Salesforce Certified MuleSoft Developer Sample Questions (Q212-Q217):

NEW QUESTION # 212

Refer to the exhibits.

Each route in the Scatter-Gather sets the payload to the number shown in the label. What response is returned to a web client request to the HTTP Listener?

- A.
- B.
- C.
- D.

Answer: D

Explanation:

Correct answer is as below. After all processing routes have finished execution, the Scatter-Gather component creates a new Mule event that combines all resulting Mule events from each route, and then passes the new Mule event to the next component in the flow.

```
{
  "0": {
    "attributes": ...,
    "payload": "100"
  },
  "1": {
    "attributes": ...,
    "payload": "200"
  }
}
```

Bottom of Form

NEW QUESTION # 213

What module and operation will throw an error if a Mule event's payload is not a number?

- **A. Validation module Is Number operation**
- B. None of these
- C. Validation module Is not Number operation
- D. Filter module Is Number operation

Answer: A

Explanation:

Correct answer is Validation module Is Number operation.

Mule 4 does not use filters anymore. The functionality provided by filters in Mule 3 can be achieved by using the Validation Module.

NEW QUESTION # 214

What is the object type returned by the File List operation?

- A. Array of String file names
- B. Object of String filenames
- C. Object of Mule event objects
- **D. Array of Mule event objects**

Answer: D

Explanation:

The List operation returns an array of messages in which: Each message holds the file's content in its payload.

The file's attributes section carries the file's metadata (such as name, creation time, and size). The payload is empty if the element is a folder.

NEW QUESTION # 215

An organization is beginning to follow MuleSoft's recommended API-led connectivity approach to use modern API to support the development and lifecycle of the integration solutions and to close the IT delivery gap.

What distinguishes between how modern APIs are organized in a MuleSoft recommended API-led connectivity approach as compared to other common enterprise integration solutions?

- A. The API implementations are monitored with common tools, centralized monitoring and security systems
- B. The API interfaces are specified as microservices with one API representing all the business logic of an existing and proven end-to-end solution
- **C. The API interfaces are specified at a granularity intended for developers to consume specific aspects of integration processes**

- D. The API implementation are built with standards using common lifecycle and centralized configuration management tools

Answer: C

Explanation:

Correct answer is The API interfaces are specified at a granularity intended for developers to consume specific aspect of integration processes

NEW QUESTION # 216

Refer to the exhibit.

What expression correctly specifies inputparameters to pass the city and state values to the SQL query?

- A.
- B.
- C.
- D.

Answer: D

Explanation:

MuleSoft Documentation Reference : <https://docs.mulesoft.com/db-connector/1.9/database-connector-select>

NEW QUESTION # 217

.....
