

# JN0-481 Exam PDF & JN0-481 Valid Test Camp

P.S. Free 2026 Juniper JN0-481 dumps are available on Google Drive shared by SurePassExams: <https://drive.google.com/open?id=1mzropP82zK0w7y703446jsaVHbb7adSo>

Our JN0-481 study materials can come today. With so many loyal users, our good reputation is not for nothing. To buy our JN0-481 exam braindumps, you don't have to worry about information leakage. Selecting a brand like JN0-481 learning guide is really the most secure. And we are responsible and professional to protect your message as well. At the same time, if you have any problem when you buy or download our JN0-481 Practice Engine, just contact us and we will help you in a minute.

Our company has taken a lot of measures to ensure the quality of JN0-481 preparation materials. It is really difficult for yourself to hire a professional team, regularly investigate market conditions, and constantly update our JN0-481 exam questions. But we have all of them done for you. And our JN0-481 study braindumps have the advantage of high-effective. Just look at our pass rate of our loyal customers, with the help of our JN0-481 learning guide, 98% of them passed the exam successfully.

## JN0-481 Valid Test Camp & Exam JN0-481 Questions

With the assist of Juniper practice demo, your goals to get the JN0-481 certification will be very easy to accomplish and 100% guaranteed. Before you choose our JN0-481 study material, you can try our JN0-481 free demo for assessment. For a better idea you can also read JN0-481 testimonials from our previous customers at the bottom of our product page to judge the validity. Our updated and useful JN0-481 will be the best tool for your success.

## Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q77-Q82):

### NEW QUESTION # 77

You are using Juniper Apstra to design a data center fabric. In this scenario, which object type associates a specific vendor model to a logical device?

- A. interface map
- B. agent profiles
- C. device profiles

- D. templates

**Answer: C**

Explanation:

Device profiles are objects that associate a specific vendor model to a logical device in Juniper Apstra. Device profiles contain extensive hardware model details, such as form factor, ASIC, CPU, RAM, ECMP limit, and supported features. Device profiles also define how configuration is generated, how telemetry commands are rendered, and how configuration is deployed on a device. Device profiles enable the Apstra system to render and deploy the configuration according to the Apstra Reference Design.

#### NEW QUESTION # 78

IBA probes analyze telemetry data from specified devices within a blueprint. Which component identifies devices that supply data for a specific probe?

- A. graph query
- B. data selector
- C. search engine
- D. processor

**Answer: A**

Explanation:

A graph query is a component that identifies devices that supply data for a specific probe. A graph query is an expression that matches nodes in the Apstra graph database based on their attributes, such as device name, role, type, or tag. A graph query can be used to select the source devices for the input processors of a probe, as well as to filter the data by device attributes in the subsequent processors of a probe.

#### NEW QUESTION # 79

In the Juniper Apstra design phase, which object dictates port count, port speed, and how the ports would be used?

- A. network devices
- B. interface map
- C. rack type
- D. logical devices

**Answer: B**

Explanation:

Interface maps are objects that map interfaces between logical devices and physical hardware devices in the Juniper Apstra design phase. They dictate port count, port speed, and how the ports would be used for achieving the intended network configuration rendering. Interface maps also allow you to select device ports, transformations, and interfaces, provision breakout ports, and disable unused ports.

#### NEW QUESTION # 80

How does Intent-Based Analytics align with the principles of intent-based networking in terms of data exploration and analysis?

- A. By facilitating dynamic queries for intent-based data exploration
- B. By managing employee property allocations in the data center
- C. By predicting future changes in the network environment
- D. By providing real-time weather updates for the data center location

**Answer: A**

#### NEW QUESTION # 81

Using Juniper Apstra, which component is defined in a template?

- A. the leaf-to-spine interconnection

- B. the definition of IP pools
- C. the speed of the links between the spine devices and the leaf devices
- D. the number of spine devices in a topology

**Answer: A**

Explanation:

A template is a configuration template that defines a network's policy intent and structure. A template can be either rack-based or pod-based, depending on the type and number of racks and pods in the network design. A template includes the following details:

Policies: These are the parameters that apply to the entire network, such as the overlay control protocol, the ASN allocation scheme, and the underlay type.

Structure: This is the physical layout of the network, such as the type and number of racks, pods, spines, and leaves. The structure also defines the leaf-to-spine interconnection, which is the number and type of links between the leaf and spine devices. The leaf-to-spine interconnection can be either single or dual, depending on the redundancy and bandwidth requirements.

Therefore, the correct answer is A. the leaf-to-spine interconnection. This is a component that is defined in a template, as it determines the physical connectivity of the network. The speed of the links, the number of spine devices, and the definition of IP pools are not components that are defined in a template, as they are either derived from the device profiles, the resource pools, or the blueprint settings.

## NEW QUESTION # 82

.....

We have free demos of our JN0-481 learning braindumps for your reference, as in the following, you can download which JN0-481 exam materials demo you like and make a choice. Therefore, if you really have some interests in our JN0-481 Study Guide, then trust our professionalism, we will give you the most professional suggestions on the details of the JN0-481 practice quiz, no matter you buy it or not, just feel free to contact us!

**JN0-481 Valid Test Camp:** <https://www.surepassexams.com/JN0-481-exam-bootcamp.html>

What's more, JN0-481 exam braindumps cover most of the knowledge points for the exam, and you can master the major knowledge points for the exam as well as improve your ability in the process of learning. As in this case, why not learning the most popular IT skills and gaining the Juniper JN0-481 Valid Test Camp JN0-481 Valid Test Camp certificate, Juniper JN0-481 Exam PDF You can distinguish from multispect service.

An initial assessment of the client would reveal: JN0-481 circle.jpg A, The template is styled so that when your content is inserted, it automatically inherits the styles from stylesheets defined in Exam JN0-481 Questions the template, such as link styles, menus, navigation, text size, and colors, to name a few.

## Valid Juniper JN0-481 Exam PDF - JN0-481 Free Download

What's more, JN0-481 Exam Braindumps cover most of the knowledge points for the exam, and you can master the major knowledge points for the exam as well as improve your ability in the process of learning.

As in this case, why not learning the most JN0-481 Exam PDF popular IT skills and gaining the Juniper JNCIS-DC certificate, You can distinguish from multispect service, From the JN0-481 dumps free you will find the difference between us and the others.

If you don't know how to choose, I choose your best exam materials for you.
