## 71301T Latest Exam Discount | 71301T Hot Questions

In the past ten years, our company has never stopped improving the 71301T study materials. For a long time, we have invested much money to perfect our products. The job with high pay requires they boost excellent working abilities and profound major knowledge. Passing the 71301T exam can help you find the job you dream about, and we will provide the best 71301T question torrent to the client. We are aimed that candidates can pass the exam easily. The study materials what we provide is to boost pass rate and hit rate, you only need little time to prepare and review, and then you can pass the 71301T exam.

## Avaya Aura Communication Applications Implement Sample Questions (Q76-Q81):

### NEW QUESTION # 76

Which component converts WebRTC Media Stream to SIP Media Stream?

- A. STUN/TURN server
- B. HTTP Reverse Proxy

- C. Avaya Aura Media Server (AAMS)
- D. G.450/430 or G.650 Medpro board

**Answer: A**

Explanation:

Provisioning Avaya Aura Media Server for the WebRTC Snap-in.

Procedure

1. Log in to the Avaya Aura Media Server Element Manager.

2. Check that Avaya Aura

Media Server nodes and routes are set up correctly.

See Deploying Avaya Breeze™ for details on configuring Avaya Aura Media Server for Avaya Breeze™.

3. Go to System Configuration > Server Profile > General Settings, enable Firewall NAT Tunneling Media Processor and then click Save.

4. Go to System Configuration > Signaling Protocols > SIP > General Settings, enable Always use SIP default outbound proxy, and then click Save.

5. Go to System Configuration > Media Processing > ICE > TURN/STUN Servers > Accounts and create a TURN/STUN account. This account ID and password must match the account created on the Avaya SBCE.

6. Go to System Configuration > Media Processing > ICE > TURN/STUN Servers > Servers to add the TURN/STUN connection to the Avaya SBCE server Etc.

#### NEW QUESTION # 77

The provisioning script automatically runs as part of the first boot-up of the Avaya Session Border Controller for Enterprise (SBCE). During this process you assign the Management IP address to the SBCE.

You browse to the Element Management System (EMS) to continue to install the SBCE.

On the System Management > Devices web page, which status does the SBCE display before the Install link is clicked?

- A. Commissioned
- B. Ready
- C. Registered
- D. Provisioned

**Answer: C**

Explanation:

□

#### NEW QUESTION # 78

Which statement regarding the Survivable Communication Manager (CM) is true?

- A. It does not require configuring on the System Manager (SMGR) either as a Managed Element, or as a SIP Entity.
- B. It is configured on the System Manager (SMGR) as a SIP Entity, with an Entity Link to the BSM.
- C. It is configured on the System Manager (SMGR) as a SIP Entity, with Entity Links to the Core Session Managers.
- D. It is configured on the System Manager (SMGR) as a Managed Element.

**Answer: C**

Explanation:

In an Avaya Aura architecture, a Survivable Remote CM (often referred to as an LSP or a Survivable Server) must be able to take over call processing if connectivity to the main Session Manager (SM) cluster is lost. To achieve this:

SIP Entity: The Survivable CM must be defined as a SIP Entity in the System Manager so that the network recognizes it as a valid SIP-capable device.

Entity Links: It requires Entity Links to the Core Session Managers to ensure that SIP signaling can be routed correctly between the survivable server and the main cluster. This allows for the failover of SIP traffic if the primary CM becomes unreachable.

#### NEW QUESTION # 79

Refer to the exhibit. With Dynamic Licensing configured in the Avaya Session Border Controller for Enterprise (ASBCE), when will the ASBCE issue a request to the WebLM server to allocate additional licenses based on "Fetch Count" value?

□

- A. when the percentage of free (available) standard sessions licenses reaches 30% (Low Watermark)
- B. when the percentage of free (available) standard sessions licenses drops below 50% (High Watermark)
- C. when the percentage of free (available) standard sessions licenses reaches 50% (High Watermark)
- D. when the percentage of free (available) standard sessions licenses drops below 30% (Low Watermark)

**Answer: D**

Explanation:

Dynamic Licensing in the Avaya Session Border Controller for Enterprise (ASBCE) uses a

"watermark" system to manage license allocation automatically from a WebLM server:

Low Watermark: This value (set to 30% in the exhibit) triggers the ASBCE to request more licenses. When the percentage of available (unused) licenses drops below this threshold, the SBC contacts the WebLM server to fetch additional licenses.

Fetch Count: This is the number of licenses the SBC will request once the Low Watermark is hit.

In your exhibit, the SBC will request 10 additional standard session licenses.

High Watermark: This value (set to 50% in the exhibit) acts as the release trigger. When the percentage of available licenses rises above this threshold-indicating they are no longer needed-the SBC returns the excess licenses to the WebLM pool to be used by other devices.

### NEW QUESTION # 80

The WebRTC snap-in needs to be loaded on which of Avaya Breeze cluster?

- A. Context Store EDP Cluster
- B. Work Assignment EDP Cluster
- C. Core Platform EDP Cluster
- D. General Purpose EDP Cluster

**Answer: C**

Explanation:

A cluster profile is a pre-loaded template that contains cluster attributes.

The Core Platform cluster profile: A closed cluster that supports up to 10 Avaya Breeze servers.

Incorrect Answers:

Other cluster profiles

\* General Purpose cluster profile: A General Purpose cluster is an open type cluster where you can install any type of snap-in or service.

\* General Purpose Large cluster profile: An open cluster that mainly supports the Engagement Call Control solution

\* Product specific cluster profiles: Cluster profiles like Context Store profile or a Work Assignment profile are product specific.

These cluster profiles have a specified list of required and optional snapins that you can install. If you attempt to install an unlisted snap-in for this cluster profile, the installation fails, and the system displays an error message.
