## Apple Deployment and Management Exam Sample Questions (Q18-Q23):

### NEW QUESTION # 18

Which MDM management capabilities are available on an iPhone enrolled using account-driven User Enrollment?

- A. Access device location
- B. Remotely wipe the entire device
- C. Disable Activation Lock
- D. Require a passcode

**Answer: D**

Explanation:

Account-driven User Enrollment limits MDM scope. The iOS Deployment Reference states, "MDM can enforce policies like requiring a passcode with User Enrollment, but it cannot access location, wipe the device, or disable Activation Lock." References: iOS Deployment Reference, "User Enrollment" section.

Apple Platform Deployment Guide, "BYOD Management" section.

### NEW QUESTION # 19

What does the Bonjour zero-configuration networking architecture support?

- A. MAC address randomization
- B. Discovering services on a local area network
- C. RADIUS authentication
- D. Opportunistic Wireless Encryption

**Answer: B**

Explanation:

Bonjour enables service discovery on a LAN. The macOS Deployment Reference states, "Bonjour supports discovering services such as printers, file shares, and other resources on a local network." Options A, B, and D are unrelated to Bonjour's function.

References:

macOS Deployment Reference, "Bonjour" section.

Apple Platform Deployment Guide, "Networking" section.

### NEW QUESTION # 20

You used Apple Business Manager to assign enrolled iPhone and iPad devices to a new MDM solution. What must you do to enroll the devices in the new MDM solution using Automated Device Enrollment?

- A. Send a remote-wipe command from Apple Business Manager.
- B. Erase the devices.
- C. Revive the devices.
- D. Release the devices in Apple Business Manager.

**Answer: B**

Explanation:

Erasing triggers ADE. The Apple Business Manager User Guide states, "To enroll devices in a new MDM solution via ADE after reassignment, erase the devices to restart Setup Assistant and connect to the new server." References:

Apple Business Manager User Guide, "Reassign Devices" section.

Apple Platform Deployment Guide, "ADE Re-enrollment" section.

### NEW QUESTION # 21

Which type of Apple ID is required for User Enrollment?

- A. Apple ID
- B. Shared Apple ID
- C. Personal Apple ID
- **D. Managed Apple ID**

**Answer: D**

Explanation:

User Enrollment, designed for BYOD, requires a Managed Apple ID to separate personal and managed data cryptographically. Created via Apple Business Manager (ABM) or Apple School Manager (ASM), Managed Apple IDs enable organizational policies while preserving user privacy. Personal Apple IDs (options A and C, the same) are not used for User Enrollment, as they lack organizational control. There's no "Shared Apple ID" (option D); Shared iPad uses Managed Apple IDs differently. The Apple Platform Deployment Guide mandates Managed Apple IDs for User Enrollment.

#### **NEW QUESTION # 22**

Your organization is migrating to a new MDM solution. iPhone and iPad devices were reassigned to the new MDM solution using Apple Business Manager. What must you do before you can enroll the devices in the new MDM solution using Automated Device Enrollment?

- **A. Erase the devices.**
- B. Revive the devices.
- C. Release the devices in Apple School Manager or Apple Business Manager.
- D. Send a remote wipe command from Apple School Manager or Apple Business Manager.

**Answer: A**

Explanation:

Apple explains that for a device to enroll into a new MDM server through Automated Device Enrollment (ADE), it must go through the Setup Assistant workflow again. This requires the device to be erased before it will attempt to re-enroll. Simply reassigning the device in Apple Business Manager does not trigger enrollment until the device is reset and Setup Assistant runs. Apple stresses that erase is necessary because ADE workflows are tied to the initial setup sequence. Remote wipe from ABM/ASM is not a feature, and Revive is a low-level restore process for Apple silicon, not for standard redeployment. Releasing devices removes them entirely from ABM. Therefore, erasing is the only required action before the device can enroll in the new MDM.
