

300-425 Web-based Practice Exam

Top 5 Facts to Rely on Cisco 300-425 Practice Tests

1. You get the actual Cisco 300-425 exam experience.
2. Time management becomes easy during the actual exam.
3. Valuable insights offer more improvement scope.
4. Rigorous Practice Makes you perfect about the Cisco 300-425 syllabus domains.
5. Self-assessment provides self-satisfaction regarding the 300-425 exam preparation.

The Cisco job market has become so competitive and challenging. To stay competitive in the market as an experienced Cisco professional you have to upgrade your skills and knowledge with the Designing Cisco Enterprise Wireless Networks (300-425) certification exam. With the Cisco 300-425 exam dumps you can easily prove your skills and upgrade your knowledge. To do this you just need to enroll in the Designing Cisco Enterprise Wireless Networks (300-425) certification exam and put all your efforts to pass this challenging 300-425 exam with good scores. However, you should keep in mind that to get success in the 300-425 certification exam is not a simple and easy task.

Cisco 300-425 certification exam is aimed at professionals who want to specialize in designing and implementing enterprise wireless networks. 300-425 exam is the ideal choice for network administrators, wireless engineers, and other IT professionals who want to demonstrate their expertise in designing and implementing enterprise-level wireless networks. 300-425 exam covers a range of topics, including the design of wireless networks, RF planning and site surveys, WLAN high availability, and more.

Introduction of Cisco 300-425 Certification Exam

The Cisco 300-425 certification is primarily for individuals who want to work as network support staff. The exam design is split up into two sections, the router, and the switch section. The purpose of the Cisco 300-425 exam is to test your knowledge of network technologies. The courseware covers topics that are related to switch installation and configuration, router setup and configuration,

WAN protocols and connection types, and network security fundamentals. The Cisco 300-425 exam is one of the few exams that are associated with the CCENT certification.

The CCENT certification is usually the first step in becoming a Cisco-certified individual. The exam consists of questions that are related to routing and switching fundamentals, basic security, and network troubleshooting. Every question on the exam has a single correct answer while some may add an alternative answer or explanation if there is more than one possible way to solve a problem. The exam is closed book. This means that the Cisco 300-425 Certification candidates are not allowed to have any outside sources of reference materials while answering the questions. **Cisco 300-425 Dumps** cover all questions of Cisco 300-425. They are only allowed to reference data stored in their brain.

The Cisco 300-425 Certification exam has a passing score of 250 out of 500 points. It is one of the most popular professional certifications in the IT industry and over 50,000 people pass it every year. The passing rate for this exam is approximately 54%.

The exam is known to be a challenge for most of the individuals who take it. It consists of distinctive content that is difficult to master and an even harder quiz. The questions have a variety of topics, including networking fundamentals and security topics.

There are many options available for those who want to obtain their CCENT certification. However, the two most popular options available are attending a classroom or online training course and preparing through self-study programs such as books, online study guides, and practice exams.

Cisco 300-425 exam consists of 60-70 multiple-choice and simulation questions that must be completed in 90 minutes. 300-425 exam is administered by Pearson VUE and can be taken online or at a test center. Candidates who pass the exam will receive the Cisco Certified Specialist - Enterprise Wireless Design certification, which is recognized globally as a mark of excellence in wireless networking.

300-425 Download Demo, 300-425 Practice Questions

The Dumpkiller is one of the top-rated and leading platforms that offer real and exam trainers verified Designing Cisco Enterprise Wireless Networks 300-425 practice test questions. These Designing Cisco Enterprise Wireless Networks 300-425 exam questions are designed after deep research and verified by qualified Cisco 300-425 exam preparation experts. So rest assured that you will get the top-notch Dumpkiller 300-425 exam questions. These Dumpkiller 300-425 exam questions are the ideal Designing Cisco Enterprise Wireless Networks 300-425 exam preparation material that will prepare you to perform well for the final Designing Cisco Enterprise Wireless Networks 300-425 Certification Exam. So rest assured that with the Dumpkiller 300-425 exam questions you will get everything that is necessary for 300-425 exam preparation and success. Take a decision right now and just get registered in Cisco 300-425 certification exam and start preparation with Dumpkiller 300-425 exam questions. The Dumpkiller is committed since the beginning to offer the top-notch Designing Cisco Enterprise Wireless Networks 300-425 exam questions to Designing Cisco Enterprise Wireless Networks 300-425 exam candidates.

Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q221-Q226):

NEW QUESTION # 221

A network administrator of a global organization is collapsing all controllers to a single cluster located in central Europe. Which concern must be addressed?

- A. Syslog must be configured to the time-zone of the NMS platform.
- B. Centralized controllers cannot uniformly authenticate global users.
- C. Different RF policies per office are not available in this configuration.
- **D. Some channels may not be available consistently across the organization.**

Answer: D

Explanation:

When collapsing all controllers to a single cluster in a central location, one must consider the availability of channels across different regions. Regulatory domains vary globally, and certain channels allowed in Europe may not be available or legal in other parts of the world. This can affect the consistency of wireless coverage and performance.

NEW QUESTION # 222

An engineer is designing a mesh wireless network. The network must fulfill these requirements:

- bridge mode APs must be used
- WPA2-PSK
- minimize wireless traffic tunneled to the WLC

Which solution will meet the requirements?

- A. FlexConnect
- B. bridge RAP
- **C. Flex + Bridge**
- D. bridge MAP

Answer: C

Explanation:

Flex+Bridge mode allows for local switching of client traffic while using bridge mode APs. This minimizes the wireless traffic that needs to be tunneled back to the WLC, fulfilling all the specified requirements.

NEW QUESTION # 223

An engineer is designing a network deployment for a college with six buildings. Each building must have a WLC located in the IDF to support the APs. The wireless clients should be able to roam between the APs and the controllers. Which type of wireless architecture should be used?

- A. Centralized
- **B. Distributed**
- C. Autonomous
- D. Cloud

Answer: B

Explanation:

NEW QUESTION # 224

Which survey type uses predictive modeling software instead of physically visiting the site?

- A. Post-deployment survey
- **B. Predictive survey**
- C. Active survey
- D. Passive survey

Answer: B

NEW QUESTION # 225

Which UDP port numbers are used for exchange mobility packets in an AireOS wireless deployment?

- **A. UDP 16666 for control plane, UDP 16667 for data plane**
- B. UDP 16666 for control plane, EoIP (IP protocol 97) for data plane
- C. UDP 16668 for control plane, UDP 16667 for data plane
- D. UDP 16667 for control plane, UDP 16666 for data plane

Answer: A

Explanation:
