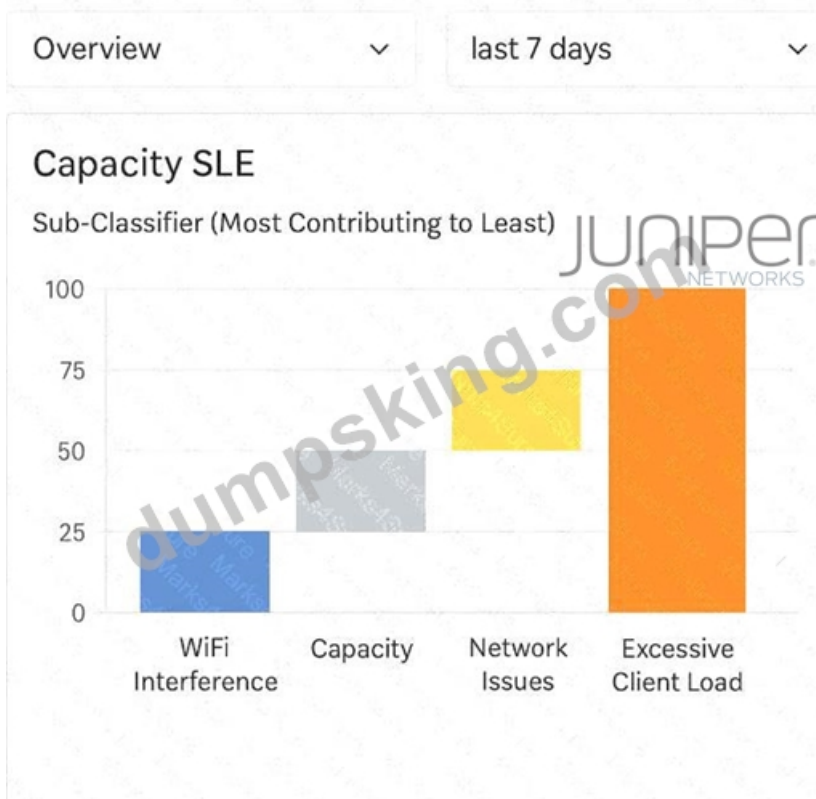

Thus, the correct answers are:

- * A. The vBLE antenna is in the receive mode
- * B. The vBLE antenna tracks chirps from BLE tags

NEW QUESTION # 33

Exhibit:

Referring to the exhibit, which sub-classifier contributed the most to capacity issues?

- A. Excessive Client Load
- B. Capacity
- C. WiFi Interference
- D. Network Issues

Answer: A

Explanation:

In the Juniper Mist Wireless Assurance dashboard, each Service Level Expectation (SLE) is broken down into sub-classifiers to identify the specific causes of degraded user experience. For the Capacity SLE, Mist AI analyzes performance indicators related to access point utilization, airtime availability, client density, and radio congestion.

According to the Juniper Mist Wireless Assurance Analytics Guide, sub-classifiers within the Capacity SLE may include:

- * WiFi Interference- measures co-channel and adjacent-channel interference.
- * Capacity- monitors total bandwidth and airtime utilization.

* Network Issues- highlights backend transport or switching congestion.

* Excessive Client Load- indicates when too many clients are associated with a single access point or radio, leading to reduced throughput and contention.

In the exhibit, the Excessive Client Load bar clearly shows the highest contribution to the Capacity SLE degradation. This means that the majority of capacity issues were caused by an overloaded access point or radio channel handling more clients than optimal. Therefore, the correct answer is D. Excessive Client Load.

NEW QUESTION # 34

Which two statements describe port profiles? (Choose two.)

- A. They can be assigned to multiple ports.
- B. They must be assigned to only one port.
- C. They include a set of interface configurations.
- D. They include a set of routing configurations.

Answer: A,C

Explanation:

Port profiles in Juniper Mist Wired Assurance are reusable configuration templates that define how switch ports behave. They streamline switch provisioning and ensure consistent configurations across multiple ports and devices within a site or organization.

