So, why not, take a decision right now and ace your Microsoft Security, Compliance, and Identity Fundamentals (SC-900) exam preparation with top-notch Microsoft SC-900 exam questions?

Microsoft Security, Compliance, and Identity Fundamentals Sample Questions (Q15-Q20):

NEW QUESTION # 15

To which three locations can a data loss prevention (DLP) policy be applied? Each correct answer presents a complete solution.
NOTE: Each correct answer is worth one point.

- A. Microsoft Exchange Online email
- B. Microsoft Viva Engage
- C. Microsoft Teams chat and channel messages
- D. Microsoft Exchange Online public folders
- E. Microsoft OneDrive accounts

Answer: A,C,E

Explanation:

Microsoft Purview Data Loss Prevention (DLP) defines supported service locations for policy enforcement.

The Microsoft Learn/SCI materials state that DLP policies "help protect sensitive information across Microsoft 365 services" and can be scoped to common workloads. In the DLP overview, Microsoft explicitly lists the core cloud locations: "You can create DLP policies that protect content in Exchange Online, SharePoint Online, and OneDrive for Business." The Teams workload is also included: "DLP can monitor and take protective actions on Microsoft Teams chat and channel messages." These statements confirm that applying a DLP policy to Exchange Online email (A), OneDrive accounts (B), and Teams chat and channel messages (D) is supported.

By contrast, Exchange Online public folders (C) are not listed among supported DLP locations in the SCI documentation, and Viva Engage (formerly Yammer) (E) is not a standard Microsoft Purview DLP location in the core list above (Viva Engage has separate governance and communication compliance controls).

Therefore, from the supported locations enumerated in Microsoft's DLP guidance, the correct answers are Exchange Online email, OneDrive accounts, and Teams chat and channel messages.

NEW QUESTION # 16

Which Azure Active Directory (Azure AD) feature can you use to evaluate group membership and automatically remove users that no longer require membership in a group?

- A. conditional access policies
- B. Azure AD Identity Protection
- C. access reviews
- D. managed identities

Answer: C

Explanation:

Explanation

Explanation:

Azure Active Directory (Azure AD) access reviews enable organizations to efficiently manage group memberships, access to enterprise applications, and role assignments.
