Microsoft AB-730 Reliable Test Tips & AB-730 Useful Dumps

We will give you full refund if you fail to pass the exam after purchasing AB-730 learning materials from us. We are pass guarantee and money back guarantee, and money will be returned to your payment account. We have a professional team to collect and research the latest information for AB-730 Exam Dumps, we can ensure you that the exam dumps you receive are the latest one we have. In order to let you know the latest information for the AB-730 learning materials, we offer you free update for one year, and the update version will be sent to your email automatically.

Microsoft AI Business Professional Sample Questions (Q87-Q92):

NEW QUESTION # 87

You sign in to the Microsoft 365 Copilot app by using your work account as shown in the following exhibit

A colleague tells you that when they open the Microsoft 365 Copilot app, they have access to the Researcher agent. You need to access to the Researcher agent. What should you do?

- A. Request a Microsoft 365 Copilot license from an administrator.
- B. From Microsoft Edge, use your work account to sign in to <https://copilot.microsoft.com>.
- C. Sign in to the Copilot app by using a personal account
- D. Select Explore agents and then search for Researcher.

Answer: D

Explanation:

In Microsoft 365 Copilot, agents such as Researcher are accessed through the Agents experience within the Copilot app. If the user interface does not immediately display a specific agent, the correct action is to browse or search the available agents catalog. The exhibit shows the left navigation pane with an Explore agents option.

According to Microsoft AI Business Professional guidance, built-in and custom agents can be discovered and enabled through the Explore agents section. If the user already has the appropriate Copilot license and is signed in with their work account, there is no need to switch accounts or request another license.

Signing in through a browser does not change feature availability, and using a personal account would remove access to organizational features. Therefore, to access the Researcher agent, you should select Explore agents and search for Researcher.

NEW QUESTION # 88

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area		
Statements	Yes	No
Prompt injection can cause data exposure and unintended system behavior.	<input type="radio"/>	<input type="radio"/>
Prompt injection can be used to embed malicious or harmful instructions.	<input type="radio"/>	<input type="radio"/>
Prompt injection is a security vulnerability unique to generative AI systems that interpret and respond to natural language inputs.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Statements

Prompt injection can cause data exposure and unintended system behavior.

Yes

No

Prompt injection can be used to embed malicious or harmful instructions.

Prompt injection is a security vulnerability unique to generative AI systems that interpret and respond to natural language inputs.

NEW QUESTION # 89

Select the answer that correctly completes the sentence.

Answer Area

When you are creating an agent in Microsoft 365 Copilot, you can leverage generative AI to build the agent by using

- the Configure tab
- a Copilot notebook
- a Copilot page
- the Describe tab

Answer:

Explanation:

Answer Area

When you are creating an agent in Microsoft 365 Copilot, you can leverage generative AI to build the agent by using

the Describe tab

Explanation:

Answer Area

When you are creating an agent in Microsoft 365 Copilot, you can leverage generative AI to build the agent by using the Describe tab

The Describe tab is where you leverage generative AI to help build an agent by describing what you want the agent to do in natural language. Instead of manually configuring everything first, you provide the agent's purpose, target users, tone, and the tasks it should perform (for example: "Create an onboarding agent that answers HR policy questions in a friendly tone and references SharePoint policies"). Copilot then uses that description to propose an initial agent setup—such as suggested behaviors, starter prompts, and structure—accelerating agent creation and improving consistency. By contrast, the Configure tab is typically used to fine-tune and finalize settings (such as knowledge sources, actions, and other parameters) after the agent concept is established. A Copilot notebook or Copilot page can help organize content and outputs, but they are not the primary place where generative AI "builds" the agent definition. Using the Describe tab reflects best practice: start with clear intent and constraints, then refine configuration for governance, accuracy, and usability.

NEW QUESTION # 90

You use the Researcher agent in Microsoft 365 Copilot to generate a report. What can you use to verify whether the report was generated by using valid sources?

- A. instructions
- B. capabilities
- C. citations

- D. memory

Answer: C

NEW QUESTION # 91

You are using Microsoft 365 Copilot to plan a trip and have asked Copilot to remember several details about the trip.

You cancel the trip plans.

You need to ensure that Copilot forgets the details.

What should you do?

- **A. From Copilot delete memories.**
- B. From the My Account portal, delete the Copilot activity history.
- C. From Copilot delete all the conversation about the trip.
- D. From Copilot delete custom instructions.

Answer: A

Explanation:

Microsoft 365 Copilot includes a memory capability that allows it to retain user-provided preferences or details across interactions when explicitly instructed to remember them. These stored details are referred to as memories and are separate from standard conversation history.

If you previously asked Copilot to remember specific trip-related details, those details are stored as structured memory items. Simply deleting the conversation does not necessarily remove stored memory entries. Likewise, deleting activity history through the My Account portal removes conversation records but does not directly manage structured Copilot memories. Custom instructions define persistent behavioral preferences and are unrelated to trip-specific stored data.

To ensure Copilot no longer retains those trip details, you must delete the stored memories directly within Copilot. Microsoft documentation explains that users can view and manage saved memories and remove them individually to control what Copilot retains.

Therefore, the correct action to ensure Copilot forgets the trip details is to delete the memories.

NEW QUESTION # 92

.....

Actual4Exams try hard to makes AB-730 exam preparation easy with its several quality features. Our AB-730 exam dumps come with 100% refund assurance. We are dedicated to your accomplishment, hence pledges you victory in AB-730 exam in a single attempt. If for any reason, a user fails in AB-730 exam then he will be refunded the money after the process. Also, we offer 1 year free updates to our AB-730 Exam esteemed users; and these updates will be entitled to your account right from the date of purchase. Also the 24/7 Customer support is given to users, who can email us if they find any haziness in the AB-730 exam dumps, our team will merely answer to your all AB-730 exam product related queries.
