

Professional-Cloud-Developer Exam Collection Pdf - Professional-Cloud-Developer Valid Test Labs

What's more, part of that DumpsFree Professional-Cloud-Developer dumps now are free: https://drive.google.com/open?id=1rxtdlMq2jip_t4Kzb-M37VIRPGChZmY6f

Reliable Google Certified Professional - Cloud Developer Professional-Cloud-Developer Dumps Questions and dumps ebook make your career more successful. Google provides updated, free reliable Google Certified Professional - Cloud Developer dumps free download. And the Google Certified Professional - Cloud Developer Google Certified Professional - Cloud Developer price is affordable. With 365 days updates. It works with all operating systems like Linux, Windows, Android, Mac, and IOS, etc.

We can promise that we are going to provide you with 24-hours online efficient service after you buy our Google Certified Professional - Cloud Developer guide torrent. If you purchase our Professional-Cloud-Developer test guide, we are going to answer your question immediately, because we hope that we can help you solve your problem about our Professional-Cloud-Developer exam questions in the shortest time. We can promise that our online workers will be online every day. If you buy our Professional-Cloud-Developer Test Guide, we can make sure that we will offer you help in the process of using our Professional-Cloud-Developer exam questions. You will have the opportunity to enjoy the best service from our company.

Well-Prepared Professional-Cloud-Developer Exam Collection Pdf & Leader in Qualification Exams & Trustable Professional-Cloud-Developer Valid Test Labs

The contents of Professional-Cloud-Developer exam torrent was all compiled by experts through the refined off textbooks. Hundreds of experts simplified the contents of the textbooks, making the lengthy and complex contents easier and more understandable. With Professional-Cloud-Developer study tool, you only need 20-30 hours of study before the exam. Professional-Cloud-Developer guide torrent provides you with a brand-new learning method. In the course of doing questions, you can memorize knowledge points. You no longer need to look at the complicated expressions in the textbook. Especially for those students who are headaches when reading a book, Professional-Cloud-Developer Study Tool is their gospel. Because doing exercises will make it easier for one person to concentrate, and at the same time, in the process of conducting a mock examination to test yourself, seeing the improvement of yourself will makes you feel very fulfilled and have a stronger interest in learning. Professional-Cloud-Developer guide torrent makes your learning process not boring at all.

Google Certified Professional - Cloud Developer Sample Questions (Q135-Q140):

NEW QUESTION # 135

You are working on a social media application. You plan to add a feature that allows users to upload images. These images will be 2 MB ?1 GB in size. You want to minimize their infrastructure operations overhead for this feature. What should you do?

- A. Create a separate bucket for each user in Cloud Storage.
Assign a separate service account to allow write access on each bucket.
Transfer service account credentials to the client application based on user information.
The application uses this service account to upload images to Cloud Storage.
- **B. Change the application to create signed URLs for Cloud Storage.
Transfer these signed URLs to the client application to upload images to Cloud Storage.**
- C. Change the application to accept images directly and store them in the database that stores other user information.
- D. Set up a web server on GCP to accept user images and create a file store to keep uploaded files.
Change the application to retrieve images from the file store.

Answer: B

Explanation:

<https://cloud.google.com/blog/products/storage-data-transfer/uploading-images-directly-to-cloud-storage-by-using-signed-url>

NEW QUESTION # 136

Case Study 1 - HipLocal

Company Overview

HipLocal is a community application designed to facilitate communication between people in close proximity. It is used for event planning and organizing sporting events, and for businesses to connect with their local communities. HipLocal launched recently in a few neighborhoods in Dallas and is rapidly growing into a global phenomenon. Its unique style of hyper-local community communication and business outreach is in demand around the world.

Executive Statement

We are the number one local community app; it's time to take our local community services global. Our venture capital investors want to see rapid growth and the same great experience for new local and virtual communities that come online, whether their members are 10 or 10000 miles away from each other.

Solution Concept

HipLocal wants to expand their existing service, with updated functionality, in new regions to better serve their global customers. They want to hire and train a new team to support these regions in their time zones. They will need to ensure that the application scales smoothly and provides clear uptime data.

Existing Technical Environment

HipLocal's environment is a mix of on-premises hardware and infrastructure running in Google Cloud Platform. The HipLocal team understands their application well, but has limited experience in global scale applications. Their existing technical environment is as follows:

- * Existing APIs run on Compute Engine virtual machine instances hosted in GCP.
- * State is stored in a single instance MySQL database in GCP.
- * Data is exported to an on-premises Teradata/Vertica data warehouse.
- * Data analytics is performed in an on-premises Hadoop environment.
- * The application has no logging.
- * There are basic indicators of uptime; alerts are frequently fired when the APIs are unresponsive.

Business Requirements

HipLocal's investors want to expand their footprint and support the increase in demand they are seeing. Their requirements are:

- * Expand availability of the application to new regions.
- * Increase the number of concurrent users that can be supported.
- * Ensure a consistent experience for users when they travel to different regions.
- * Obtain user activity metrics to better understand how to monetize their product.
- * Ensure compliance with regulations in the new regions (for example, GDPR).
- * Reduce infrastructure management time and cost.
- * Adopt the Google-recommended practices for cloud computing.

