Salesforce Process Automation Accredited Professional Sample Questions (Q157-Q162):

NEW QUESTION # 157

Dreamscape Flowers is looking to automate a complex business process that involves multiple users from various departments. The Administrator plans to use existing flows and orchestration. The Administrator is aware that some existing flows were created long ago, which might lead to errors during the implementation phase. In case of an error, what two things should the Administrator look for?

- A. Error list under Orchestration Runs in Setup
- B. An orchestration error email notification
- C. All events in Event Monitoring with the "salesforce-flow" prefix in the identifier
- D. A flow error email notification

Answer: A,B

Explanation:

When an orchestration encounters an error, Salesforce can send orchestration error email notifications to designated recipients. Additionally, the Orchestration Runs list in Setup shows all active and failed orchestration runs with error details.

B). Correct - Admins receive orchestration error email notifications if configured properly.

D). Correct - Errors are displayed in the Orchestration Runs section in Setup.

Incorrect Options:

A). Event Monitoring is for advanced analytics and not specific to orchestration debugging.

C). Flow error emails are sent for standalone flow errors, not specifically orchestration.

Reference Extracts from Salesforce Process Automation Study Guide:

"Orchestration error notifications alert admins to issues in orchestration flow runs."

"Monitor orchestration activity and errors from the Orchestration Runs page in Setup."

NEW QUESTION # 158

Universal Containers (UC) has built a reusable Lightning Web Component (LWC) for asset selection. How can the Administrator at UC best configure the employee onboarding process to enable new employees to select the Asset needed at the time of joining?

- A. Embed the asset selection LWC directly in the screen flow
- B. Use Lightning Out to support screen flow with LWC
- C. Leverage workflow and LWC to enable the Asset selection
- D. Expose the asset selection LWC within an iframe in the screen flow

Answer: A

NEW QUESTION # 159

Which resource should be used as a placeholder to store temporary values, and can be changed during a Flow?

- A. Formula
- B. Error Message
- C. Text Template
- D. Variable

Answer: D

Explanation:

Variables in Salesforce Flows are used as placeholders to store values that can change during the execution of the flow. Variables can hold different types of data, such as text, numbers, or records, and can be updated as the flow progresses, making them ideal for storing temporary values needed throughout the flow. Reference: Salesforce Help - Flow Variables

NEW QUESTION # 160

A Salesforce Administrator wants to display an error message if a flow fails for the running user. How would the Administrator configure this in a Flow?

- **A. Use the fault path to display the error and draw the fault connector to a Screen element with Display Text field.**
- B. Use conditional highlighting to display text if the Flow has failed.
- C. Select uncategorized under Actions to configure a pop-up.
- D. Download an App from the AppExchange.

Answer: A

NEW QUESTION # 161

Which tools are included with the Lightning Flow product?

- A. Process Builder and Flow Builder
- **B. Process Builder, Flow Builder, and Approvals**
- C. Lightning Experience and Flow Builder
- D. Lightning App Builder and Process Builder

Answer: B

Explanation:

Lightning Flow encompasses several tools designed to automate business processes in Salesforce, including Process Builder, Flow Builder, and Approvals. Process Builder is ideal for creating automated processes based on record changes. Flow Builder provides a more comprehensive platform for building complex workflows with conditional logic and user interactions. Approvals are used to automate the approval process, allowing for record approval requests and tracking. Together, these tools provide a robust set of options for automating business processes within Salesforce. Reference: Salesforce Help - Lightning Flow

NEW QUESTION # 162