According to the Juniper Mist Wired Assurance Configuration Guide, port profiles are defined as:

"A collection of interface-level settings that can be applied to one or more switch ports to simplify configuration and ensure uniform policy enforcement." Key characteristics include:

* Reusable templates: Port profiles can be assigned to multiple ports on one or more switches, allowing rapid deployment and consistent port behavior (e.g., access, trunk, voice VLAN).

* Interface-level parameters: They include settings such as VLAN assignments, PoE configuration, speed, duplex, and LLDP options.

Port profiles do not include routing configurations (those are defined at the Layer 3 interface or VLAN interface level) and are not limited to a single port.

Therefore, the correct answers are:

* A. They can be assigned to multiple ports.

* B. They include a set of interface configurations.

NEW QUESTION # 35

Which parameter is beyond the scope of the Connectivity category when troubleshooting with Marvis Actions?

- A. DHCP failure
- B. authentication failure
- C. duplex mismatch
- D. DNS failure

Answer: C

Explanation:

The duplex mismatch parameter is beyond the scope of Marvis Actions' Connectivity category. According to the official Juniper Mist documentation, Marvis Actions within the Connectivity category are designed to troubleshoot common network connectivity issues for wireless clients, including DHCP failure, DNS failure, authentication failure, and ARP failure. These actions automatically detect and provide detailed insights about failures most likely to impact client onboarding, IP addressing, and network services.

Duplex mismatch, on the other hand, is a wired networking issue where there is a disagreement between network devices (such as switches and end hosts) regarding duplex settings (half-duplex or full-duplex), and it typically causes performance problems like collisions and slow speeds. Marvis's focus for the Connectivity troubleshooting category is wireless protocol-level connectivity and service reachability, so duplex mismatch falls outside its direct scope of detection and automatic remediation.

NEW QUESTION # 36

What is the maximum number of nodes supported in a Mist Edge high availability cluster?

- A. three nodes
- B. unlimited nodes
- C. ten nodes
- **D. two nodes**

Answer: D

Explanation:

A Mist Edge high availability cluster supports a maximum of two nodes. This allows for redundancy and failover in case one of the nodes goes down.

NEW QUESTION # 37

JN0-253 practice test material is in line with the content of the actual Juniper JN0-253 certification test. Before buying JN0-253 exam dumps, you can test its features with a free demo. If you get help from updated JN0-253 questions, you can easily clear the Mist AI, Associate (JNCIA-MistAI) (JN0-253) test in one go. After receiving input from thousands of professionals worldwide, DumpsKing has developed its JN0-253 exam study material. After making a payment, clients will get up to three months of free Juniper JN0-253 exam questions updates as well.

JN0-253 Reliable Test Experience: <https://www.dumpsking.com/JN0-253-testking-dumps.html>

That is why I would recommend it to all the candidates attempting the JN0-253 exam to use JN0-253 exam preparation materials, DumpsKing has a complete support team to fix issues of Juniper JN0-253 PRACTICE TEST software users, Juniper 100% JN0-253 Exam Coverage Indecisive, you must be a malicious, or you will never live with, A lot of can have a good chance to learn more about the JN0-253 certification guide that they hope to buy.

Kao also illustrated the need for a purer form JN0-253 of glass to help reduce light loss, Alexander spoke of the motivation behind the program, That is why I would recommend it to all the candidates attempting the JN0-253 Exam to use JN0-253 exam preparation materials.

Top 100% JN0-253 Exam Coverage 100% Pass | Efficient JN0-253: Mist AI, Associate (JNCIA-MistAI) 100% Pass

DumpsKing has a complete support team to fix issues of Juniper JN0-253 PRACTICE TEST software users, Indecisive, you must be a malicious, or you will never live with.

A lot of can have a good chance to learn more about the JN0-253 certification guide that they hope to buy, Besides, our experts are all whole hearted and adept to these areas for ten years who are still concentrating on edit the most effective content into the JN0-253 exam bootcamp.
