The Google-Workspace-Administrator training material package includes latest Google-Workspace-Administrator PDF questions and practice test software that will help you to pass the Google-Workspace-Administrator exam.

Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q84-Q89):

NEW QUESTION # 84

The current data storage limit for the sales organizational unit (OU) at your company is set at 10GB per user. A subset of sales representatives in that OU need 100GB of storage across shared services. You need to increase the storage for only the subset of sales representatives by using the least disruptive approach and the fewest configuration steps. What should you do?

- A. Move the subset of users to a sub-OU, and assign a 100GB storage limit to that sub-OU.
- B. Create a configuration group, and add the subset of users to that group. Set the group storage limit to 100GB.
- C. Instruct the subset of users to store their documents in a Shared Drive with a 100GB limit.
- D. Change the storage limit of the sales OU to 100GB.

Answer: A

Explanation:

By moving the subset of sales representatives to a sub-organizational unit (OU) and assigning a 100GB storage limit to that sub-OU, you can efficiently increase the storage for those users without affecting the rest of the sales team. This approach allows you to target the specific users that require more storage, maintaining minimal disruption and configuration steps.

NEW QUESTION # 85

The compliance team at your organization is conducting a legal investigation into some concerning sales activities of an employee eight months ago. The compliance team contacted you for assistance on the situation. You set up the default Google Vault retention rules so all data is retained only for one year. You must assist the compliance team with the investigation. What should you do?

- **A. Assign the compliance team a Google Vault administrator role and create a legal hold for the employee.**
- B. Assign the compliance team a Google Vault administrator role and change the default retention rules to three years.
- C. Suspend the employee and export all data by using Google Takeout.
- D. Do nothing. The retention period has already ended and the evidence has already been purged.

Answer: A

Explanation:

* Assign Vault Administrator Role: In the Google Admin console, assign the compliance team members the Google Vault administrator role to give them the necessary permissions.

* Access Google Vault: Have the compliance team access Google Vault.

* Create a Matter: In Google Vault, create a new matter for the investigation.

* Create a Hold: Within the matter, create a legal hold specifically targeting the employee's email and any other relevant data. This will preserve all the necessary information beyond the default retention period.

* Review Data: The compliance team can now review the preserved data as part of their investigation.

NEW QUESTION # 86

A company using Google Workspace has reports of cyber criminals trying to steal usernames and passwords to access critical business data. You need to protect the highly sensitive user accounts from unauthorized access.

What should you do?

- **A. Enforce 2FA with a physical security key.**
- B. Turn on password expiration.
- C. Use a third-party identity provider.
- D. Enforce 2FA with Google Authenticator app.

Answer: A

Explanation:

* Admin Console: Log into the Google Admin console at admin.google.com.

* Security Settings: Navigate to Security > Authentication > 2-step verification.

* Enforce 2FA:

* Enable "Enforce 2-step verification".

* Set the option to require "Security Keys".

* Deployment: Ensure all highly sensitive user accounts are equipped with physical security keys (e.g., YubiKey).

* Enrollment: Assist users in enrolling their security keys through the Google Account settings under

"Security".
