

Quiz 2026 First-grade USGBC LEED-Green-Associate: New LEED Green Associate Exam Exam Practice

What's more, part of that ActualTestsQuiz LEED-Green-Associate dumps now are free: https://drive.google.com/open?id=15ZHTG7m_4Lr_rSkJVTYrKfx2NgGGV16

If you have been very panic sitting in the examination room, our LEED-Green-Associate actual exam allows you to pass the exam more calmly and calmly. After you use our products, our study materials will provide you with a real test environment before the LEED-Green-Associate exam. After the simulation, you will have a clearer understanding of the exam environment, examination process, and exam outline. Our LEED-Green-Associate Study Materials will really be your friend and give you the help you need most. Our LEED-Green-Associate exam materials understand you and hope to accompany you on an unforgettable journey.

USGBC LEED-Green-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Water Efficiency: This section of the exam measures the skills of water conservation specialists and covers strategies for reducing water usage both indoors and outdoors. It includes the use of gray water and rainwater in irrigation and the implementation of low-flow fixtures.
Topic 2	<ul style="list-style-type: none">Energy and Atmosphere: This section of the exam measures the skills of energy efficiency engineers and covers building loads, energy efficiency measures, and alternative energy practices. It emphasizes commissioning, energy auditing, and the use of renewable energy sources.

Topic 3	<ul style="list-style-type: none"> Sustainable Sites: This section of the exam measures the skills of landscape architects and focuses on on-site assessment and design strategies that reduce environmental impact. It includes topics like habitat conservation, rainwater management, and exterior lighting.
Topic 4	<ul style="list-style-type: none"> Indoor Environmental Quality: This section of the exam measures the skills of indoor air quality specialists and covers strategies for improving indoor air quality, lighting, acoustics, and occupant comfort. It emphasizes the use of low-emitting materials and green cleaning practices.

USGBC LEED-Green-Associate Questions - Quick Tips To Pass [2026]

We have 24/7 Service Online Support services, and provide professional staff Remote Assistance. Besides, if you need an invoice of our LEED-Green-Associate practice materials please specify the invoice information and send us an email. And you can download the trial of our LEED-Green-Associate training engine for free before your purchase. This kind of service shows our self-confidence and actual strength about LEED-Green-Associate Study Materials in our company. Besides, our company's website purchase process holds security guarantee, so you needn't be anxious about download and install our LEED-Green-Associate exam questions.

USGBC LEED Green Associate Exam Sample Questions (Q232-Q237):

NEW QUESTION # 232

Utilizing recycled materials achieves the green building objective of

- A. promoting the use of virgin materials and resources
- B. encouraging environmentally responsible forest management
- C. increasing demand for products extracted and manufactured within the region
- D. **minimizing the need for landfills**

Answer: D

Explanation:

Utilizing recycled materials achieves the green building objective of minimizing the need for landfills. Recycled materials are materials that have been recovered or diverted from the waste stream and processed into new products or materials. Utilizing recycled materials can reduce the amount of waste that is sent to landfills or incinerators, which can have negative impacts on the environment, such as occupying valuable land, contaminating soil and water, and emitting harmful gases. Utilizing recycled materials can also save natural resources, reduce greenhouse gas emissions, create jobs, and lower disposal costs¹². NEW QUESTION # 233

Solar Reflectance Index (SRI) combines reflectivity with:

- A. **Emissivity**
- B. Absorptivity
- C. Conductivity
- D. Transmissivity

Answer: A

Explanation:

SRI is a measure of a material's ability to reflect solar heat (reflectivity) and release absorbed heat (emissivity). This index helps evaluate materials for reducing the heat island effect under the Sustainable Sites category.

NEW QUESTION # 234

A developer has asked the building designer to incorporate a landscape irrigation system using the building's graywater in order to

earn LEED points. Which is the most appropriate source of graywater for this use?

- A. Toilet
- B. Janitor sink
- C. Urinal
- D. **Bathroom sink**

Answer: D

NEW QUESTION # 235

In which of the following common building applications are chlorofluorocarbons (CFCs) found?

- A. Roof-top vents
- B. **Centrifugal chillers**
- C. Fire hydrants
- D. Insulation agents

Answer: B

Explanation:

Chlorofluorocarbons (CFCs) are a type of compound that was widely used in the 20th century in various applications, including as a refrigerant in air conditioning systems such as centrifugal chillers. CFCs are known to deplete the ozone layer when released into the atmosphere, and their use has been phased out in many countries under the Montreal Protocol. Reference: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

NEW QUESTION # 236

What is the minimum gross floor area required for a Building Design and Construction (BD+C) project to be eligible for certification?

- A. 750 ft² (70 m²)
- B. 250 ft² (23 m²)
- C. **1000 ft² (93 m²)**
- D. 500 ft² (46 m²)

Answer: C

Explanation:

The LEED minimum program requirements state that for LEED BD+C and LEED O+M rating systems, the LEED project must include a minimum of 1000 ft² (93 m²) of gross floor area.
