Oracle Planning and Collaboration Cloud 2025 Implementation Professional Sample Questions (Q67-Q72):

NEW QUESTION # 67

Which two statements are true about Production Scheduling? (Choose two.)

- A. Refreshing a Production Schedule means that the schedule is being recalculated.
- B. Releasing a schedule can update Manufacturing Cloud work orders with revised dates, resources, release status, and work definitions.
- C. A resource's constraint mode has two choices: Relaxed and Constrained.

- D. Schedule options include: Configure Scope, Parameters, and View Settings.
- E. If a work order is not firm, Production Scheduling may schedule with an alternate resource.

Answer: D,E

NEW QUESTION # 68

How does the Demand Fulfillment view prioritize at-risk demands?

- A. Based on the number of associated recommendations required to make the demand no longer at risk
- B. Based on order value weighted by the number of compression days required to make the demand no longer at risk
- C. Based on order value weighted by the number of associated recommendations required to make the demand no longer at risk
- D. Based on the order value per customer weighted by the number of associated recommendations required to make the demand no longer at risk

Answer: C

Explanation:

Review and Improve Your Demand Fulfillment

To improve the demand fulfillment of your plan, use the Demand Fulfillment table to review the at-risk demands in your plan and their related recommendations. You can take actions to accept recommendations from this page.

In the Demand Fulfillment UI, you can:

- * View prioritized at-risk demands based on order values weighted by the number of associated recommendations.
- * Take actions to accept or mark recommendations as complete.
- * Review summary information provided for the current demand fulfillment position of your plan to analyze the potential for improvement based on selected at-risk demands. The information also provides an understanding of the expected demand fulfillment position based on accepted and completed recommendations.

To review and improve your demand fulfillment:

- * In a Supply Planning, Planning Central, or Demand and Supply work area, select the Manage Plans task.
- * On the Manage Plans page, search for and open your plan.
- * In the Page Layout list, select Plan Summary.

Note that the tiles in the Plan Summary layout include a Demand at Risk in thousands tile.

- * In the Demand at Risk in thousands tile, click the Select Tile bar to review the Demand at Risk Summary data.

You can review the demand at risk data through a treemap view or a table view, the treemap view is the default. To switch to the table view, click the Show Table icon.

- * To review the demand at risk data:

* Using the treemap: Click an area in the treemap. Typically, you want to start with the area that has the highest demand at risk value. From the Drill To actions, click Demand Fulfillment.

* Using the table: Click the Show Table icon. In the Demand at Risk Summary table, click a cell.

Typically, you want to start with the cell that has the highest demand at risk value. From the Drill To actions, click Demand Fulfillment.

- * The Demand Fulfillment UI shows the individual orders that are at-risk and their related recommendations.

Tip: You can open the Demand Fulfillment table directly without drilling from the Plan Summary. After you open a plan, click the Open button at the page level. In the Open Table, Graph, or Tile Set dialog box, search for and select the Demand Fulfillment table. In the Demand Fulfillment UI, you can search for at-risk demands by using the filter fields in the search panel.

NEW QUESTION # 69

You ran a demand plan with the data refresh option "Do not refresh with current data." Identify two true statements. (Choose two.)

- A. Shipments forecast data will not be modified.
- B. Shipments history data will not be modified.
- C. Forecasting engine will run without advancing the plan date.
- D. Shipments history data will be updated.
- E. Forecasting engine will not run.

Answer: B,C

NEW QUESTION # 70

Your Manufacturing Organization makes bicycles and ships 50% of its output directly to large chain retailer customers. Your organization also ships products to your Distribution Center so that it can fulfill many other smaller customers. Your Manufacturing Organization uses Oracle SCM Planning Cloud, but your Distribution Center does not. Which setups should you recommend to the Manufacturing Organization?

- A. Map the Manufacturing Organization as a supplier in Maintain Supply Network Model; Select 'Include transfer orders' in Edit Plan Options.
- B. Select 'include transfer orders' in Edit Plan Options' advanced supply options.
- C. In Edit Plan Options, ensure both organizations are included in plan scope, and select, 'include transfer orders'.
- **D. Map the Distribution Center as a customer in Maintain Supply Network Model; Select 'include transfer orders' in Edit Plan Options.**

Answer: D

NEW QUESTION # 71

You want to be able to filter your data by the planner code attribute on the item. Where can you go to do this?

- A. Configure Planning Analytics > Levels and Attributes tab
- B. The process "Add Levels and Attributes" must be run to associate new attributes.
- C. The process "Associate Measure Catalog Attributes" must be run to associate new attributes.
- **D. Enable planner code on Planning Analytics page.**
- E. Configure Planning Analytics > Measure Catalog

Answer: D
