

HP HPE7-S01 Latest Test Format & Latest HPE7-S01 Test Camp

Pass HP HPE7-A08 Exam | Latest HPE7-A08 Dumps & Practice Exams - Cert007

The Aruba CX 8400 offers high-speed 100GbE connectivity, making it an ideal solution for high-performance enterprise core networks with demanding data throughput requirements.

14. Which feature of Aruba CX 8325 provides multi-tenancy and network segmentation?

- A. EVPN/VXLAN
- B. Virtual Switching Framework (VSF)
- C. Smart Rate Ports
- D. Zero Touch Provisioning

Answer: A

Explanation:

The EVPN/VXLAN feature in Aruba CX 8325 enables scalable multi-tenancy and virtualized network segmentation, making it a powerful solution for modern data center environments.

15. Which two Aruba CX switch series are optimized for campus core and aggregation? (Select two)

- A. Aruba CX 6200
- B. Aruba CX 9300
- C. Aruba CX 8400
- D. Aruba CX 8325

Answer: C, D

Explanation:

The CX 8400 and CX 8325 are designed for high-performance campus core and aggregation, providing multi-terabit switching, modular scalability, and VXLAN/EVPN support.

16. Which feature allows Aruba CX switches to detect and remediate network anomalies in real-time?

- A. Network Analytics Engine (NAE)
- B. Virtual Switching Extension
- C. Multi-Chassis Link Aggregation (MC-LAG)
- D. Intelligent Power Management

Answer: A

Explanation:

NAE continuously monitors the network for anomalies, using event-based automation to analyze and remediate issues, enhancing real-time network stability.

17. Which Aruba CX feature simplifies multi-device configurations across a large enterprise network?

- A. Zero Touch Provisioning
- B. Aruba NetEdit
- C. Dynamic Segmentation
- D. VSX

Answer: B

Explanation:

Aruba NetEdit provides automated configuration validation and deployment, ensuring consistency across multiple CX switches in large-scale environments.

18. Which two Aruba CX switch series offer high-speed uplinks for access layer deployments? (Select two)

5 / 7

Do you long to get the HPE7-S01 certification to improve your life? Are you worried about how to choose the HPE7-S01 learning product that is suitable for you? If your answer is yes, we are willing to tell you that you are a lucky dog, because you meet us, it is very easy for us to help you solve your problem. The HPE7-S01 latest question from our company can help people get their HPE7-S01 certification in a short time.

HP HPE7-S01 Exam Syllabus Topics:

Section	Weight	Objectives
Implementation and Lifecycle Management	15%	- Deployment planning and validation - Upgrade, maintenance and monitoring
Customer Success and Solution Optimization	10%	- Troubleshooting and continuous improvement - Solution demonstration and value justification
Integration with Data Center Infrastructure	20%	- Networking and storage integration - HPE OneView management and automation - Security, compliance and data protection
HPE Compute Architecture and Technologies	25%	- Virtualization and container integration - HPE ProLiant, Apollo and Superdome Flex platforms - Compute component selection: processors, memory, storage, accelerators

Solution Design for Enterprise Workloads	30%	- Scalability, availability and performance optimization - Requirements analysis and environment assessment - Design for AI, HPC and mission-critical workloads

Latest HPE7-S01 Test Camp | New HPE7-S01 Exam Pdf

BraindumpsPrep presents its Advanced HPE Compute Architect Solutions Written Exam (HPE7-S01) exam product at an affordable price as we know that applicants desire to save money. To gain all these benefits you need to enroll in the Advanced HPE Compute Architect Solutions Written Exam Certification EXAM and put all your efforts to pass the challenging Advanced HPE Compute Architect Solutions Written Exam (HPE7-S01) exam easily. In addition, you can test specs of the Advanced HPE Compute Architect Solutions Written Exam practice material before buying by trying a free demo. These incredible features make BraindumpsPrep prep material the best option to succeed in the HP HPE7-S01 examination. Therefore, don't wait. Order Now !!!

HP Advanced HPE Compute Architect Solutions Written Exam Sample Questions (Q81-Q86):

NEW QUESTION # 81

A customer has policies requiring the removal of sensitive information from AI fine-tuning data. Which solution will help them address this need?

- A. NVIDIA NeMo Evaluator
- **B. NVIDIA NeMo Curator**
- C. Kubeflow Katib
- D. Ray Tune

Answer: B

Explanation:

NVIDIA NeMo Curator is used for data curation and preprocessing, including PII/sensitive-data identification and removal before data is used for training or fine-tuning. Katib and Ray Tune are for HPO, while NeMo Evaluator evaluates model quality.

Reference: <https://docs.nvidia.com/nemo-framework/user-guide/25.04/datacuration/personalidentifiableinformationidentificationandremoval.html>

NEW QUESTION # 82

Which factors should you consider when determining the GPU memory requirements for inferencing an AI model?

- **A. The number of parameters in the model and the floating point precision**
- B. The floating point precision and the number of layers in the model
- C. The memory available on the host and the number of convolutional layers in the model
- D. The memory available on the host and the number of parameters in the model

Answer: A

Explanation:

GPU memory for inferencing is primarily driven by the model size, which depends on the number of parameters and the precision used to store them, such as FP32, FP16, BF16, or INT8.

NEW QUESTION # 83

You are recommending HPE ProLiant DL servers and HPE Alletra Storage MP B10000 for a customer's Red Hat OpenShift platform.

What should you recommend to simplify storage provisioning for workloads running on the platform?

- **A. HPE CSI Driver for Kubernetes**
- B. HPE Data Services Cloud Console integration with HPE Compute Ops Management
- C. HPE custom images for Red Hat Enterprise Linux

- D. HPE Alletra Storage MP vVols

Answer: A

Explanation:

The HPE CSI Driver/Operator for Kubernetes enables dynamic provisioning and management of persistent storage for Kubernetes/OpenShift workloads on HPE Alletra Storage MP B10000.

vVols are for VMware environments, not OpenShift workload storage provisioning.

NEW QUESTION # 84

An architect is designing a virtualization platform and must justify why storage is deployed as HPE Alletra Storage MP rather than local server disks.

Which benefit is the strongest justification?

- A. Higher single-server IOPS than NVMe direct-attached storage
- B. Lower acquisition cost per usable terabyte
- C. Non-disruptive scaling of capacity and performance independently of compute
- D. Elimination of the need for a storage fabric

Answer: C

Explanation:

Disaggregated shared storage lets capacity and performance scale independently of compute nodes and supports non-disruptive expansion and data services shared across hosts. Direct- attached NVMe can offer lower latency for a single host but ties capacity to that host.

NEW QUESTION # 85

You are proposing HPE Cray Storage Systems C500 for a customer's converged HPC/AI training cluster.

What is one correct explanation of the benefits of this solution for this use case?

- A. This solution provides clustering for NAS to eliminate bottlenecks and improve I/O.
- B. This solution features an HPE proprietary parallel storage protocol that is optimized for the random read workloads characteristic of HPC/AI.
- C. This solution uses S3-compatible object storage, backed by disaggregated block storage, to combine scalability with flexibility.
- D. This solution provides strong read and write performance based on Lustre parallel storage.

Answer: D

Explanation:

HPE Cray Storage Systems C500 is designed for entry and mid-range HPC/AI clusters and uses an open-source parallel file system architecture, with strong read/write performance for HPC and AI workloads.
