

Get free updates with SolarWinds Hybrid-Cloud-Observability-Network-Monitoring PDF Dumps

2026 Latest PrepPDF Hybrid-Cloud-Observability-Network-Monitoring PDF Dumps and Hybrid-Cloud-Observability-Network-Monitoring Exam Engine Free Share: https://drive.google.com/open?id=10xCOWFffM0zWS5zHUCVM-JpqhSeE_mQp

In today's society, there are increasingly thousands of people put a priority to acquire certificates to enhance their abilities. With a total new perspective, Hybrid-Cloud-Observability-Network-Monitoring study materials have been designed to serve most of the office workers who aim at getting an exam certification. Moreover, Hybrid-Cloud-Observability-Network-Monitoring Exam Questions have been expanded capabilities through partnership with a network of reliable local companies in distribution, software and product referencing for a better development. That helping you pass the Hybrid-Cloud-Observability-Network-Monitoring exam successfully has been given priority to our agenda.

We have three versions of our Hybrid-Cloud-Observability-Network-Monitoring certification guide, and they are PDF version, software version and online version. With the PDF version, you can print our materials onto paper and learn our Hybrid-Cloud-Observability-Network-Monitoring exam braindumps in a more handy way as you can take notes whenever you want to, and you can mark out whatever you need to review later. With the software version, you are allowed to install our Hybrid Cloud Observability Network Monitoring Exam guide torrent in all computers that operate in windows system. Besides, the software version can simulate the real test environment, which is favorable for people to better adapt to the examination atmosphere. With the online version, you can study the Hybrid Cloud Observability Network Monitoring Exam guide torrent wherever you like, and you still have access to the materials even if there is no internet available on the premise that you have studied the Hybrid-Cloud-Observability-Network-Monitoring Certification guide online once before.

Pass Guaranteed Hybrid-Cloud-Observability-Network-Monitoring - Hybrid Cloud Observability Network Monitoring Exam Accurate Vce Exam

Many candidates may think that it will take a long time to prepare for the Hybrid-Cloud-Observability-Network-Monitoring exam. Actually, it only takes you about twenty to thirty hours to practice our Hybrid-Cloud-Observability-Network-Monitoring exam simulation. We believe that the professional guidance will help you absorb the knowledge quickly. You will have a wide range of chance after obtaining the Hybrid-Cloud-Observability-Network-Monitoring certificate. You need to have a brave attempt. Our

Hybrid-Cloud-Observability-Network-Monitoring training engine will help you realize your dreams.

SolarWinds Hybrid Cloud Observability Network Monitoring Exam Sample Questions (Q51-Q56):

NEW QUESTION # 51

How is HA mode monitored and configured for site-to-site VPN tunnels within a Cisco ASA firewall?

- A. SNMP > ICMP > CLI Polling
- B. Agent > CLI Polling
- C. WMI > ICMP > CLI Polling
- D. SNMP > CLI Polling

Answer: D

NEW QUESTION # 52

An unknown traffic event is noted in the web console. What is the likely cause?

- A. receiving flows from a device not monitored by the network
- B. a firewall is blocking the traffic flow configurations
- C. incorrectly configured source or destination port in the flows
- D. missing a byte group from flow field configurations

Answer: A

NEW QUESTION # 53

Which two of the following actions can be taken to resolve unknown flow traffic events? (Choose two.)

- A. Add the devices and interfaces to SolarWinds' database.
- B. Enable automatic addition of flow sources.
- C. Ensure flow-enabled devices send data to appropriate port.
- D. Configure devices to send all flow data.

Answer: A,C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Unknown flow traffic often occurs when SolarWinds receives flow data from sources not defined in its database, or when flow-enabled devices are not sending data to the expected port.

Add the devices and interfaces to SolarWinds' database: Ensures flow data is properly associated with monitored objects, resolving the "unknown" status.

Ensure flow-enabled devices send data to the appropriate port: If data is sent to the wrong port, SolarWinds cannot process it correctly, leading to unknown events.

SolarWinds documentation notes:

"Unknown flow traffic typically indicates a mismatch between flow sources and known device/interface configurations, or incorrect UDP port configuration. Registering devices/interfaces and verifying port assignments resolves most unknown flow issues."

Network Performance Monitor Administrator Guide, "Troubleshooting Flow Data Collection" SolarWinds Success Center: "Resolving Unknown Flow Events"

NEW QUESTION # 54

Which two of the following authentication methods are supported when configuring a database log collection in hybrid cloud observability? (Choose two.)

- A. Windows
- B. oAUTH
- C. mixed mode

- D. Kerberos

Answer: A,C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

When configuring database log collection (e.g., from SQL Server), SolarWinds supports:

Mixed mode authentication (SQL Server and Windows authentication)

Windows authentication

Kerberos and oAUTH are not supported directly as authentication methods for log collection from SQL Server databases in the SolarWinds platform.

Log Analyzer Administrator Guide: Supported Authentication for Database Log Collection

NEW QUESTION # 55

Which two of the following services can be monitored in network insight with network health, performance monitor, and NCM features installed in hybrid cloud observability? (Choose two.)

- A. policy details
- B. global protect VPN
- C. access lists
- D. high availability details

Answer: A,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

With Network Insight features (including for Palo Alto and F5 BIG-IP devices) installed alongside Network Configuration Manager and Performance Monitoring, you can monitor:

High availability details: Provides information on device redundancy, failover status, and clustering.

Policy details: Enables insight into firewall, security, and NAT policies for managed devices.

Access lists and VPNs may be monitored in other modules, but the primary, advanced insight is for high availability and policy configurations.