Technical Requirements

- * The application and backend must provide usage metrics and monitoring.
- * APIs require strong authentication and authorization.
- * Logging must be increased, and data should be stored in a cloud analytics platform.
- * Move to serverless architecture to facilitate elastic scaling.
- * Provide authorized access to internal apps in a secure manner.

HipLocal's APIs are showing occasional failures, but they cannot find a pattern. They want to collect some metrics to help them troubleshoot.

What should they do?

- A. Use Stackdriver Trace to look for performance bottlenecks.
- **B. Install the Stackdriver Logging agent on the VMs.**
- C. Install the Stackdriver Monitoring agent on the VMs.
- D. Take frequent snapshots of all of the VMs.

Answer: B

NEW QUESTION # 137

Your application is controlled by a managed instance group. You want to share a large read-only data set between all the instances in the managed instance group. You want to ensure that each instance can start quickly and can access the data set via its filesystem with very low latency. You also want to minimize the total cost of the solution.

What should you do?

- A. Move the data to a Cloud Storage bucket, and copy the data to the boot disk of the instance via a startup script.
- B. Move the data to a Cloud Storage bucket, and mount the bucket on the filesystem using Cloud Storage FUSE.
- **C. Move the data to a Compute Engine persistent disk, and attach the disk in read-only mode to multiple Compute Engine virtual machine instances.**
- D. Move the data to a Compute Engine persistent disk, take a snapshot, create multiple disks from the snapshot, and attach each disk to its own instance.

Answer: C

NEW QUESTION # 138

You are developing a marquee stateless web application that will run on Google Cloud. The rate of the incoming user traffic is expected to be unpredictable, with no traffic on some days and large spikes on other days. You need the application to automatically scale up and down, and you need to minimize the cost associated with running the application. What should you do?

- A. Build the application in Python with CloudSQL as the database. Deploy the application to App Engine standard environment.
- B. Build the application in Python with Firestore as the database. Deploy the application to a Compute Engine managed instance group with autoscaling.
- C. Build the application in C# with Firestore as the database. Deploy the application to App Engine flexible environment.
- **D. Build the application in Python with Firestore as the database. Deploy the application to Cloud Run.**

Answer: D

NEW QUESTION # 139

You plan to deploy a new application revision with a Deployment resource to Google Kubernetes Engine (GKE) in production. The container might not work correctly. You want to minimize risk in case there are issues after deploying the revision. You want to

follow Google-recommended best practices. What should you do?

- A. Perform a rolling update with a HorizontalPodAutoscaler scale-down policy value of 0.
- **B. Perform a rolling update with a PodDisruptionBudget of 80%.**
- C. Convert the Deployment to a StatefulSet, and perform a rolling update with a PodDisruptionBudget of 80%.
- D. Convert the Deployment to a StatefulSet, and perform a rolling update with a HorizontalPodAutoscaler scale-down policy value of 0.

Answer: B

Explanation:

Explanation

<https://cloud.google.com/blog/products/containers-kubernetes/ensuring-reliability-and-uptime-for-your-gke-clust> Setting PodDisruptionBudget ensures that your workloads have a sufficient number of replicas, even during maintenance. Using the PDB, you can define a number (or percentage) of pods that can be terminated, even if terminating them brings the current replica count below the desired value. With PDB configured, Kubernetes will drain a node following the configured disruption schedule. New pods will be deployed on other available nodes. This approach ensures Kubernetes schedules workloads in an optimal way while controlling the disruption based on the PDB configuration.

NEW QUESTION # 140

.....

If you are still struggling to get the Google Professional-Cloud-Developer exam certification, DumpsFree will help you achieve your dream. DumpsFree's Google Professional-Cloud-Developer exam training materials is the best training materials. We can provide you with a good learning platform. How do you prepare for this exam to ensure you pass the exam successfully? The answer is very simple. If you have the appropriate time to learn, then select DumpsFree's Google Professional-Cloud-Developer Exam Training materials. With it, you will be happy and relaxed to prepare for the exam.

Professional-Cloud-Developer Valid Test Labs: <https://www.dumpsfree.com/Professional-Cloud-Developer-valid-exam.html>

Self-assessment is a very important element of any test preparation process, so we provide you with one of our best products Professional-Cloud-Developer practice test, To keep abreast with the latest Google technology/syllabus upgrades, we provide regular updates to our Google Professional-Cloud-Developer exam products, Google Professional-Cloud-Developer Exam Collection Pdf After about ten years' development, our company has become the leader in the education industry, Therefore, be confident to take the Professional-Cloud-Developer :Google Certified Professional - Cloud Developer exam, you will achieve success beyond all questions.

Before joining Valmont, he served as the Director of Worldwide Operations Professional-Cloud-Developer for the Power Systems Division of the Kohler Company, where he led global operations in Singapore, China, France, India, and the United States.

Perfect Professional-Cloud-Developer Exam Collection Pdf for Real Exam

Purchase and Download Apps, Self-assessment is a very important element of any test preparation process, so we provide you with one of our best products Professional-Cloud-Developer Practice Test.

To keep abreast with the latest Google technology/syllabus upgrades, we provide regular updates to our Google Professional-Cloud-Developer exam products, After about ten years' development, our company has become the leader in the education industry.

Therefore, be confident to take the Professional-Cloud-Developer :Google Certified Professional - Cloud Developer exam, you will achieve success beyond all questions, Our website offers you the latest preparation materials for the Professional-Cloud-Developer real exam and the study guide for your review.
